

How I Can Enable Person to Update or Change Profile Photo Via Set Preferences

When user navigates to Settings and Action Menu > Set Preferences > My photo, they are unable to upload the photo.

Cause: Missing data access to own record as employee role was missing the person data security.

Solution :

Modify the Employee role present with user by adding data security via below path.

Workforce Structure > Data Role and Security Profile

The screenshot shows the Oracle HR Cloud interface. The top navigation bar includes the Oracle logo, a search icon, a home icon, a star icon, a flag icon, a bell icon, and a user profile icon. Below the navigation bar, the breadcrumb path is 'Setup: Procurement'. The main content area is divided into two panels. The left panel, titled 'Functional Areas', lists several areas: 'Initial Users', 'Enterprise Profile', 'Legal Structures', 'Financial Reporting Structures', 'Organization Structures', 'Workforce Structures', and 'Users and Security'. The 'Users and Security' area is selected and highlighted in blue. The right panel, titled 'Users and Security', shows a list of tasks: 'Manage Job Roles', 'Manage Duties', 'Manage Data Security Policies', 'Manage Data Role and Security Profiles', and 'Manage Supplier User Roles'. The 'Manage Data Role and Security Profiles' task is selected and highlighted in blue. The interface also includes a 'Search Tasks' bar at the top of the right panel and a 'Change Feature Opt In' link at the top of the left panel.
