Register Time Clock Supplier

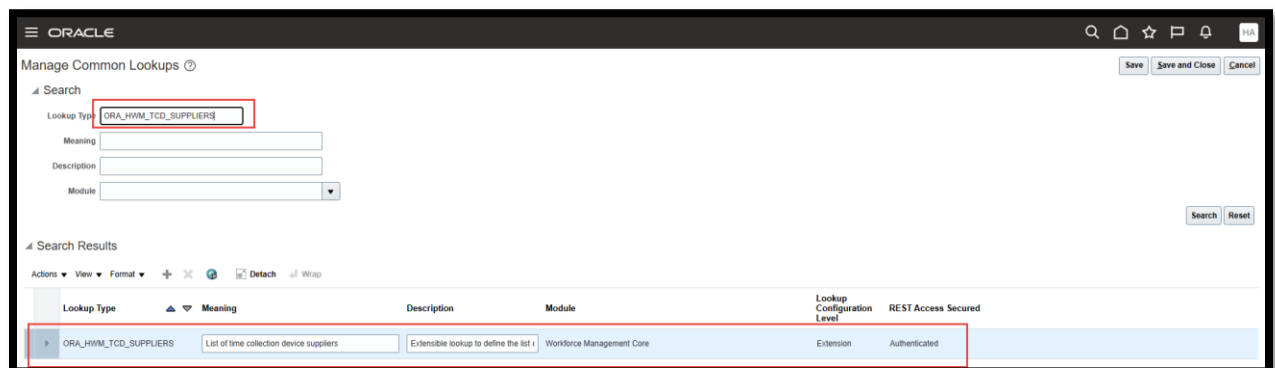

This task is mandatory if you will build integration with the time attendance machine for the customer, and the technical team will ask you for this mapping names,

A **Time Clock Supplier** represents the **vendor/system** that sends time entries into Oracle Fusion (for example: biometric machines, third-party attendance systems).

To create these tasks: setup and maintenance → click on task list → click on search and search for task → manage common lookup

Search for lookup type: ORA_HWM_TCD_SUPPLIERS

The screenshot shows the 'Manage Common Lookups' page in Oracle. The search criteria are set to 'Lookup Type: ORA_HWM_TCD_SUPPLIERS'. The search results table shows one entry: 'ORA_HWM_TCD_SUPPLIERS' with a meaning of 'List of time collection device suppliers'. Below the table, the 'ORA_HWM_TCD_SUPPLIERS: Lookup Codes' section is visible, with a red arrow pointing to the '+' icon in the actions bar to create a new lookup code.

Lookup Type	Meaning	Description	Module	Lookup Configuration Level	REST Access Secured
ORA_HWM_TCD_SUPPLIERS	List of time collection device suppliers	Extensible lookup to define the list	Workforce Management Core	Extension	Authenticated

Lookup Code	Display Sequence	Enabled	Start Date	End Date	Meaning	Description	Tag	LOB	Department
-------------	------------------	---------	------------	----------	---------	-------------	-----	-----	------------

The screenshot shows the 'Manage Common Lookups' page with the same search criteria. A red arrow points to the 'Save and Close' button in the top right corner, labeled with a circled '2'. Below the table, the 'ORA_HWM_TCD_SUPPLIERS: Lookup Codes' section shows a new entry being created, with a red arrow pointing to the '+' icon in the actions bar, labeled with a circled '1'.

Lookup Type	Meaning	Description	Module	Lookup Configuration Level	REST Access Secured
ORA_HWM_TCD_SUPPLIERS	List of time collection device suppliers	Extensible lookup to define the list	Workforce Management Core	Extension	Authenticated

Lookup Code	Display Sequence	Enabled	Start Date	End Date	Meaning	Description	Tag	LOB	Department
AM_CLOCK		✓	ddmm/yyyy	ddmm/yyyy	AM_CLOCK	AM_CLOCK			

- Click on + (Create)
 - AM_CLOCK
- After save and close
- Search again for this lookup type: ORA_HWM_TCD_SUPPLIER_EVENTS

The screenshot shows the 'Manage Common Lookups' interface. In the 'Search' section, the 'Lookup Type' field is populated with 'ORA_HWM_TCD_SUPPLIER_EVENT'. A red arrow points to this field. Below the search fields, the 'Search Results' table displays one result for 'ORA_HWM_TCD_SUPPLIER_EV...' with a description 'List of time device suppliers events'. At the bottom, the 'ORA_HWM_TCD_SUPPLIER_EVENTS: Lookup Codes' table shows two entries: 'ORA_HWM_IN' and 'ORA_HWM_IN_OUT', both with a display sequence of 01/01/0001 and end dates of 31/12/4712.

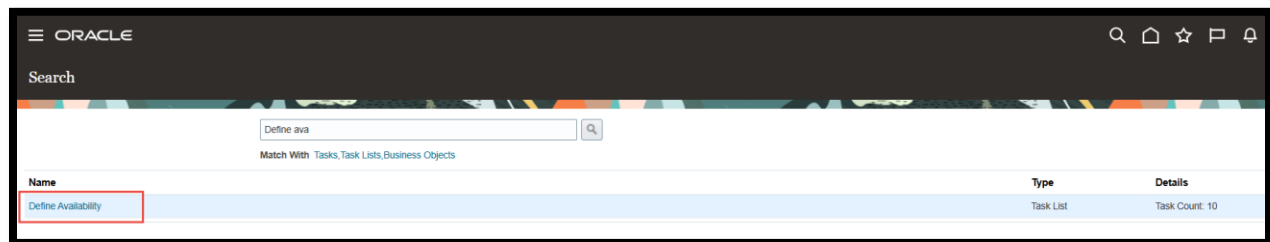

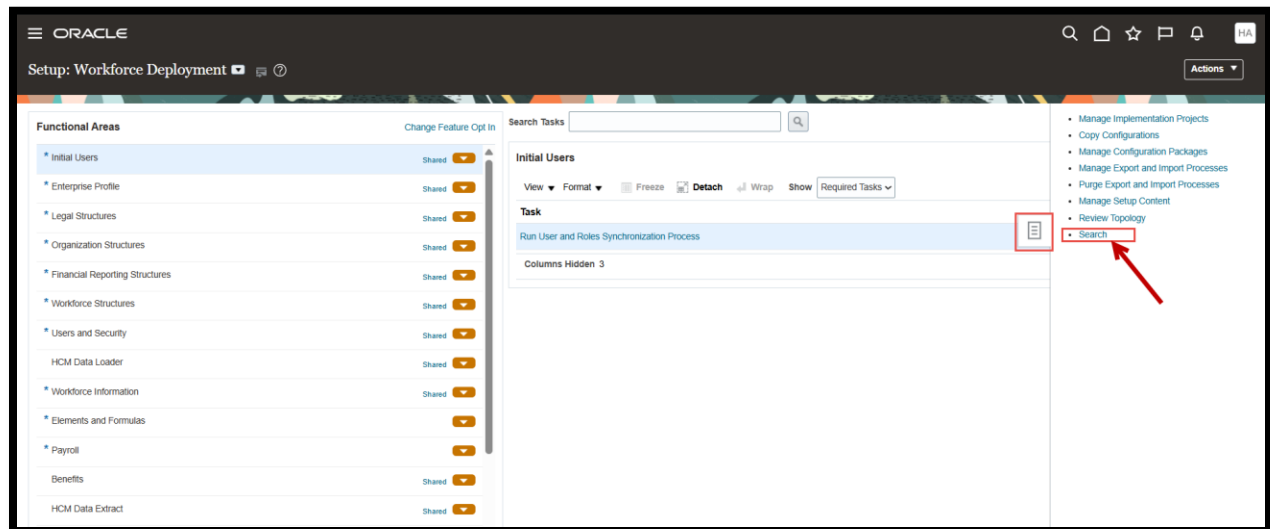

- Then click on create
 - You should type the same name in the previews lookup code (AM_CLOCK) and add () in & Out as below
 - AM_CLOCK_IN
 - AM_CLOCK_OUT
- Then save and close

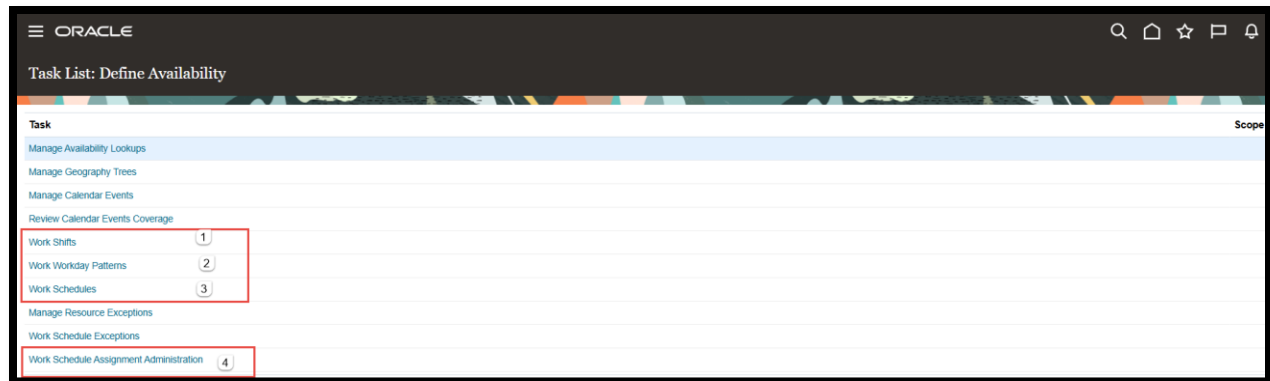

This screenshot shows the same 'Manage Common Lookups' interface, but with new entries added to the 'ORA_HWM_TCD_SUPPLIER_EVENTS: Lookup Codes' table. The 'AM_CLOCK_OUT' and 'AM_CLOCK_IN' entries are now visible. A red arrow points to the 'Save and Close' button in the top right corner. Another red arrow points to the 'Add' (+) button in the 'Lookup Codes' table header.

Define The Availability (Shift, Pattern, and work schedule)

First, it is necessary to define the shift, the Work Workday Patterns, and the Work Schedules, and to assign Work Schedules to employees (Work Schedule Assignment Administration).

To create these tasks: setup and maintenance → click on task list → click on search and search for task → define availability

Will setup the below 4 tasks:

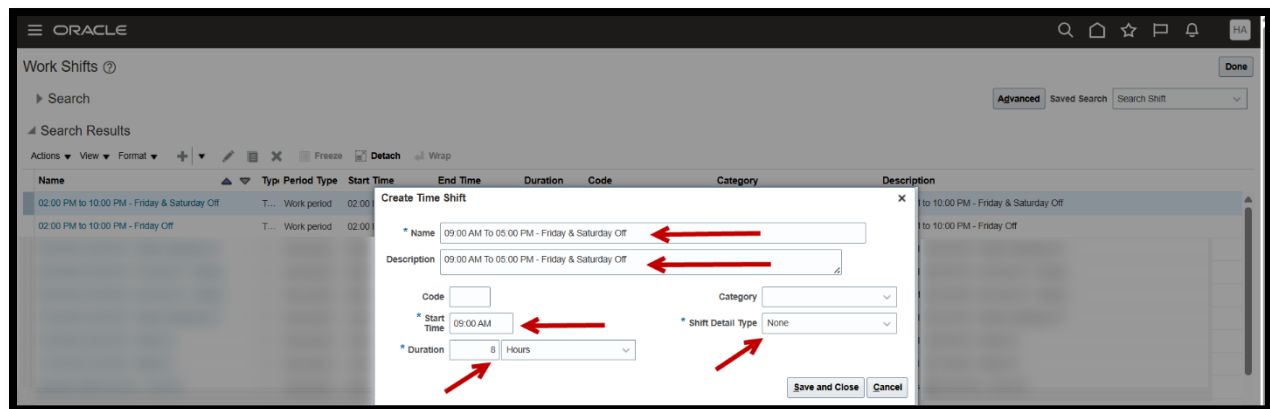

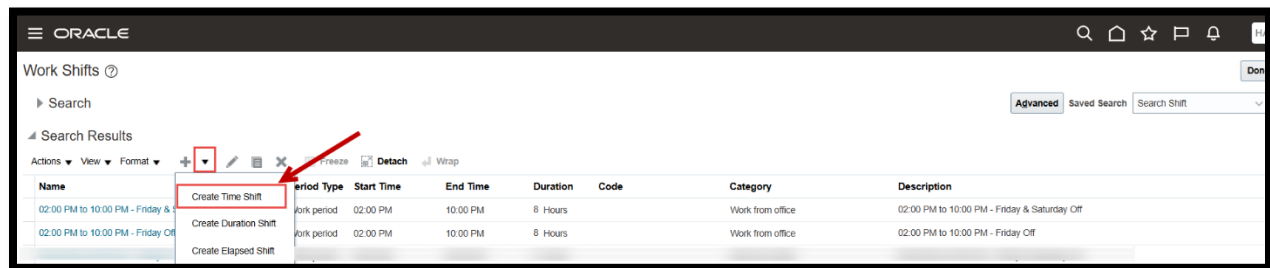

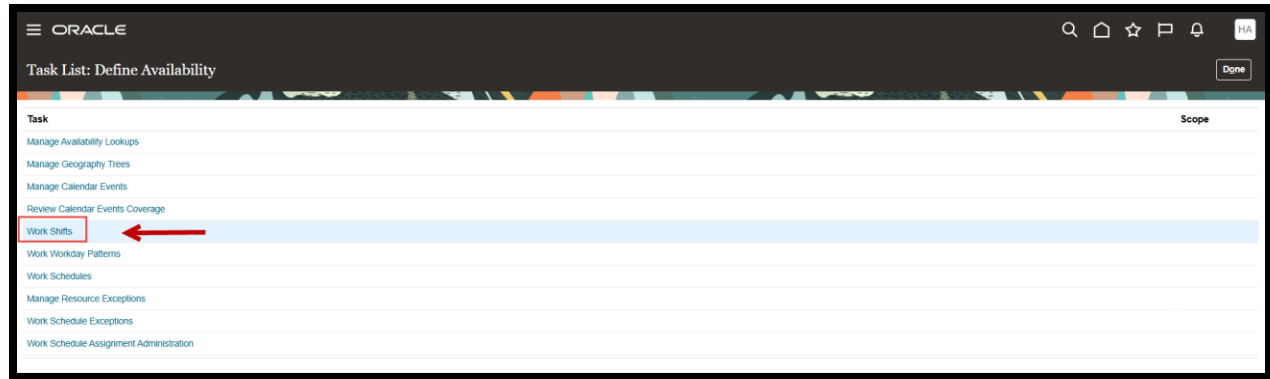

- 1- Work shift
- 2- Work Workday Patterns
- 3- Work Schedules
- 4- Work Schedule Assignment Administration

Create Work Shifts

- In Oracle Cloud Fusion (HCM / Time and Labor), Time Shift, Duration Shift, and Elapsed Shift are different ways to define how working time is captured and calculated.
 - **Time Shift** (Clock-based shift)
 - A shift defined by fixed start and end times.
 - Shift: 09:00 AM – 05:00 PM
 - **Duration Shift** (Hours-based shift)
 - A shift defined by a fixed number of hours, without specific start/end times.
 - Shift duration: 8 hours
 - **Elapsed Shift** (Schedule-based elapsed time)
 - A shift where total elapsed time between start and end is considered, often ignoring breaks automatically
 - Shift: 08:00 – 04:00
 - Break rule: 1 hour auto break
 - Elapsed time = 8 hours
 - Payable time = 7 hours
- **Will create (time) shift type**

Ahmed Morsi

ORACLE OTL OVERTIME AND SHORTAGE CALCULATION AND INTEGRATION WITH PAYROLL SETUP STEPS

The screenshot shows the 'Create Time Workday Pattern' dialog box in the Oracle Workday Patterns interface. The dialog box has several fields and sections:

- Name:** 09:00 AM to 05:00 PM - Friday & Saturday Off (1)
- Description:** 09:00 AM to 05:00 PM - Friday & Saturday Off
- Length in Days:** 7 (2) - Annotation: "how many days in a week"
- Workday Pattern Details:**
 - Start Day:** 1
 - End Day:** 5 (3) - Annotation: "describe the working days in this week from first day till fifth day this days is working days and the rest of 7 will be off days"
 - Shift Type:** 09:00 AM
 - Shift Period Type:** Time
 - Shift Category:** Work from office
- Annotations:**
 - Annotation (4) points to the 'Save and Close' button: "select the shift name was created in previews task"

The background shows a table of existing workday patterns:

Name	Type	Length in Days	Description
02:00 PM to 10:00 PM - Friday & Saturday...	Time	7	02:00 PM to 10:00 PM - Friday & Saturday Off
02:00 PM to 10:00 PM - Friday Off	Time	7	02:00 PM to 10:00 PM - Friday Off

Create Work Schedules

The screenshot shows the 'Task List: Define Availability' page in the Oracle interface. The page lists various tasks related to availability management. The 'Work Schedules' task is highlighted with a red box and a red arrow pointing to it.

* What is the latest entry date for this element? Last Standard Earning Date

4 Standard Rules

At which employment level should this element be attached?

☒ Assignment level

☐ Payroll relationship level

☐ Term Level

What should happen when there are insufficient funds to cover the deductions? If you enable arrears, a reference is required for each deduction entry.

☒ Do not take a partial deduction or create arrears

☐ Do not take partial deduction, place all in arrears

☐ Take a partial deduction, but do not create arrears

☐ Take a partial deduction, place remaining in arrears

Does this element recur each payroll period, or does it require explicit entry?

☒ Nonrecurring

☐ Recurring

Process the element only once in each payroll period?

☒ No

☐ Yes

Can a person have more than one entry of this element in a payroll period?

☒ No

☐ Yes

Web Clock and Time Collection Device Integration Options

☐ Allow edits to times generated from device events

☐ Enable geolocation for Web Clock

if this setup to integrate with time attendance machine, un check all so the worker can't edit on his time card
