Why are we here?

Received 25c but not sure how to setup Security for AI Studio?

The problem is that you can't use AI Agent Studio because you don't have access to it.

Tools: AI Agent Studio

Before

Our goal is to grant the access

You can use AI Agent Studio, but there are problems when you try to test how the agent works.

Before

We want to give the access needed so the agent can run properly

Before we start...

- Set Profile Option to prepare the Security Console to work with permission groups and related objects.
- Click Navigator > My Enterprise > Setup and Maintenance.
 - Expand the Tasks panel tab and click Search.
 - In the Search Tasks field, enter Manage Administrator Profile Values. Click the Search icon.
 - In the list returned by the search, click the Manage Administrator Profile Values item.
 - The Search area of the Manage Administrator Profile Values page includes a Profile Option Code field. In it, enter **ORA_ASE_SAS_INTEGRATION_ENABLED**. Click the Search button.
 - A record of the **ORA_ASE_SAS_INTEGRATION_ENABLED** profile value appears. In the row for the Site profile level, select Yes in the Profile Value field.
 - Click Save and Close.

Please run following batch jobs in sequential fashion.

Import Resource Application Security Data - Import resources from LDAP and store in Applications Security tables.

Import User and Role Application Security Data - The process copies users, roles, privileges, and data security policies from the LDAP directory, policy store, and Applications Core Grants schema to Oracle Fusion Applications Security tables. Having this information in the Oracle Fusion Applications Security tables makes the assisted search feature of the Security Console fast and reliable.

Creating AI Agent Admin Role for HCM

To set things up simply, here's what you need to do in the **Role Hierarchy** section:

Go to the **Roles and Privileges** tab

+ Click **Add Role**

Add the **Manage HCM Intelligent Agent** duty role

- Code: `ORA_HRC_HCM_AI_AGENT_MANAGEMENT_DUTY`

Then, switch to the **Roles and Permission Groups** tab

Connect your custom role with this one:

- **Fai Genai Agent HCM Administrator** duty role
- Code: `ORA_DR_FAI_GENERATIVE_AI_AGENT_HCM_ADMINISTRATOR_DUTY`

This helps make sure your custom role has the right permissions to work with the AI agent.

Creating AI Agent Explorer Role

Please note: The Agent Explorer Role from the demo doesn't let users see all deployed agents. They will only see the agents they're allowed to access, which is usually managed at the agent team level.

Tools > AI Agent Studio > Agent
Teams > Settings Tab for the Agent
Team

The screenshot shows the 'Security' tab of the AI Agent Studio settings. At the top, there are tabs for 'Details', 'LLM', 'Questions', and 'Security'. Below the tabs is a '+ Add' button. The main form contains three fields: 'Role' (highlighted with a red box and labeled 'Required'), 'Code', and 'Description'. At the bottom right, there are 'Cancel' and 'Apply' buttons.
