

AUTOMATING SUPPLIER CREATION IN ORACLE FUSION USING REST API & POSTMAN – STEP-BY-STEP GUIDE

Document is prepared on Oracle Fusion 25B Release

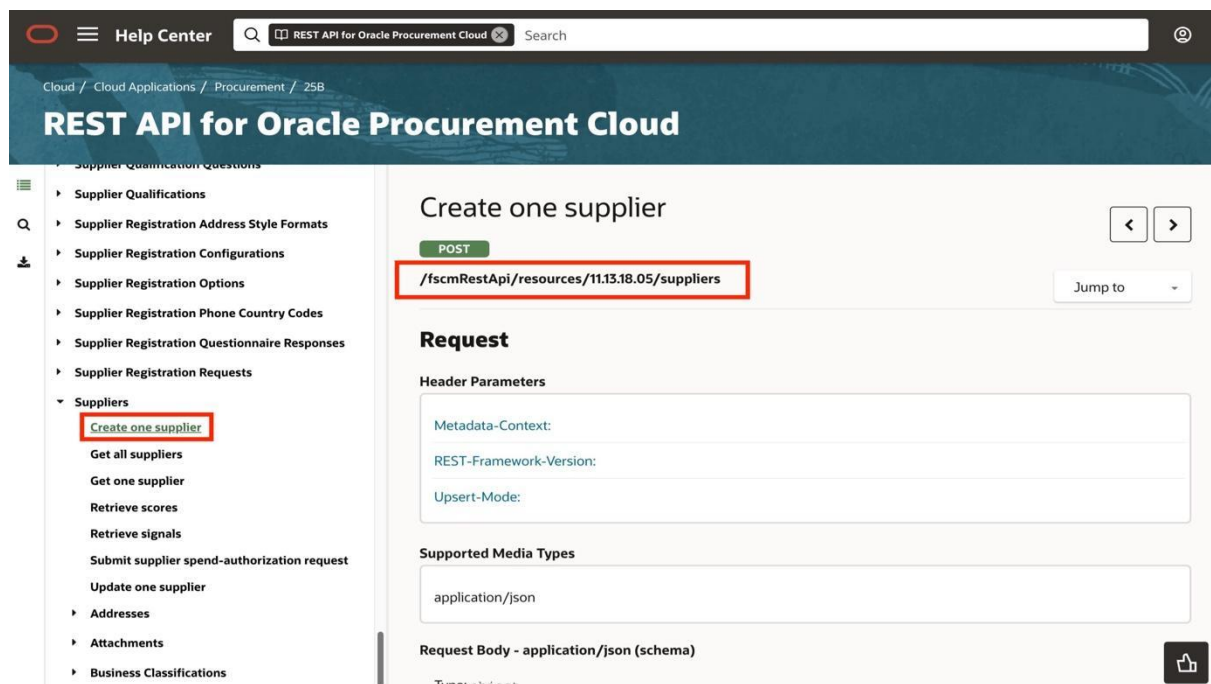

Following are the steps to be followed:

1. Open Oracle help center (i.e. Oracle docs) link - [REST API for Oracle Fusion Cloud Procurement](#)

Navigation: docs.oracle.com > Procurement > Integrate > Review REST API services > Suppliers

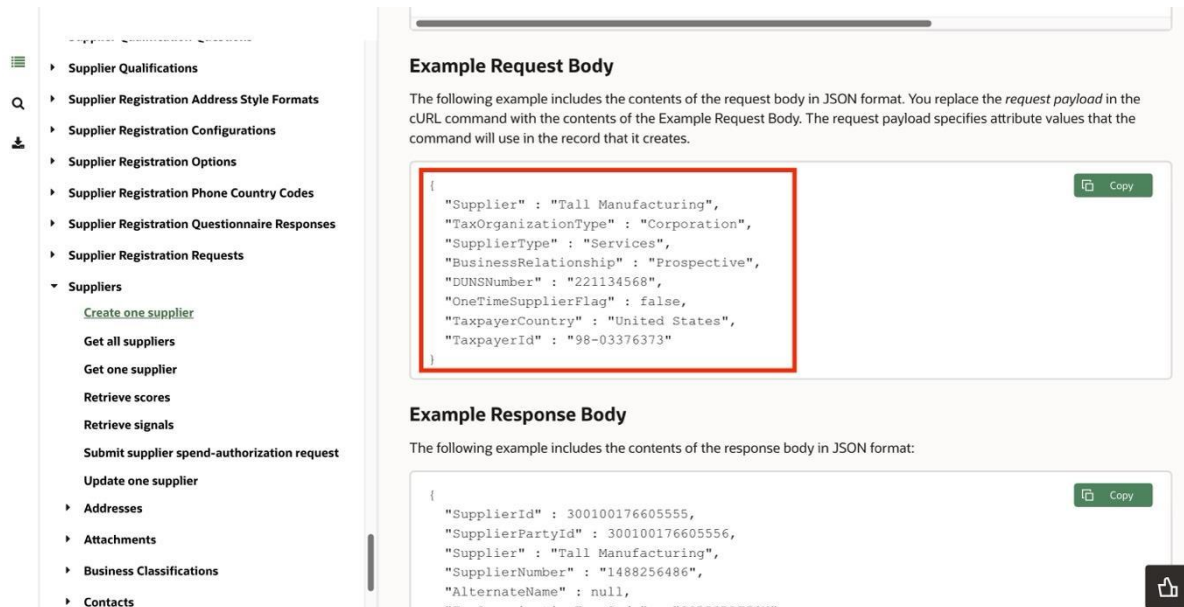

Create One Supplier

This screenshot is from the official Oracle Help Center and illustrates the documentation for the "Create one supplier" REST API within the Oracle Procurement Cloud module.

2. Simplify supplier creation with Oracle Procurement REST API, Fast-track your integration with real-world examples for seamless deployment.

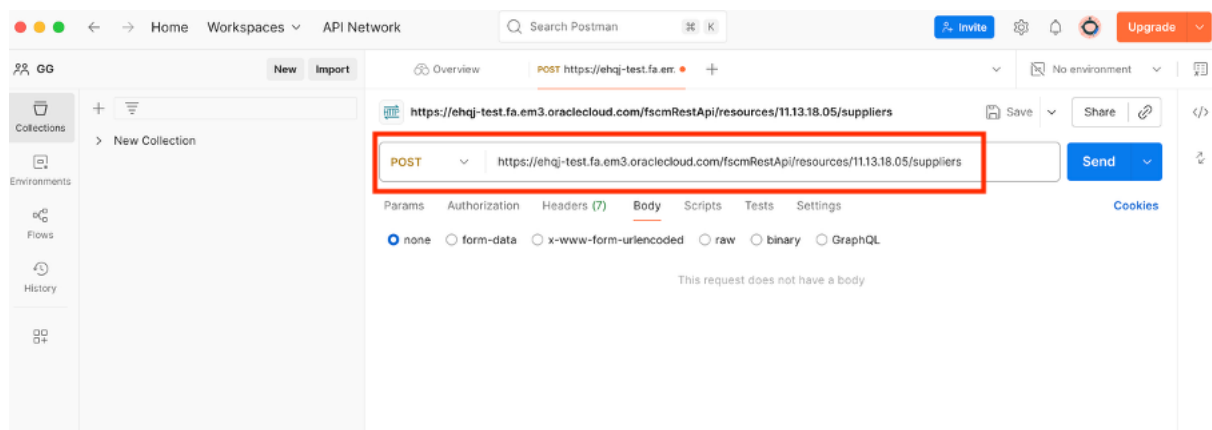

The screenshot below illustrates a sample JSON payload used in Postman to create a supplier in Oracle Fusion.

3. Combine the instance URL with the API path to construct the complete REST API endpoint in Oracle Fusion.

- Open Postman Join the instance URL and API path to build the full Oracle Fusion REST API endpoint.
- Instance URL : <https://ehqj-test.fa.em3.oraclecloud.com>
- API Path : /fscmRestApi/resources/11.13.18.05/suppliers
- Updated Link : <https://ehqj-test.fa.em3.oraclecloud.com/fscmRestApi/resources/11.13.18.05/suppliers>

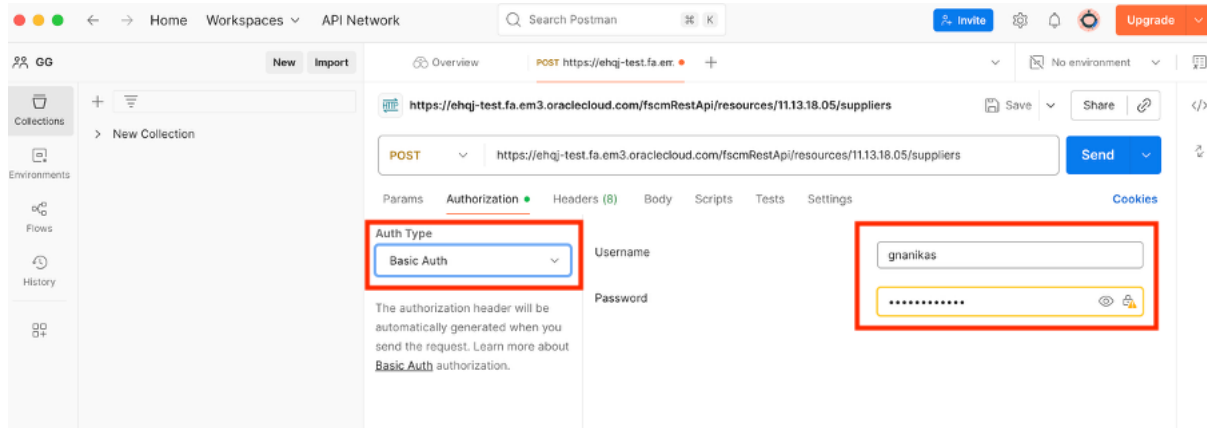

} Instance URL + API Path

4. Authentication setup in Postman

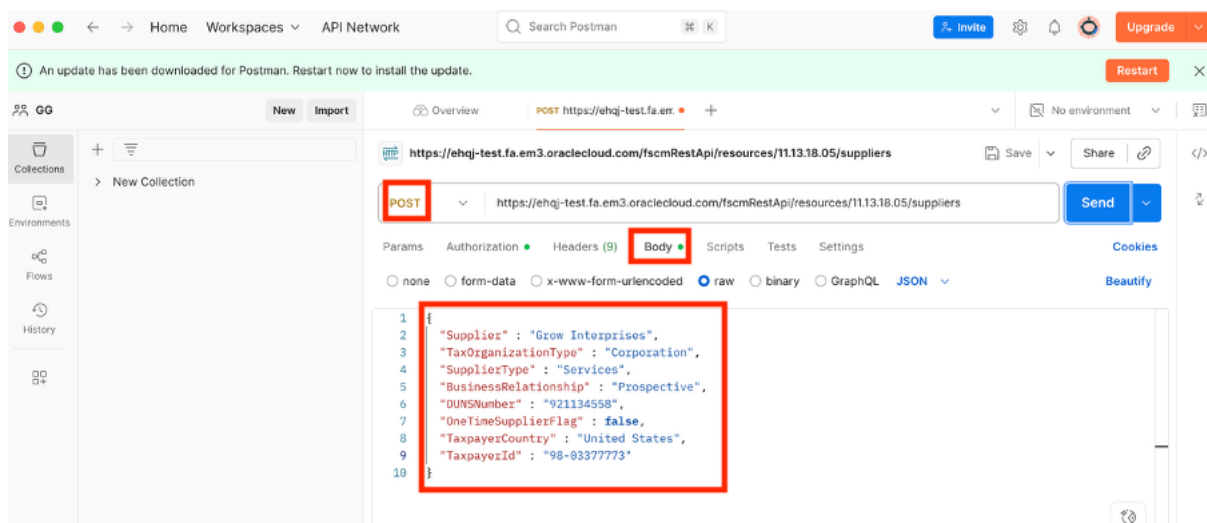

Authorization is crucial for API access. To authenticate securely, configure 'Basic Auth' in Postman by entering your Oracle Fusion username and password before sending requests to Oracle ERP Cloud

- In Postman, navigate to the Authorization tab.
- Select Basic Auth and enter your Oracle Fusion username and password.
- This securely authenticates your request before interacting with the Oracle ERP Cloud.

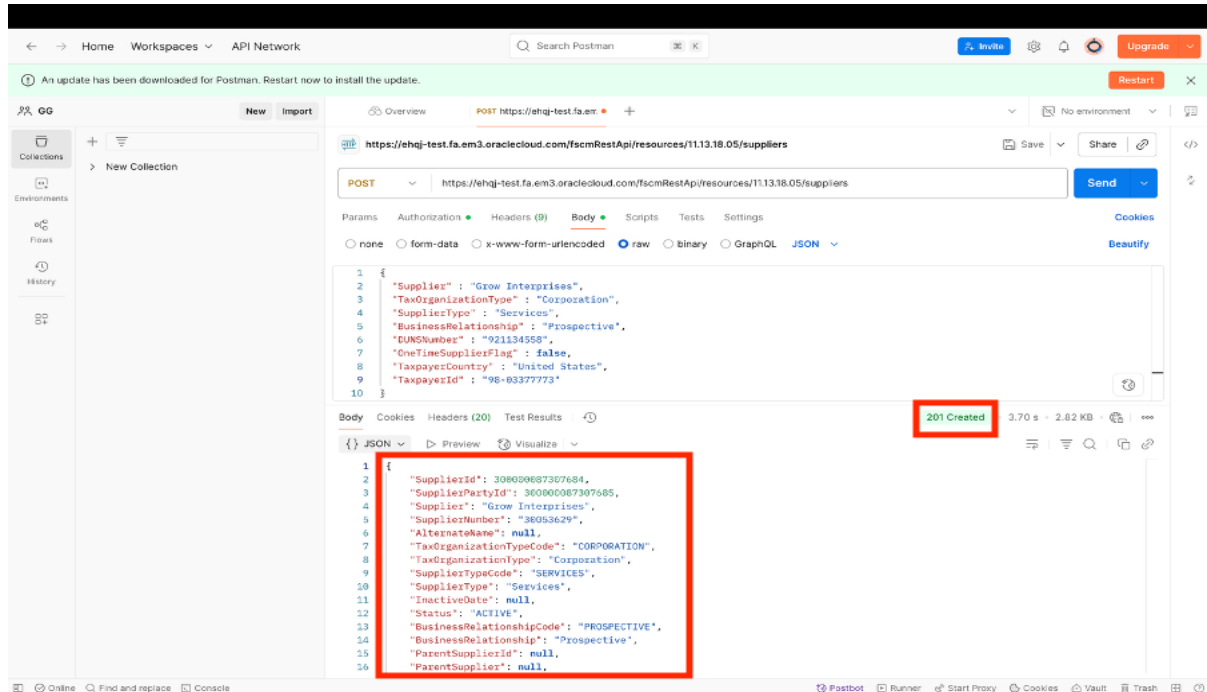

5. Sample JSON Payload for Supplier Creation

- To create a supplier in Oracle Fusion, use a POST request in Postman with a properly structured JSON payload.
- The payload should include essential fields such as supplier name, type, country, and tax identification number for automated on boarding.
- Then click on send

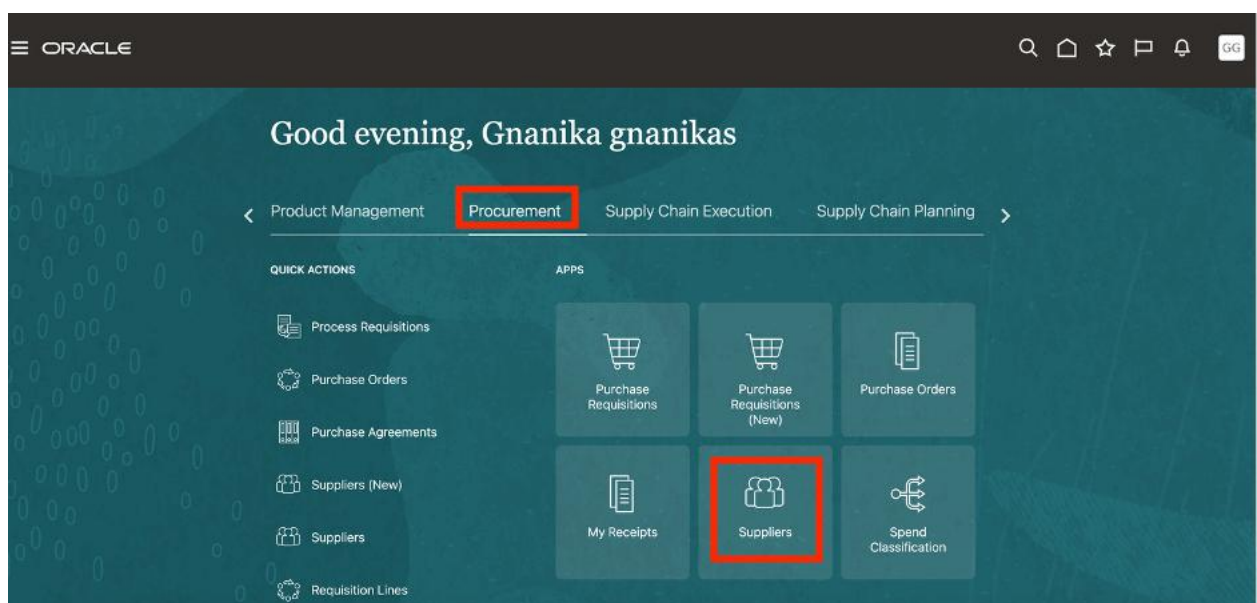

6. POST Response: Supplier Successfully Created

This snapshot displays a successful POST request to Oracle Fusion Cloud, confirming supplier creation with a 201 Created status indicating seamless integration and smooth data flow.

7. Validating Supplier Details in Fusion Application

- Navigate to Oracle Fusion.
- Procurement and then Suppliers

- Navigate to Task Panel
- Then Click on Manage Suppliers
