

Grants Management

Author: Aya Hussein

Overview

Oracle Fusion Grants Management lets you manage the funding that you received from sponsors to execute a project in the form of an award. These projects can either be research or nonresearch projects.

Grants administrators and principal investigators can create awards and sponsored projects in the Awards work area. They can:

- Add one or more projects to an award and use these award projects to manage the award.
- Create award budgets to plan and manage the financial performance of award projects.
- Capture and process award costs, send invoices to sponsors, and recognize revenue.
-

Here are some organizations that receive funding from sponsors (the federal and nonfederal organizations) to execute sponsored projects:

- Higher education organizations, such as universities and colleges
- State and local government organizations
- Nonprofit organizations
- Healthcare organizations
-

You can track the funds explicitly, bill, and report on the funding source. Also, you must comply with the terms and conditions and get fiscal mandates of the funding agreement.

When grants administrators or principal investigators receive a grant, they can create awards to manage the funding that they received in the grant.

Grants department administrators, who are granted access to one or more organizations, can create, view, and edit only those awards that belong to their organization.

Roles- based access control in grants management:

- Grants accountant
- Grants administrator
- Grants Department Administrator
- Principal investigator

Step 1: Create awards

From Grants Management, open "Awards". This provides access to all awards functions.

You can create an award using one of these options in the Awards work area:

- The **Quick Create Award** task in the **Actions** panel tab.
- The **Create** icon on the Manage Awards page.
- The **Create Award from Template** button on the Manage Awards page.
-

When you create an award, you must define these details:

- Basic award details
- Project details
- Funding details (includes budget details)

The basic award details include the business unit, legal entity, contract type, primary sponsor, principal investigator, and award date range.

If you create an award using the **Quick Create Award** task or the **Create Award from Template** button, the award details, such as keywords, references, attachments, funding sources, organization credits, certifications, terms and conditions, personnel, ALN, and award descriptive flexfields are copied from the template. These award details are automatically copied from the award template.

Note

When you create an award, a contract is automatically created in Enterprise Contracts. To create a contract, you must be defined as a user in Customer Relationship Management who has the Contract Administrator resource role in the same business unit as the contract.

Step 4: Award burdening

Enable or disable burdening for internal funding sources, even if the award, award project, or funding source is budgeted or has transactions. If an award project is enabled for burdening, you can specify whether you want to apply burden costs to raw costs for internal funding sources

Step 5: Award Performance

Grants administrators and principal investigators can review information about awards and award projects on the Manage Awards page.

They can review awards and award projects that are overspending or underspending and their respective financial information, such as budget amount, committed cost, and actual cost.

You can review important dates such as projects ending within the next seven days.

Review the awards on the Manage Awards page to determine the number of active awards and their projects. Determine how many projects are overspending or underspending.
