

Fixed Assets

Assets which are purchased for long-term use and are not likely to be converted quickly into cash, such as land, buildings, and equipment

1. Fixed assets is a sub ledger Application
2. This works at ledger level

Types of Key Flex Fields (KFF)

1. Asset Category KFF
2. Asset Location KFF
3. Asset Key KFF

Types of Books

1. Corporate Books
2. Tax Books

Roles to be assign for FA

1. Asset Accounting Manager
 2. Asset Administrator
 3. Asset Accountant
 4. GL Accountant
 5. GL Accountant Manager
- } Assign Ap Roles for reviewing purpose

Types of Assets In FA

1. Capitalize Assets
2. Expenses Assets
3. CIP Assets (Construction work In progress)
4. Group Assets

Setups

1. Manage Fixed Assets Flex field Value Sets
 - a. Category (Major, Minor)
 - b. Location
 - c. Asset Key
 2. Manage Fixed Assets Key Flex field Structure
 - a. Category
-

- b. Location
 - c. Asset Key
- 3. Manage Key Flex field Structure Instance
 - a. Category
 - b. Location
 - c. Asset Key
- 4. Create Segment Values for Category , Location and Asset Key KFF Segment
- 5. Deploy Flex fields
- 6. Manage System Controls
- 7. Manage Fiscal Year Calendar
- 8. Manage Asset (Depreciation) Calendar
- 9. Manage Prorate Convention
- 10. Manage Asset Books (Corporate and Tax)
- 11. Manage Asset Categories
- 12. Manage Asset Location
- 13. Manage Asset Keys (Optional)
- 14. Manage Depreciation method (Optional)
- 15. Manage Asset Distribution Sets
- 16. Manage Prorate Calendar

In FA we have one structure and structure instances that is used to all in the Global Organization, Oracle facilitate only one structure for each Key Flex field

1. Manage Fixed Assets Flex field Value Sets

1. Category Flex field (major and minor)

We will categories the assets based up on asset nature; we can create minimum 1 and maximum 7

Create value set (Major)

- Go to Setup & Maintenance
- Setup : Financials
- Functional are : Fixed Assets
- Task : %Manage% fixed% value%
- Select Manage Fixed Assets Flex fields Value Sets
- Oracle never Provide seeded value sets in FA, In vision version we have but we will not have in real time
- Click on + to create value sets

→ Give the details and save

→ Save and close

Create value set (Minor)

- Go to Setup & Maintenance
- Setup : Financials
- Functional are : Fixed Assets
- Task : %Mana*ge% fixed% value%
- Select Manage Fixed Assets Flex fields Value Sets
- Click on + to create value set
- Give the details and Validation type should be dependent (if you give the dependent value here below one box will appear in that give the dependent value)

→ Save and close

2. Location Flex field

Here location value sets will define as per client for example Country, State, City and Building.

Create value set (Country)

- Go to Setup & Maintenance
- Setup : Financials
- Functional are : Fixed Assets
- Task : %Manage% fixed% value%
- Select Manage Fixed Assets Flex fields Value Sets
- Click on + to create values sets
- Give the details of value sets

The screenshot shows the Oracle 'Create Value Set' form. The 'Value Set Code' is 'CELLO_COUNTRY', 'Description' is 'CELLO COUNTRY', 'Module' is 'Assets', 'Validation Type' is 'Independent', and 'Value Data Type' is 'Character'. The 'Definition' section shows 'Value Subtype' as 'Text', 'Maximum Length' as '20', and 'Minimum Value' and 'Maximum Value' fields. The 'Save and Close' button is highlighted with a red box.

- Save and close

Create value set (State)

- Go to Setup & Maintenance
- Setup : Financials
- Functional are : Fixed Assets
- Task : %Manage% fixed% value%
- Select Manage Fixed Assets Flex fields Value Sets
- Click on + to create values sets
- Give the details of value sets

The screenshot shows the Oracle 'Create Value Set' form for 'State'. The 'Value Set Code' is 'CELLO_STATE', 'Description' is 'CELLO STATE', 'Module' is 'Assets', 'Validation Type' is 'Independent', and 'Value Data Type' is 'Character'. The 'Definition' section shows 'Value Subtype' as 'Text', 'Maximum Length' as '20', and 'Minimum Value' and 'Maximum Value' fields. The 'Save and Close' button is highlighted with a red box.

→ Save and Close

Create value set (City)

- Go to Setup & Maintenance
- Setup : Financials
- Functional are : Fixed Assets
- Task : %Manage% fixed% value%
- Select Manage Fixed Assets Flex fields Value Sets
- Click on + to create values sets
- Give the details of value sets

The screenshot shows the Oracle 'Create Value Set' form. The 'Value Set Code' is 'CELLO_CITY', 'Description' is 'CELLO CITY', 'Module' is 'Assets', 'Validation Type' is 'Independent', and 'Value Data Type' is 'Character'. The 'Definition' section shows 'Value Subtype' as 'Text', 'Maximum Length' as '20', and 'Minimum Value' and 'Maximum Value' fields. The 'Save and Close' button is highlighted in red.

→ Save and close

Create value set (Building)

- Go to Setup & Maintenance
- Setup : Financials
- Functional are : Fixed Assets
- Task : %Manage% fixed% value%
- Select Manage Fixed Assets Flex fields Value Sets
- Click on + to create values sets
- Give the details of value sets

The screenshot shows the Oracle 'Create Value Set' form. The 'Value Set Code' is 'CELLO_BUILDING', 'Description' is 'CELLO BUILDING', 'Module' is 'Assets', 'Validation Type' is 'Independent', and 'Value Data Type' is 'Character'. The 'Definition' section shows 'Value Subtype' as 'Text', 'Maximum Length' as '20', and 'Minimum Value' and 'Maximum Value' fields. The 'Save and Close' button is highlighted in red.

→ Save and close

3. Key Flex field

It is not mandatory but will do at least one, Max 10 segment and Min 1 segment

Create value set

- Go to Setup & Maintenance
- Setup : Financials
- Functional are : Fixed Assets
- Task : %Manage% fixed% value%
- Select Manage Fixed Assets Flex fields Value Sets
- Click on + to create values sets
- Give the details of value sets

ORACLE FAST-STUDENT1

2018	1/1/18	12/31/18	

Buttons: Save, Save and Close, Cancel

→ Save and Close

8. Manage Asset (Depreciation) Calendar

The depreciation calendar determines the number of ACCOUNTING periods in a fiscal year i.e. how many times depreciation will need to be run. You can use one depreciation calendar for multiple depreciation books and as both the depreciation and prorate calendar for a book. When we are creating depreciation calendar this naming convention should be same as GL Fiscal year calendar naming convention means both naming should be same. We never keep the adjustment month in the fixed assets. You can use this calendar for single corporate book or N number of corporate book for single country or N number of countries

We can define the asset

1. Daily wise
2. Weekly wise
3. Half Monthly
4. Monthly
5. Quarterly
6. Half yearly
7. Yearly

GL Fiscal Year calendar

9. Manage Prorate Convention (Calendar)

The **prorate calendar** determines the number of PRORATE periods in your fiscal year. It is use full for depreciation and it is associate with Depreciation Calendar.

- Go to Setup & Maintenance
- Setup : Financials
- Functional are : Fixed Assets
- Task : %Manage% prorate% conventions%
- Select Manage Prorate Conventions
- Give the details
- Click on + icon to create prorate calendar dates

- If you want to create depreciation for assets for deferent methods like daily , monthly, quarterly then you have to crate different prorate calendars

Create Prorate Convention

Name: Celo Pro
Description: Celo Prorate calendar
Reference Data Set: Common Set

Prorate Dates

Start Date	End Date	Prorate Date
12/1/20	12/31/20	12/31/20
11/1/20	11/30/20	11/30/20
10/1/20	10/31/20	10/31/20
9/1/20	9/30/20	9/30/20
8/1/20	8/31/20	8/31/20
7/1/20	7/31/20	7/31/20
6/1/20	6/30/20	6/30/20

- Go to Setup & Maintenance
- Setup : Financials
- Functional are : Fixed Assets
- Task : %Manage% asset% distribution%
- Select Manage Distribution Sets
- Click on + icon to create
- Give the distribution set details

Asset Creation Process

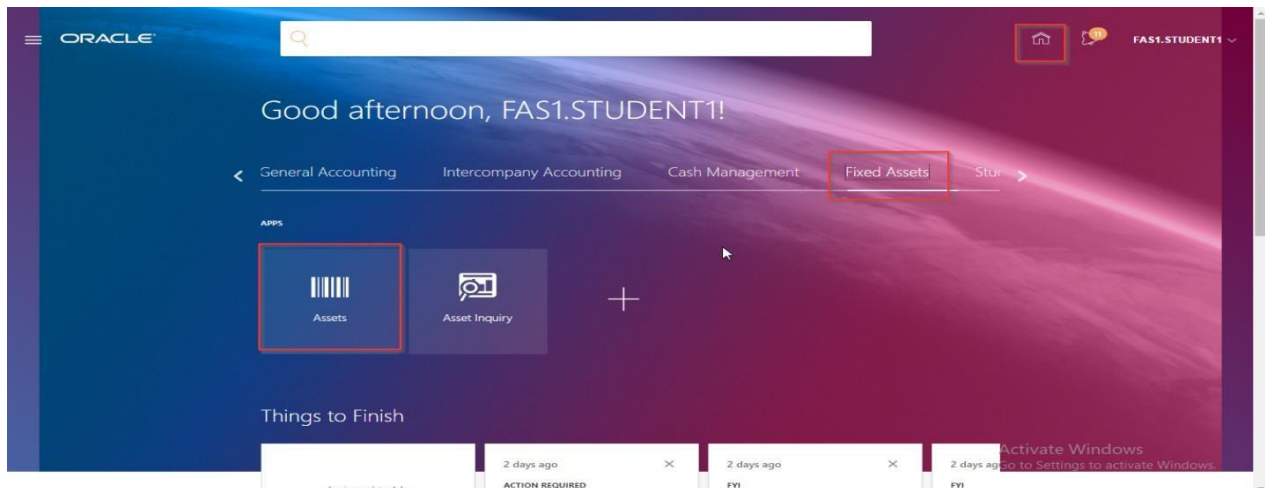

We can create assets in different ways

1. Mass addition (Po and Non Po based invoice)
2. Additions in FA
3. Spread Sheet or ADFDI process

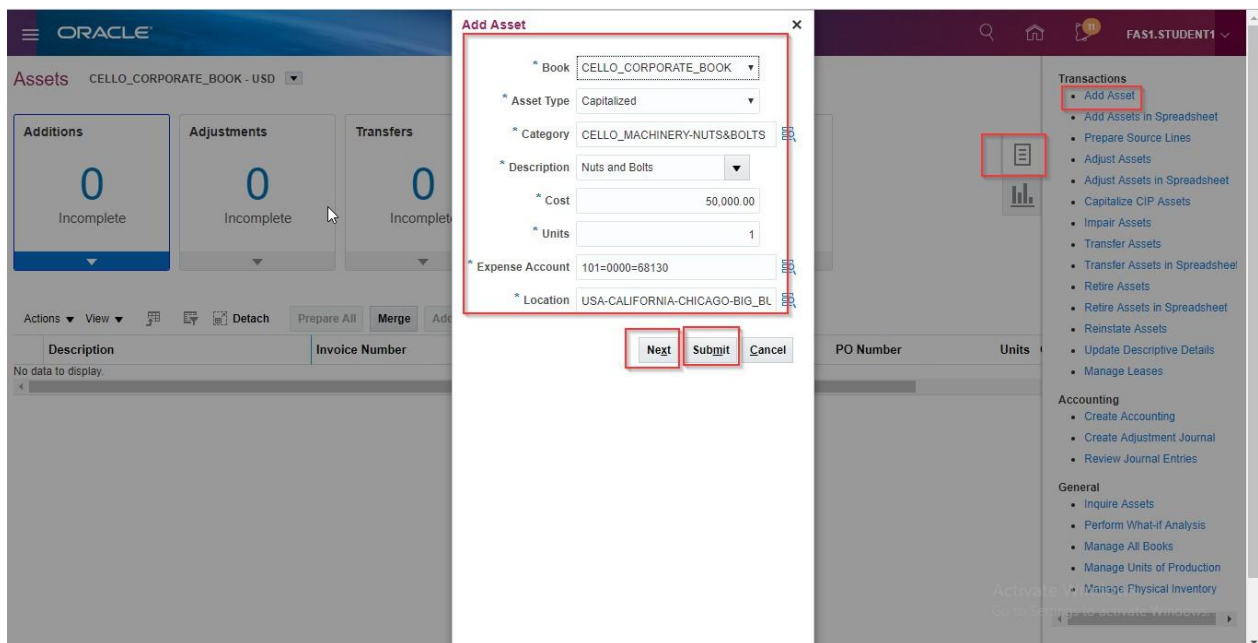

1. Manual Addition (Without Invoice)

In EBS quick and Additions but hear not like that you can do in the same in one page if you want to do the quick or addition you can do

- Go to Home
- Click on Fixed assets
- Click on Assets

- Click on Task list and click on Add the asset
- Give the details like Asset type , Category (select the Major and Minor), Cost, Units, Location and Expenses account (It is default from Asset category)

- If you click the Next Button that is equal to additions means and system will allow to give the additional information
- If you click the Submit Button that is equal to Quick additions and system create the asset

- Click on Submit

Inquire the assets

- Go to Home
- Click on Fixed assets
- Click on Inquire Assets
- Query with asset category or any one of mandatory field
- Now you can see the asset details and that assets is under which book

- In inquire mode we can't edit just we will see
- Close the page

2. Asset creation using spreadsheet/ ADFDI

ADFDI (Application desktop Framework Development Integration)

- Go to Home
- Click on Fixed assets
- Click on Assets
- Click on Task list
- Click on Add asset in
- Give the book and Asset type details

- Click on Go Spread sheet will downloaded
- Open that sheet and give your login credentials
- Give the details like name, depreciation account, clearing account ,Depreciation is yes or no
- Submit the data
- After that we have to check these in the info let
- Click on incomplete then asset will show down

3. Mass Addition process

Have to create asset invoice in the AP that will interface to FA as an asset then prepare with mass addition then will do the asset transfer

1. In EBS we have Quick addition & Additions
2. In Fusion directly we have additions only

Po Based Mass addition Process (3 Way)

Asset item machinery → Requisition → Request for Quotation (RFQ) → Quotation → Quality Analyst
→ Purchase Order → Goods Receipt Number (GRN) → Invoice → Mass Addition → Prepare Mass
Addition → Post Mass Addition → Asset Installed and ready to use

Accounting entries

Capitalized assets

Till to GRN → No entries

Invoice → Asset clearing DR

Supplier liability CR

Mass Addition → Asset Cost DR

Asset Clearing CR

Expenses Assets

Till Po → No entries

GRN → Asset Clearing DR

Expenses AP Accrual CR

Invoice → Expenses AP Accrual DR

Supplier liability CR

Mass Addition → Asset Cost DR

Asset Clearing CR

Non Po Based Mass addition Process

Create standard invoice in AP

- Go to Home Page
 - Click on Accounts Payable
 - Select the Invoice
 - Go to Task list
 - Click on create Invoice
 - Give the Header and line(non po invoice) details account is asset clearing account
 - How the system will identify this invoice related to Asset (Based on Distribution sets in this set if you give the Asset clearing account then system automatically identify this is related to assets)
-

Fiscal Year 2019

Open Period May-19

→ Change the status and give the needed information then Save and close

→ Then post the lines

Multiple invoices with one line

- Go to Home
- Go to payables
- Go to invoices
- Click on Task list
- Click on Create invoice
- Give the header information and give the line information like this give the two or more invoices
- Then Click on Create Mass additions
- Go to Home page
- Click on Assets
- In the Info let you can see the incomplete invoice in additions
- Click on Incomplete invoice then below lines will show select one line click on merge
- Do the same as above
- Go and query the assets you can find the merged invoices

Split the Asset/Lines

Split is nothing but split the one line into multiple lines

- Go to Home page and Click on Payable then Go to Invoice
- Task list click on create invoice
- Validate it and account it (Then only mass addition process will run)

Create Invoice: FASPL1

→ Click on Done

Add to asset (Cost Adjustment)

If you want to add the amount to the existing asset this function will use

1. Create the standard invoice validate and post it
 2. Run Mass addition program
 3. Change the asset cost in fA
- Go to Home Page
 → Go to Fixed Assets
 → Go to Task List
 → Click on Prepare source lines
 → Query the Assets
 → Select the invoice, go to actions and click on Add to Asset then query the asset which you want to add it

CIP Asset Creation and capitalization

For CIP assets system will not allow us to create depreciation

1. Manage asset category values
2. Create Asset category (CIP cost CIP clearing cost accounts)
3. Create CIP asset
4. Convert the CIP asset to Capitalized assets

1. Manage asset category values

- Go to Setup & Maintenance
- Setup: Financials
- Functional area: Fixed assets
- Task %manage% assets% values%
- Select Manage Fixed assets Flex field value sets
- Query your COA then select Major values and click on Manage values
- Give the CIP related assets like Buildings, Motors
- Do the same as for Minor values

2. Manage Asset category (CIP cost CIP clearing cost accounts)

- Go to Setup & Maintenance
- Setup: Financials
- Functional area: Fixed assets
- Task %manage% assets% categories%
- Select Manage Asset Categories
- Click on + to build the relation between category and corporate book
- Give the major and minor details then go to the book tab

4. Convert the CIP asset to Capitalized assets

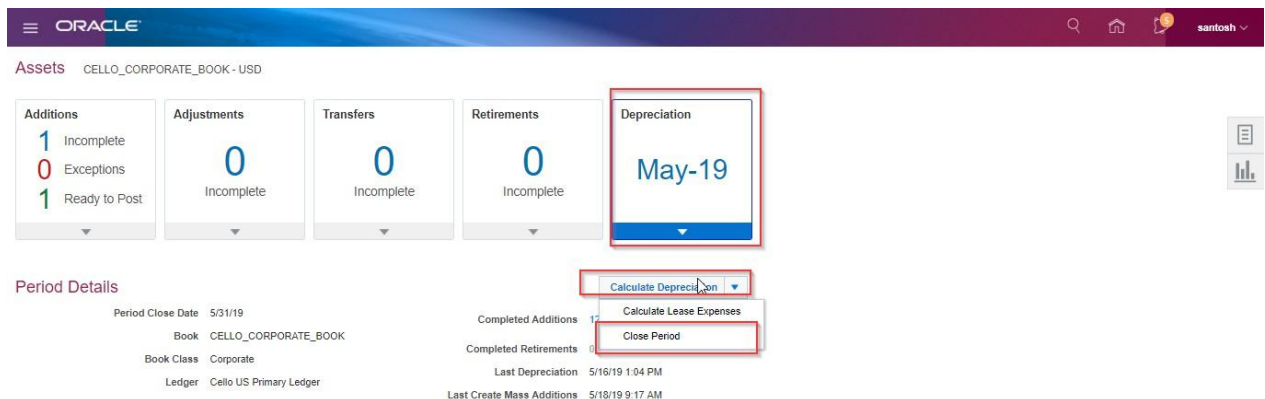

- Go to Home page
- Click on Fixed assets
- Select the Assets
- Click on Task List
- Click on Capitalize CIP assets
- Query the capitalize asset
- Select the asset line and click on capitalize

- Click on Done
- Go to the asset inquiry and query the Capitalized assets then you can find that

Run the Depreciation

- Go to Home page
- Click on Fixed assets
- Select Invoice
- In Info let we have Depreciation box
- Click on the Box you will get the information
- If you click the Calculate depreciation it will be draft mode if you want to final calculation depreciation click on Close period under Calculate Depreciation

- Click on Done

We have another way to calculate depreciation

- Go to Home page
- Click on Fixed assets
- Select Invoice
- Click on task list
- Click on Manage All Books
- Here you can see the all books include tax books

Book	Source	Queue	Preparer	Missing Data	On Hold	Prior Period	Exceptions	Ready to Post	Total

Adjust Assets

From this you can do three things

1. Change financial details (Depreciation, life, method etc...)
2. Transfer source lines (Transfer the amount)

3. Change category (Change the one category to another)

1. Change financial details (Depreciation, life, method etc...)

This was done in Roll back depreciation concept

2. Transfer source lines (Transfer the amount)

- Go to Home page
- Click on Fixed assets
- Click on Assets
- Go to task list
- Click on adjust assets
- Query the asset which you want to transfer the source line item
- Select the line and click on transfer source lines

Asset Number	Description	Category	Asset Type	Asset Key	Tag Number	Serial Number

6/30/19	CELLO_CORPORATE_BO...	Corporate	Cello US Primary Ledger	0	0	5/18/19	

- Then we will get one box In that we have current book period this is nothing but periodic mass copy
- We have two options in EBS also 1. Initial mass copy, 2. Periodic mass copy. In case of periodic mass copy specific all asset related information you can copy. In case of Initial mass copy you can perform throw the schedule job process. (Perform Initial mass copy)
- Go and query the assets in asset work bench with tax book

Roll back Depreciation

When we run the draft mode depreciation this Roll back depreciation will work, we will go and just run the draft mode depreciation for current period and will go and do certain changes to the asset then system has to roll back the depreciation whatever calculates as a part of draft mode

- Go to fixed asset Info let click on depreciation box then details will show click the calculate depreciation means draft mode depreciation
- Go to asset inquiry, query the assets and see the depreciation just for knowing purpose

Asset 112011 Books

- Save it and post it

Asset Transfer

'Asset transfer' is a term used to describe the process of the **transfer** of the ownership (or leasehold) of property or land from one party to another.

Asset transfer in two types

1. Basic Transfer
2. Mass Transfer

I want to transfer the asset

1. One Employee to another Employee (No Impact) for account
2. One Location to another Location (No Impact) for account

3. One Depreciation to New Depreciation account (Huge Impact) for account

Basic Transfer

- Go to Home Page
- Go to Fixed assets
- Click on Assets
- Click on Task list
- Click on Transfer asset
- Query the asset then select the asset
- Click on Transfer Asset

The screenshot shows the Oracle 'Transfer Assets' interface. At the top, there's a 'Search: Assets' bar. Below it, a table lists various assets. The asset '112013' is highlighted, which is an 'Invoice split' for 'CELLO_MACHINERY-NUTSBOLTS'. The 'Transfer Asset' button is visible in the top navigation bar.

- You can transfer the asset from location to location employee to employee and one depreciation to another depreciation

The screenshot shows the 'Transfer Asset: Asset 112013' interface. It includes fields for 'Book' (CELLO_CORPORATE_BOOK), 'Asset Type' (Capitalized), 'Category' (CELLO_MACHINERY-NUTSBOLTS), and 'Open Period' (Jun-19). The 'Transaction Details' section has a 'Comments' field with 'machinery transfer from usa to dubai' and a 'Transfer Date' of 6/1/19. The 'Assignment Details' section shows a table with columns for 'New Units', 'Current Units', 'Employee Name', 'Employee Number', 'Depreciation Expense Account', and 'Location'. The 'Location' field is set to 'DUBAI-CALIFORNIA-MADHINA-BIC'. The 'Depreciation Expense Account' field is set to '101-0000-68130'. The 'Employee Number' field is set to '101-0000-68130'. The 'Total' row shows 2 units and 1 unit.

- Click on submit then asset transfer

Mass Transfer

- Go to Home Page
- Go to Fixed assets
- Click on Assets
- Click on Task list
- Click on Transfer asset
- Go to Mass tab

How to do the Amortized adjustment

If you enable this amortized under the change financial details, when you change the asset cost on that day on words system will calculate the depreciation on that amount, otherwise depreciation will calculate from the date of Service date

- Go to Home page
- Go to Fixed Assets
- Go to Assets
- Go to Go to task list and click on Adjust assets
- Query the assets which you want to change asset cost
- Select the asset and click on Change Financial details
- Enable the amortize option under transaction details

The screenshot shows the 'Change Financial Details: Asset 112004' form. The 'Transaction Details' section has the 'Amortize' checkbox checked. The 'Financial Details' section shows 'Cost' as 50,000.00 and 'In Service Date' as 5/17/19. The 'Depreciation' section shows 'STL' method, 10 years life, and a net book value of 49,166.66.

How to Delete the Asset lines

Asset line can delete before Post the invoice. You can delete after validation also

- Go to Home page
- Go to Fixed Assets
- Go to Assets
- Go to Go to task list and click on Prepare Source lines
- Query with the new status
- Select the line go to actions and click on Edit
- Change the queue status as Delete
- Save and close

- Save and close
- Then Run the Delete mass addition program

Comparison process form FA to GL, AP to GL

1. Run the Depreciation report
2. Run the “Journal Entry Reserve Ledger” (Lists asset depreciation amounts for the specified period. The report is sorted by and group totals for each balancing segment, expense account, reserve account, and cost center). It can be done in period end also. This report depreciation and accumulated depreciation compare with the Depreciation in GL Trial Balance report
3. In AP we have compare with AP Trial Balance (TB)→ GLTB (Compare the AP Liability and Prepayment)
4. In FA we have compare with Journal entry Reserve ledger → GLTB (Compare the Depreciation)

Standard Reports in FA

1. **Asset addition Report** (Lists assets added or capitalized during the specified periods. Sorts and totals by balancing segment, asset type, asset account, cost center, and reserve account)
2. **Asset Balances Register** (Lists initial costs, current activity, and retirements for a range of assets)
3. **Asset category Change Report** (Lists all the assets for which the asset category is changed during the specified period. Sorts and totals by balancing segment, asset account, and asset number)
4. **Asset cost Adjustment Report** (Lists all the asset cost adjustments from the specified periods. Sorts and totals by balancing segment, asset type, asset cost account, and cost center)
5. **Asset Cost Detailed Report** (Lists asset level asset cost account balances. Sorts and totals by balancing segment, asset cost account, and cost center)
6. **Asset Cost and Reserve Report** (Lists the asset cost and depreciation reserve balances at the asset level. Sorts and totals by category, asset type, asset cost account, and cost center)
7. **Asset Cost Summary Report** (Lists asset cost account summary balances for the specified periods. Sorts and totals by balancing segment and asset cost account)
8. **Asset Register** (Prints complete information about an asset for the specified corporate book and for each associated tax book. Sorts by asset number)
9. **Asset Retirement Reports** (Lists asset retirements performed during the specified periods. Sorts and totals by balancing segment, asset type, asset account, and cost center)

10. **Asset Transaction History** (Lists all transactions performed on selected assets. The report is sorted by asset number)
11. **Create Accounting Program** (Creates subledger journal entries for Oracle Fusion Assets. Optionally, post to Oracle Fusion General Ledger)
