How Can I Upload Purchase order in Oracle Fusion Using FBDI?

Oracle Fusion Cloud SCM

By Bilal Abu Al Sabea

LinkedIn: www.linkedin.com/in/bilal-abu-al-sabea-878b89234

Introduction

In Oracle Fusion Procurement, Purchase Orders can be created manually from the Purchasing work area.

However, when the business needs to upload many Purchase Orders at once, especially during data migration, implementation, testing, or integration scenarios, the better approach is to use **FBDI**.

FBDI stands for **File-Based Data Import**.

It allows consultants and business users to prepare data in an Excel template, generate a CSV ZIP file, upload it to Oracle, and run the required scheduled processes to import the Purchase Orders into Oracle Fusion Purchasing.

This document explains the complete process of uploading Purchase Orders using FBDI in Oracle Fusion.

What Is Purchase Orders Import in Oracle Fusion?

Purchase Orders Import is a standard Oracle Fusion Procurement function used to import Purchase Orders from external systems into Oracle Fusion Purchasing.

The Purchase Orders Import includes data such as:

- Purchase Order Headers
- Purchase Order Lines
- Purchase Order Schedules
- Purchase Order Distributions

Oracle provides a dedicated FBDI template for this purpose.

Template name:

POPurchaseOrderImportTemplate.xlsm

UCM account:

prc/purchaseOrder/import

Step 1: Download the Purchase Orders Import Template

First, download the Purchase Order FBDI template from Oracle Procurement FBDI documentation.

<https://docs.oracle.com/en/>

Then download the Excel macro template: POPurchaseOrderImportTemplate.xlsm

By Bilal Abu Al Sabea

LinkedIn: www.linkedin.com/in/bilal-abu-al-sabea-878b89234

Step 2: Prepare Excel Before Using the Template

Because the FBDI template uses macros to generate CSV files, Excel must allow the macro to run.

To configure Excel:

1. Open Excel.

LinkedIn: www.linkedin.com/in/bilal-abu-al-sabea-8263b9234

Oracle Fusion Cloud SCM | FBDI Purchase Order Upload Guide | By Eng. Bilal Abu Al Sabea

How Can I Upload Purchase order in Oracle Fusion Using FBDI?

Oracle Fusion Cloud SCM

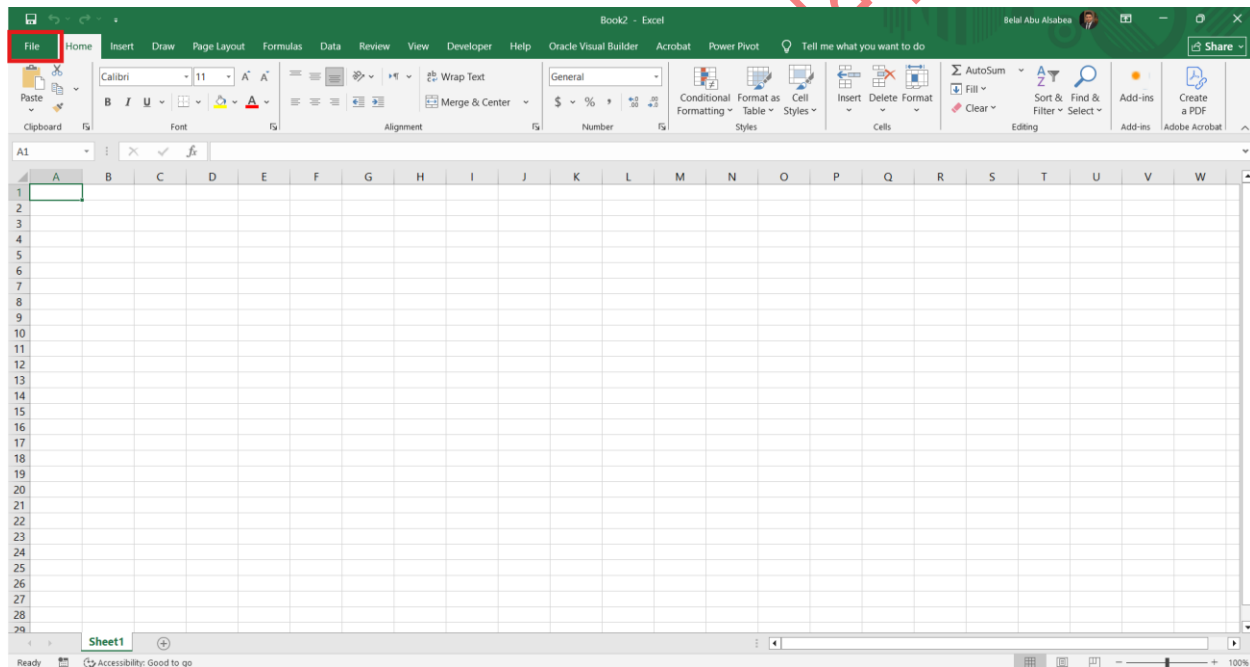

By Bilal Abu Al Sabea

LinkedIn: www.linkedin.com/in/bilal-abu-al-sabea-878b89234

2. Go to File.
3. Select Options.
4. Open Trust Center.
5. Click Trust Center Settings.
6. Go to Macro Settings.
7. Select Disable all macros with notification.
8. Enable Trust access to the VBA project object model.
9. Click OK.

This step is important because if macros are blocked, the Generate CSV function may not work correctly.

How Can I Upload Purchase order in Oracle Fusion Using FBDI?

Oracle Fusion Cloud SCM

By Bilal Abu Al Sabea

LinkedIn: www.linkedin.com/in/bilal-abu-al-sabea-878b89234

Step 3: Open the Purchase Order FBDI Template

After opening the template, you will usually see multiple sheets.

These sheets represent the data structures required for Purchase Order import, such as:

- PO Headers
- PO Lines
- PO Schedules
- PO Distributions

The exact sheet names may vary slightly depending on the Oracle version, but the structure will support the full PO hierarchy.

Important note:

Do not delete columns from the template.

You may hide unused columns if needed, but deleting or reordering columns can cause the import to fail.

Step 4: Enter Purchase Order Data in the Template

Now start entering the required Purchase Order data.

Typically, Purchase Order import requires data at four levels:

A. Header Data

Examples:

- Batch ID
- Interface Header Key
- Procurement BU
- Supplier
- Supplier Site
- Document Type
- Currency
- Buyer

- Bill-to Location
- Ship-to Location
- Terms
- Order Date
- Status

B. Line Data

Examples:

- Interface Line Key
- Line Number
- Item
- Description
- Category
- UOM
- Quantity
- Unit Price
- Line Type

C. Schedule Data

Examples:

- Schedule Number
- Need-by Date
- Quantity
- Ship-to Organization / Location

D. Distribution Data

Examples:

- Distribution Number

LinkedIn: www.linkedin.com/in/bilal-abu-al-sabea-8263b9234

Oracle Fusion Cloud SCM | FBDI Purchase Order Upload Guide | By Eng. Bilal Abu Al Sabea

How Can I Upload Purchase order in Oracle Fusion Using FBDI?

Oracle Fusion Cloud SCM

By Bilal Abu Al Sabea

LinkedIn: www.linkedin.com/in/bilal-abu-al-sabea-878b89234

- Charge Account
- Distribution Quantity
- Project / Cost Center if applicable

Important note:

Each row must be linked correctly through the interface keys so Oracle understands the relationship between the header, line, schedule, and distribution.

Step 5: Important Rules While Updating the Template

While preparing the file, keep the following points in mind:

- Do not delete columns.
- Do not change the column order.
- Use valid setup values that already exist in Oracle.
- Make sure supplier and supplier site are valid.
- Make sure item, category, UOM, and line type are valid.
- Use the correct Procurement BU.
- Use valid charge accounts in distributions.
- Use a numeric and unique Batch ID.
- Make sure the interface keys connect the header, line, schedule, and distribution correctly.
- Use correct date formats.
- Review required fields carefully before generating the CSV file.

9. Step 5: Generate the CSV ZIP File

After entering the required item data, return to the first sheet in the template.

Click:

Generate CSV File

LinkedIn: www.linkedin.com/in/bilal-abu-al-sabea-8263b9234

Oracle Fusion Cloud SCM | FBDI Purchase Order Upload Guide | By Eng. Bilal Abu Al Sabea

How Can I Upload Purchase order in Oracle Fusion Using FBDI?

Oracle Fusion Cloud SCM

By Bilal Abu Al Sabea

LinkedIn: www.linkedin.com/in/bilal-abu-al-sabea-878b89234

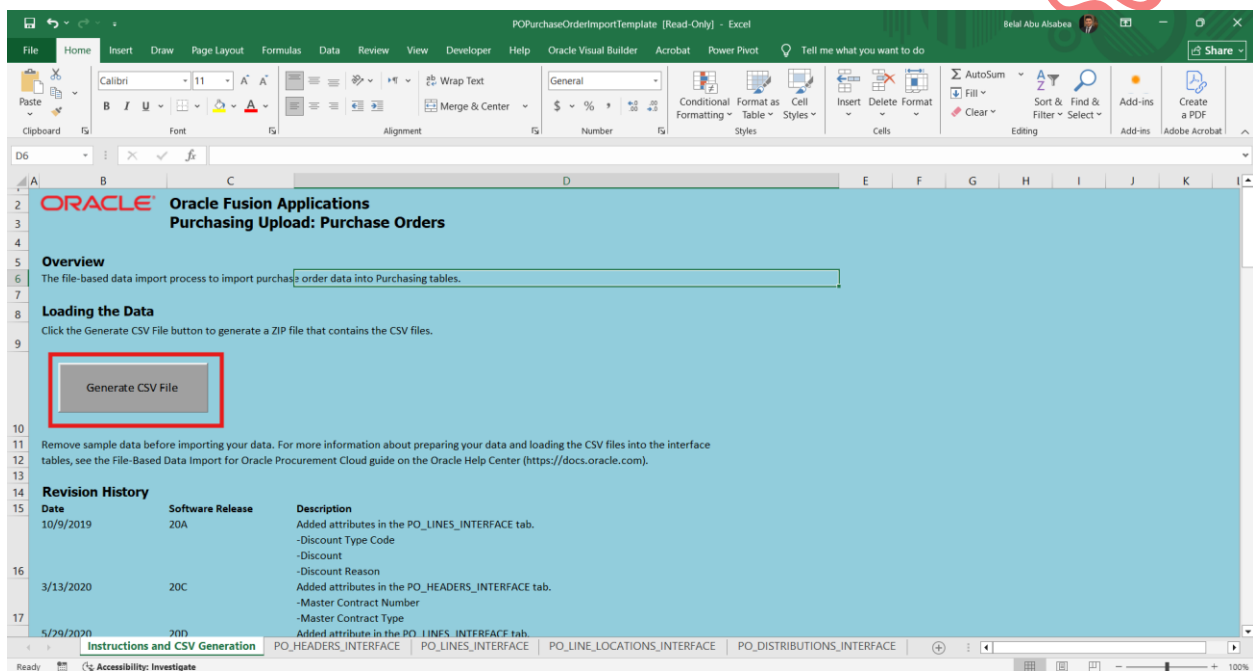

The template will generate a ZIP file that contains the CSV files required for import.

Save the generated ZIP file in a clear location on your computer.

Example file name:

PolimportOrders.zip

This ZIP file will be uploaded to Oracle in the next step.

LinkedIn: www.linkedin.com/in/bilal-abu-al-sabea-8263b9234

Oracle Fusion Cloud SCM

By Bilal Abu Al Sabea

LinkedIn: www.linkedin.com/in/bilal-abu-al-sabea-878b89234

Step 6: Upload the ZIP File to Oracle WebCenter Content

After generating the ZIP file, upload it to Oracle using File Import and Export.

Navigation:

Navigator

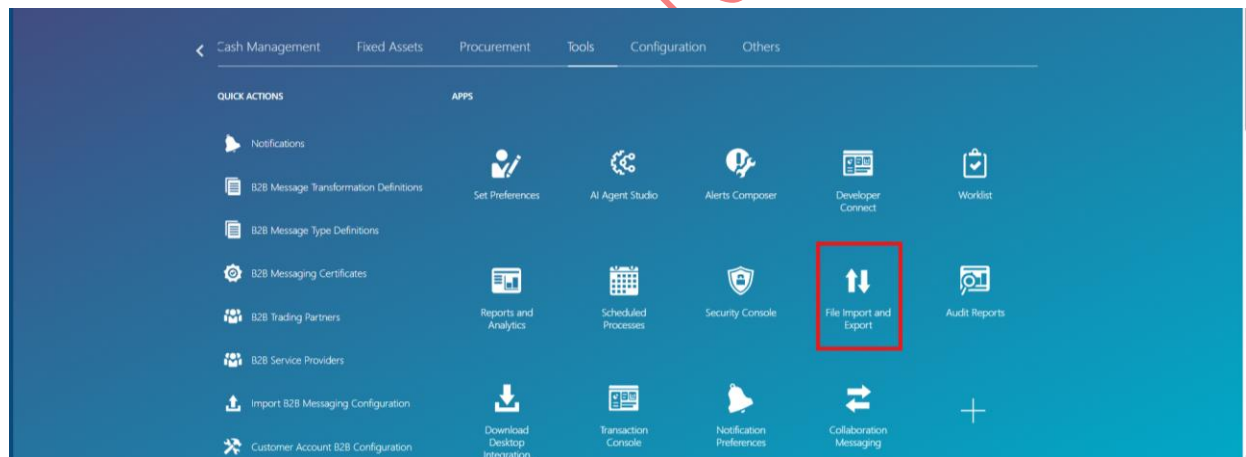

→ Tools

→ File Import and Export

Then follow these steps:

1. Click the Create icon.
2. Browse and select the generated ZIP file.
3. Select the account:
prc/purchaseOrder/import
4. Click Save and Close.

This uploads the ZIP file to Oracle WebCenter Content so it can be used by the scheduled import process.

Oracle Fusion Cloud SCM | FBDI Purchase Order Upload Guide | By Eng. Bilal Abu Al Sabea

How Can I Upload Purchase order in Oracle Fusion Using FBDI?

Oracle Fusion Cloud SCM

By Bilal Abu Al Sabea

LinkedIn: www.linkedin.com/in/bilal-abu-al-sabea-878b89234

The screenshot shows the 'Process Details' window in Oracle Fusion Cloud SCM. A 'Confirmation' dialog box is displayed in the center, stating 'Process 1141770 was submitted.' with an 'OK' button. The background window shows the 'Basic Options' tab with parameters for 'Import Process' (Import Orders) and 'Data File' (PImportOrders.zip). The 'Overview' tab on the left shows a list of processes, and the 'Status' tab on the right shows a table of process status.

Status	Scheduled Time	Submission Time
Wait	6/8/26 14:20 AST	6/8/26 14:15 AST
Succeeded	6/8/26 14:12 AST	6/8/26 14:12 AST
Succeeded	6/8/26 14:12 AST	6/8/26 14:12 AST
Succeeded	6/8/26 14:12 AST	6/8/26 14:12 AST

Monitor the Load Interface Process

After submission, monitor the scheduled process.

The process status should become:

Succeeded

If it fails:

- Open the log
- Review the error message
- Correct the file
- Regenerate the ZIP
- Reupload it
- Run the process again

Important note:

At this stage, the data is only loaded into the interface tables.

The actual Purchase Orders are not yet created.

How Can I Upload Purchase order in Oracle Fusion Using FBDI?

Oracle Fusion Cloud SCM

By Bilal Abu Al Sabea

LinkedIn: www.linkedin.com/in/bilal-abu-al-sabea-878b89234

Common Issues During Item FBDI Upload

Issue 1: CSV file is not generated

Possible cause:

Excel macros are disabled.

Solution:

Enable macros and trust access to the VBA project object model from Excel Trust Center settings.

Issue 2: Load Interface File for Import fails

Possible causes:

Wrong UCM account was selected.

ZIP file format is incorrect.

CSV files were modified manually.

Template columns were deleted or reordered.

Solution:

Regenerate the CSV ZIP file from the original template and upload it again using the correct account:

scm/item/import

Issue 3: Purchase Order import fails

Possible causes:

- Invalid supplier or supplier site
- Invalid Procurement BU
- Invalid item or category
- Invalid line type
- Missing schedule or distribution data
- Invalid charge account
- Wrong interface linking between header, line, schedule, and distribution

LinkedIn: www.linkedin.com/in/bilal-abu-al-sabea-8263b9234

Oracle Fusion Cloud SCM | FBDI Purchase Order Upload Guide | By Eng. Bilal Abu Al Sabea

How Can I Upload Purchase order in Oracle Fusion Using FBDI?

Oracle Fusion Cloud SCM

By Bilal Abu Al Sabea

LinkedIn: www.linkedin.com/in/bilal-abu-al-sabea-878b89234

Solution:

Check the log and output files carefully, then correct the source file and rerun the process.

Important Notes for Consultants

Always use a unique Batch ID for each upload.

Keep a copy of the original FBDI file before making changes.

Do not delete or reorder template columns.

Use valid Oracle setup values.

Test the upload first in TEST environment before uploading in Production.

Review the log file carefully if the process fails.

Coordinate with the business to validate the uploaded items.

Summary

Uploading Purchase Orders in Oracle Fusion using FBDI is a structured and reliable method for bulk PO creation.

The process starts by downloading the **POPurchaseOrderImportTemplate.xlsm**, preparing the PO data, generating the ZIP file, uploading it to Oracle using the UCM account **prc/purchaseOrder/import**, then running the required scheduled processes.

The key scheduled processes are:

- **Load Interface File for Import**
- **Import Orders**

If the data is prepared correctly and the processes succeed, Oracle will create the Purchase Orders successfully.

How Can I Upload Purchase order in Oracle Fusion Using FBDI?

Oracle Fusion Cloud SCM
