

ORACLE PROCUREMENT CLOUD

Redwood UI Enablement Guide

Setup, Access Requirements & Feature Reference

Procurement Common | Purchasing | Supplier Portal | Sourcing | SQM | Self-Service Procurement

Created by: Ahmed Saeed

How to Use This Guide

This document is structured in three parts:

- Part 1 - Redwood Overview: What is Oracle Redwood and why Oracle made the change
- Part 2 - Business Benefits: Key advantages for your organisation
- Part 3 - Feature Setup Reference: Module-by-module enablement steps

Part 1 - What is Oracle Redwood?

Oracle Redwood is Oracle's next-generation design system and user experience (UX) framework. Launched as the strategic direction for all Oracle Cloud Applications, Redwood replaces the legacy Oracle Application Development Framework (ADF / Classic UI) with a modern, role-centric, and data-driven interface built on Oracle JET (JavaScript Extension Toolkit).

Redwood is not simply a visual refresh. It represents a fundamental rethinking of how enterprise users interact with business applications - moving from task-oriented menu navigation towards intelligent, insight-driven workspaces that surface the right information at the right time.

Oracle's Design Vision

"Redwood gives people simple, beautiful, and easy-to-use experiences - whether they are completing a task, reviewing information, or making decisions. It is built for the way people work today: on any device, with natural interaction patterns, and with AI embedded throughout."

- Oracle Cloud UX Design Strategy

Why Did Oracle Move from Classic UI to Redwood?

Oracle's classic UI (built on ADF) served enterprise customers for over a decade but was designed for a desktop-first, form-heavy world. As business expectations evolved, several structural limitations became clear:

1

Aging Technology Stack

ADF was built on Java server-side rendering. It struggled to keep pace with modern browser capabilities, mobile responsiveness, and real-time data updates.

2

Poor Mobile & Tablet Experience

The classic interface was not designed with touch-first interaction in mind, making it cumbersome for field workers, managers, and supplier contacts on mobile devices.

3

Disconnected User Journeys

Users navigated through multiple screens to complete a single workflow. This fragmentation led to higher error rates, longer training times, and lower adoption.

4

AI & Analytics Integration Constraints

The classic UI could not easily embed Oracle Analytics, contextual AI recommendations, or real-time KPIs within the transactional flow.

5

Competitive Market Expectations

SAP, Workday, and ServiceNow had moved to consumer-grade UX paradigms. Oracle needed to match modern enterprise UX standards to remain competitive.

Redwood was Oracle's answer: a ground-up redesign using open web standards, Oracle JET components, and a unified design language shared across all Oracle Cloud modules. The transition is delivered progressively through quarterly updates, allowing customers to opt in module by module.

Part 2 - Benefits of Moving to Redwood

Adopting the Oracle Redwood experience in your Procurement Cloud environment delivers measurable improvements across user productivity, system performance, and strategic decision-making.

	Role-Based Workspaces	Redwood surfaces tasks, KPIs, and data relevant to each role. Buyers, requisitioners, and approvers see tailored landing pages instead of generic menus, reducing navigation time and cognitive load.
	Faster Task Completion	Streamlined pages for Purchase Orders, Agreements, and Requisitions reduce clicks and page loads. Users report significantly shorter cycle times for order creation and processing.
	Fully Responsive Design	Built mobile-first using responsive Oracle JET components. Approvals, order reviews, and supplier interactions work seamlessly on smartphones and tablets.
	OSCS-Powered Search	Redwood pages leverage Oracle Search Cloud Service (OSCS) for fast, faceted, full-text search across Purchase Orders, Agreements, Requisitions, and Suppliers.
	Embedded Analytics & KPIs	Real-time scorecards and OTBI-powered visualisations appear directly within the transactional workflow. No need to switch to a separate analytics application.
	Enhanced Supplier Collaboration	The redesigned Supplier Portal offers a consumer-grade experience for registration, negotiation responses, questionnaires, and portal home - lowering the barrier for supplier adoption.
	Modernised Notifications	Redwood-style notifications for Purchase Orders, Agreements, Requisitions, and Supplier Registration are mobile-friendly and configurable via Oracle Analytics Publisher templates.
	Granular Privilege Model	New fine-grained privileges allow organisations to control which roles access new experiences independently from the classic UI, enabling phased and risk-managed adoption.
	AI-Ready Foundation	The Redwood architecture embeds Oracle AI services - generative AI, predictive analytics, and guided journeys - directly into procurement workflows.
	Continuous Innovation	Oracle delivers Redwood enhancements every quarter. Opting in positions your organisation to receive ongoing UX improvements and new capabilities without major upgrade projects.

Part 3 - Feature Setup Reference

The sections below provide module-by-module setup instructions, profile option values, ESS job requirements, and access privilege details for each Redwood feature in Oracle Procurement Cloud.

Conventions Used in This Guide

Profile Option Set the named profile option to Y (or Yes) in Manage Administrator Profile Values.

ESS Job Run the 'ESS job to create the index definition and perform the initial ingest to OSCS' with the stated index name.

Offering Opt-In Enable the feature via the Opt In Features page under the Procurement offering.

Privilege Assign the listed privilege code to the appropriate configured job role.

PROCUREMENT COMMON

1 Use Redwood-Style Procurement Notifications

Redwood-style notifications are automatically applied if you have not modified Oracle Analytics Publisher (OAP) templates. If you have customised templates, you must apply your modifications to the new Redwood OAP template.

Steps: If unmodified - no action required. If modified - review your current changes and re-apply them to the Redwood OAP template.

Access Requirement: BI Author Role (BIAuthor) - to configure notifications with Oracle Analytics Publisher.

PURCHASING

1 Search for Purchase Agreements Using a Redwood Page

Profile Option: ORA_PO_MANAGE_AGREEMENTS_REDWOOD_ENABLED = Y

ESS Job Index: Purchase Agreements: fa-prc-pa

2 Manage Purchase Orders

Profile Option: ORA_PO_PURCHASE_ORDERS_REDWOOD_ENABLED = Y

ESS Job Index: Purchase Orders: fa-prc-po

New Privilege: Manage Purchase Orders Using a Redwood Page
(PO_MANAGE_PO_WITH_REDWOOD_PRIV)

Existing Privileges: View Purchase Order Work Area (PO_VIEW_PURCHASING_WORKAREA_PRIV) |
Search Purchase Order (PO_SEARCH_PURCHASE_ORDER_PRIV)

Note: FND_MANAGE_SCHEDULED_JOB_DEFINITION_PRIV required to run ESS jobs.

3 Create and Edit Purchase Orders

Profile Option: `ORA_PO_PURCHASE_ORDERS_REDWOOD_ENABLED = Y`

To search and select predefined items on a purchase order line, configure item search:

1. Opt in to 'Search Items Using the New User Interface' under the Product Management offering.
2. Enable the `ORA_FND_SEARCH_INITIAL_INGEST_JOB_SCHEDULE_ENABLED` profile option.

New Privileges: `PO_MANAGE_PO_WITH_REDWOOD_PRIV` |
`ORA_PO_LOV_DEFAULTING_REST_DUTY`

Existing Privileges: `PO_VIEW_PURCHASING_WORKAREA_PRIV` |
`PO_CREATE_PURCHASE_ORDER_PRIV` | `EGP_VIEW_PRODUCT_MGT_SEARCH_PRIV` |
`EGP_GET_SEARCH_VIEW_REST_PRIV` | `EGP_GET_PM_INDEX_REST_PRIV`

4 View Purchase Orders

Refer to Feature 2 (Manage Purchase Orders) for setup steps.

Privilege: View Purchase Order (`PO_VIEW_PURCHASE_ORDER_PRIV`)

5 Define Pull Sequences and Generate Kanban Cards

Profile Option: `ORA_WIS_KANBAN_REDWOOD_ENABLED = Y`

Configure inventory organisation parameters to generate Kanban cards:

3. In Setup and Maintenance, search for and select the Manage Inventory Organizations task.
4. Search for the required inventory organisation.
5. Select the row and click the Manage Organization Parameters action.
6. Under the General tab, enter values for Card Prefix and Card Starting Number in the Kanban section.

Privileges: `WIS_MANAGE_PULL_SEQUENCES_PRIV` | `WIS_MANAGE_KANBAN_CARDS_PRIV`
(available from 25A)

Guided Journeys: `ORA_PER_REST_SERVICE_ACCESS_GUIDED_JOURNEYS_RO` |
`ORA_PER_REST_SERVICE_ACCESS_GUIDED_JOURNEY_RESPONSES`

6 Navigate Tasks and View KPIs Using the Purchasing Landing Page [25B]

Profile Option: `ORA_PO_PURCHASING_OVERVIEW_REDWOOD_ENABLED = Y`

Tile Launch: `PO_MANAGE_PO_WITH_REDWOOD_PRIV`

Landing Page View: `PO_VIEW_PURCHASING_WORKAREA_PRIV` |
`PO_VIEW_PURCHASE_AGREEMENT_WORKAREA_PRIV`

PO Scorecard: `PO_SEARCH_PURCHASE_ORDER_PRIV`

Edit Layout (Admin): `PO_EDIT_PURCHASING_LANDING_PAGE_LAYOUT`

OTBI KPIs (Admin): `ZCA_VIEW_DATA_VISUALIZATION_CONFIGURATION_PRIV` |
`ZCA_MANAGE_DATA_VISUALIZATION_CONFIGURATION_PRIV`

7 Search and Process Requisition Lines Using a Redwood Page

Profile Option: `ORA_PO_PROCESS_REQS_REDWOOD_ENABLED = Y`

ESS Job Index: Purchase Requisitions: fa-prc-por

Privileges: `PO_MANAGE_PO_WITH_REDWOOD_PRIV | PO_VIEW_PURCHASING_WORKAREA_PRIV | POR_PROCESS_REQUISITION_LINE_PRIV | PO_CREATE_PURCHASE_ORDER_FROM_REQUISITIONS_PRIV`

8 Create Purchase Order Changes as a Buyer

Profile Option: `ORA_PO_PURCHASE_ORDERS_REDWOOD_ENABLED = Y`

To search and select predefined items on a change order line, configure item search:

7. Opt in to 'Search Items Using the New User Interface' under Product Management.
8. Enable the `ORA_FND_SEARCH_INITIAL_INGEST_JOB_SCHEDULE_ENABLED` profile option.

Privileges: `PO_MANAGE_PO_WITH_REDWOOD_PRIV | ORA_PO_LOV_DEFAULTING_REST_DUTY | PO_VIEW_PURCHASING_WORKAREA_PRIV | PO_CANCEL_PURCHASE_ORDER_PRIV | PO_CHANGE_PURCHASE_ORDER_PRIV | EGP_VIEW_PRODUCT_MGT_SEARCH_PRIV | EGP_GET_SEARCH_VIEW_REST_PRIV | EGP_GET_PM_INDEX_REST_PRIV`

9 Search, Filter, and Review Purchase Orders Using Additional Attributes

ESS Job Index: Purchase Order Schedules: fa-prc-po-schedules

Privilege: `FND_MANAGE_SCHEDULED_JOB_DEFINITION_PRIV` to run ESS jobs.

10 Execute Actions on Multiple Purchase Orders or Schedules at Once

ESS Job Index: Purchase Order Schedules: fa-prc-po-schedules

Privileges: `PO_CANCEL_PURCHASE_ORDER_PRIV | PO_CLOSE_PURCHASE_ORDER_PRIV | PO_FINALLY_CLOSE_PURCHASE_ORDER_PRIV | PO_FREEZE_PURCHASE_ORDER_PRIV | PO_HOLD_PURCHASE_ORDER_PRIV | PO_CREATE_PURCHASE_ORDER_PRIV | PO_CHANGE_PURCHASE_ORDER_PRIV | PO_ACKNOWLEDGE_PURCHASE_ORDER_PRIV | PO_COMMUNICATE_PURCHASING_DOC_PRIV | POR_VIEW_REQUISITION_DETAILS_AS_BUYER_PRIV`

11 Use Redwood-Style Purchase Agreement Approval and FYI Notifications

Offering: Procurement (Opt In). After enabling, configure the Oracle Analytics Publisher template:

9. Sign in to the Analytics Publisher server and click the Catalog tab.
10. Under Shared Folders > Procurement > Purchasing, locate the relevant notification report template. Click More > Customize. A copy is created in Shared Folders > Custom > Procurement > Purchasing.
11. Access the template in the Custom folder and edit as required.
12. Upload the template with the appropriate locale.

Data Model: Purchase Agreement Notification Data Model

View Privileges: `PO_VIEW_PURCHASE_AGREEMENT_PRIV_OBI | PO_COMMUNICATE_PURCHASING_DOC_PRIV_OBI`

Configure (Admin): BI Author Role (BIAuthor)

SUPPLIER PORTAL

1 Search Suppliers with a New User Experience

ESS Job Index: Suppliers: fa-prc-suppliers

2 Redwood: Next Generation User Experience for Supplier Registration

Offering: Procurement (Opt In). Enable via Opt In Features:

13. In the Offerings work area, select Procurement and click Opt In Features.
14. Click the Features icon for the Suppliers functional area.
15. Enable 'Redwood: Next Generation User Experience for Supplier Registration'.
16. Select the feature choice: Internal supplier request and/or Self-service procurement supplier request. Click Save and Close.

Submission Privilege: POZ_SUBMIT_SUPPLIER_REGISTRATION_PRIV

Setup Privileges: CE_MANAGE_BANK_PRIV | POZ_CONFIGURE_SUPPLIER_REGISTRATION_PRIV | FND_ADMINISTER_SANDBOX_PRIV

3 Configure Supplier Registration Approval Notification Using OAP

Offering: Procurement (Opt In). Configure the Analytics Publisher template:

17. Sign in to the Analytics Publisher server and click the Catalog tab.
18. Under Shared Folders > Procurement > Suppliers, locate the Supplier Registration Approval Notification Report. Click More > Customize.
19. In the Custom folder, set REGISTRATION_TYPE = INTERNAL_REQUEST for internal, or EXTERNAL for external registrations.
20. Upload the template with the appropriate locale.

View/Edit Privileges: POZ_VIEW_SUPPLIER_REGISTRATION_REQUEST_PRIV | POZ_EDIT_SUPPLIER_REGISTRATION_REQUEST_PRIV

Configure (Admin): BI Author Role (BIAuthor)

4 Use New Supplier Experience for Sourcing

Offering: Procurement (Opt In). Enable the Supplier Portal functional area, then navigate to Offerings > Procurement > Opt In Features > Supplier Portal > Enable 'Redwood: Enable the New Supplier Portal Home Page Experience'. Click Done.

Privileges: PON_CREATE_SUPPLIER_NEGOTIATION_RESPONSE_PRIV | PON_EDIT_SUPPLIER_NEGOTIATION_RESPONSE_PRIV | PON_VIEW_SUPPLIER_NEGOTIATION_SUPPLIER_FACING_PRIV

5 Enable the New Supplier Portal Home Page Experience

Follow the same Opt In steps as Feature 4 above. Enable 'Redwood: Enable the New Supplier Portal Home Page Experience' for the Supplier Portal functional area.

Privilege: POS_ACCESS_SUPPLIER_PORTAL_OVERVIEW_PRIV

6 Use and Configure Redwood-Style Internal Supplier Registration FYI Notifications

Offering: Procurement (Opt In). Configure the Analytics Publisher template:

21. Sign in to the Analytics Publisher server and click the Catalog tab.
22. Under Shared Folders > Procurement > Suppliers, locate the Supplier Registration Request Approval FYI Notification Report. Click More > Customize.
23. Edit the template in the Custom folder as required.
24. Upload the template with the appropriate locale.

Data Model: Supplier Registration Approval Notification Data Model

View Privilege: ORA_POZ_SUPPLIER_REGISTRATION_MANAGEMENT_DUTY_OBI

| SOURCING

1 View Negotiation Abstracts with a New User Experience

Offering: Procurement > View Negotiation Abstracts with a New User Experience.

Privileges: PON_CREATE_SUPPLIER_NEGOTIATION_PRIV |
PON_EDIT_SUPPLIER_NEGOTIATION_PRIV

2 Search Negotiations in Supplier Portal with a New User Experience

Privilege: PON_VIEW_SUPPLIER_NEGOTIATION_SUPPLIER_FACING_PRIV

3 Use New Buyer Experience for Negotiation Messages

Offering: Procurement. Navigate to Tools > Scheduled Processes > Schedule New Process. Run the ESS job with Index Name: fa-prc-pon-buyermessages.

Privileges: PON_VIEW_ONLINE_MESSAGE_PRIV | PON_CREATE_ONLINE_MESSAGE_PRIV |
PON_REPLY_ONLINE_MESSAGE_PRIV

4 Use New Supplier Experience for Negotiation Messages

Offering: Procurement. Run the ESS job with Index Name: fa-prc-pon-suppliermessages.

Privileges: PON_VIEW_ONLINE_MESSAGE_SUPPLIER_FACING_PRIV |
PON_CREATE_ONLINE_MESSAGE_SUPPLIER_FACING_PRIV |
PON_REPLY_ONLINE_MESSAGE_SUPPLIER_FACING_PRIV

5 Use Enhanced Negotiation Search in Supplier Portal

Privilege: PON_VIEW_SUPPLIER_NEGOTIATION_SUPPLIER_FACING_PRIV

6 Respond to Simple Negotiations in Supplier Portal

To enable this feature, log a Service Request (SR) with: Product Module = Oracle Fusion Sourcing Cloud Service, Sub-component = Manage Negotiation, and description: 'Enable the feature - Redwood: Respond to Simple Negotiations in Supplier Portal'.

Privileges: PON_CREATE_SUPPLIER_NEGOTIATION_RESPONSE_PRIV |
PON_EDIT_SUPPLIER_NEGOTIATION_RESPONSE_PRIV

7 Download Contract Terms in Supplier Portal [25B]

Prerequisite: opt in to the 25A feature 'Redwood: Enable the New Supplier Portal Home Page Experience'.

Privilege: OKC_VIEW_CONTRACT_TERMS_AND_CONDITIONS_PRIV

8 Respond to a Large Number of Requirements in Supplier Portal [25B]

Available in the new Redwood Supplier Experience. Prerequisite: opt in to 'Redwood: Enable the New Supplier Portal Home Page Experience'.

Privileges: PON_CREATE_SUPPLIER_NEGOTIATION_RESPONSE_PRIV |
PON_EDIT_SUPPLIER_NEGOTIATION_RESPONSE_PRIV

9 Review New Round Changes in Supplier Portal [25B]

Prerequisite: opt in to 'Redwood: Enable the New Supplier Portal Home Page Experience'.

Privileges: PON_CREATE_SUPPLIER_NEGOTIATION_RESPONSE_PRIV |
PON_EDIT_SUPPLIER_NEGOTIATION_RESPONSE_PRIV

10 Use an Enhanced Supplier Redwood Experience [25B]

Prerequisite: opt in to the 25A feature 'Redwood: Enable the New Supplier Portal Home Page Experience'.

Privileges: PON_VIEW_SUPPLIER_NEGOTIATION_RESPONSE_SUPPLIER_FACING_PRIV_OBI |
PON_CREATE_SUPPLIER_NEGOTIATION_RESPONSE |
PON_EDIT_SUPPLIER_NEGOTIATION_RESPONSE_PRIV |
PON_VIEW_SUPPLIER_NEGOTIATION_SUPPLIER_FACING_PRIV |
PON_MANAGE_SUPPLIER_NEGOTIATION_RESPONSE_SUPPLIER_FACING_PRIV

11 Monitor Negotiation in Supplier Portal [25B]

Prerequisite: opt in to the 25A feature 'Redwood: Enable the New Supplier Portal Home Page Experience'.

Privilege: PON_ANALYZE_SUPPLIER_NEGOTIATION_RESPONSE_SUPPLIER_FACING_PRIV

12 Respond by Spreadsheet in Supplier Portal [25B]

Prerequisite: opt in to the 25A feature 'Redwood: Enable the New Supplier Portal Home Page Experience'.

Privileges: PON_CREATE_SUPPLIER_NEGOTIATION_RESPONSE_PRIV |
PON_EDIT_SUPPLIER_NEGOTIATION_RESPONSE_PRIV

13 Create Alternate Lines in Supplier Portal [25B]

Prerequisite: opt in to the 25A feature 'Redwood: Enable the New Supplier Portal Home Page Experience'.

Privileges: PON_CREATE_SUPPLIER_NEGOTIATION_RESPONSE_PRIV |
PON_EDIT_SUPPLIER_NEGOTIATION_RESPONSE_PRIV

14 View Response History in Supplier Portal [25B]

Prerequisite: opt in to the 25A feature 'Redwood: Enable the New Supplier Portal Home Page Experience'.

Privilege: PON_VIEW_SUPPLIER_NEGOTIATION_RESPONSE_SUPPLIER_FACING_PRIV_OBI

15 Use Guided Journey on Abstract Listing Page

Prerequisite: opt in to the 24C feature 'Redwood: View Negotiation Abstracts with a New User Experience'.

Anonymous Access: ORA_FND_ANONYMOUS_USER_ABSTRACT

SUPPLIER QUALIFICATION MANAGEMENT

1 Use Questionnaires in Internal Supplier Registration

Offering: Procurement (Opt In). Prerequisite: opt in to 'Redwood: Next Generation User Experience for Supplier Registration' with Internal or Self-service procurement supplier request choice selected.

25. Configure the rule set for the Procurement BU (Task: Manage Rule Sets). Define registration rules linking sourcing qualification model and qualification areas to registration types.
26. Enable the qualification questionnaire in supplier registration (Task: Configure Supplier Registration and Profile Change Request).

Privilege: POZ_SUBMIT_SUPPLIER_REGISTRATION_PRIV

2 Improve Qualification Results with Supplier Action Plans

Profile Option: ORA_POQ_CREATE_ACTION_PLANS_QUALS = Y

Run the ESS job with parameters: fa-hcm-workerjourney and fa-hcm-workerjourneytask. To synchronise the Supplier Qualification discretionary role with HCM, submit the 'Synchronize SCM Job Roles' scheduled job with Job Role: ORA_POQ_SUPPLIER_QUALIFICATION_DISCRETIONARY and Pillar: HCM.

Feature Privileges: POQ_MANAGE_ACTION_PLAN_PRIV |
POQ_MANAGE_ACTION_PLAN_TASK_INTERNAL_PRIV |
POQ_MANAGE_ACTION_PLAN_TASK_SUPPLIER_PRIV

Setup Privileges: POQ_MANAGE_ACTION_PLAN_TEMPLATE_PRIV |
INV_SYNCHRONIZE_SCM_JOB_ROLES_PRIV | FND_MANAGE_SCHEDULED_JOB_DEFINITION_PRIV

3 Respond to Supplier Questionnaire

Profile Option: ORA_POQ_REDWOOD_RESPOND_TO_QUESTIONNAIRE_SUPPLIER = Y

Privilege: POQ_CREATE_SUPP_QUAL_QUESTIONNAIRE_RESPONSE_AS_SUPPLIER_PRIV

4 Use New Supplier Experience for Supplier Qualification Management

Offering: Procurement (Opt In). Enable Supplier Portal functional area, then:

27. Navigate to Offerings > Procurement > Opt In Features.
28. For Supplier Portal functional area, enable 'Redwood: Enable the New Supplier Portal Home Page Experience'.
29. For Supplier Qualification functional area, enable 'Redwood: Use New Supplier Experience for Supplier Qualification Management'.

Questionnaire Privileges:

POQ_SEARCH_SUPP_QUAL_QUESTIONNAIRE_RESPONSE_AS_SUPPLIER_PRIV |
POQ_VIEW_SUPP_QUAL_QUESTIONNAIRE_RESPONSE_AS_SUPPLIER_PRIV |
POQ_CREATE_SUPP_QUAL_QUESTIONNAIRE_RESPONSE_AS_SUPPLIER_PRIV

Qualification View: POQ_VIEW_SUPPLIER_QUALIFICATION_AS_SUPPLIER_PRIV

Assessment View: POQ_VIEW_SUPPLIER_ASSESSMENT_AS_SUPPLIER_PRIV

SELF-SERVICE PROCUREMENT

1 View Purchase Orders as a Requester Using a Redwood Page [24D]

Offering: Procurement. Opt in to 'Procure Goods and Services Using the Redwood Self Service Procurement Application'.

Profile Option: ORA_POR_VIEW_PO_REDWOOD_ENABLED = Yes

Privileges: POR_MANAGE_REQ_WITH_PWA_PRIV |
PO_VIEW_PURCHASE_ORDER_AS PROCUREMENT_REQUESTER_PRIV

2 Select a Recently Used Location When Creating a Requisition [25A]

Offering: Procurement. Enable both 'Redwood Version as Default Self Service Procurement Application' and 'Procure Goods and Services Using the Redwood Self Service Procurement Application'.

Privilege: POR_MANAGE_REQ_WITH_PWA_PRIV

3 Create Requisitions to Replenish Consignment Stock [25A]

Privileges: POR_MANAGE_REQ_WITH_PWA_PRIV |
POR_CREATE_REQUISITION_ALLOW_QUICK_ENTRY_PRIV |
POR_CREATE_REQUISITION_ENTER_INVENTORY_DESTINATION_TYPE_PRIV

4 Create Emergency Requisitions [25A]

Privileges: POR_MANAGE_REQ_WITH_PWA_PRIV |
POR_CREATE_REQUISITION_ALLOW_EMERGENCY_PURCHASE_ORDERS_PRIV

5 View Requisition PDF [25A]

Privileges: POR_MANAGE_REQ_WITH_PWA_PRIV | POR_VIEW_REQUISITION_ALL_PRIV

6 Request Master Items from Punchout Sites [25A]

Privileges: POR_MANAGE_REQ_WITH_PWA_PRIV |
POR_MANAGE PROCUREMENT_CATALOG_CONTENT_PRIV

7 Use and Configure Redwood-Style Requisition Approval FYI Notifications [25B]

Offering: Procurement (Opt In). Configure templates for Requisition Approval Status FYI, Returned, Withdrawn, Reassigned, and Lines Canceled FYI Notification Reports:

30. Sign in to Analytics Publisher and click the Catalog tab.
31. Under Shared Folders > Procurement > Self Service Procurement, locate the relevant report. Click More > Customize. A copy is created in Shared Folders > Custom > Procurement > Self Service Procurement.
32. Edit the template in the Custom folder as required.
33. Upload the template with the appropriate locale.

Data Model: Requisition Approval E-Mail Data Model

Privilege: POR_MANAGE_REQUISITION_PRIV_OBI

8 Search and Select Items Using Item Attributes [25B]

Offering: Procurement. Configure item search:

34. Opt in to 'Search Items Using the New User Interface' under Product Management.
35. Enable the ORA_FND_SEARCH_INITIAL_INGEST_JOB_SCHEDULE_ENABLED profile option to Y.
36. Configure data security for item classes for each role-to-organisation pairing.
37. Configure the item index and view. Build the index at startup via Configure Index and Configure View tasks.

Privileges: POR_MANAGE_REQ_WITH_PWA_PRIV |
POR_CREATE_REQUISITION_ALLOW_QUICK_ENTRY_PRIV | EGP_GET_SEARCH_VIEW_REST_PRIV |
EGP_GET_PM_INDEX_REST_PRIV

9 Distribute Project Costs on Requisitions Using Award Funding Patterns [25B]

Privileges: PJC_DISTRIBUTE_AWARD_PROJECT_COSTS_AND_QUANTITIES_PRIV |
POR_MANAGE_REQ_WITH_PWA_PRIV

10 Allow Purchase of Goods and Services for Work Orders [25B]

Privileges: POR_MANAGE_REQ_WITH_PWA_PRIV |
WIP_MANAGE_ITEM_PURCHASES_FOR_WORK_ORDER_PRIV |
WIP_GET_WORK_ORDERS_SERVICE | MNT_GET_WORK_ORDERS_BY_SERVICE_PRIV

11 Use Current Date to Source a Blanket Agreement Line [25B]

Offering: Procurement. You must opt in to both of the following features:

- Specify a Start Date for Blanket Purchase Agreement Lines
- Use Order Date for Order Pricing

Privileges: PO_CREATE_PURCHASE_AGREEMENT_PRIV |
PO_CHANGE_PURCHASE_AGREEMENT_PRIV
