

## **Project Portfolio Management**

**Oracle Project Portfolio Management Cloud:** is a complete and integrated solution that dramatically improves the way project-driven organizations work, enabling efficient and effective project management while ensuring smarter business decisions based on a single source of project truth.

❖ **Oracle Project Portfolio Management Cloud Services include the following applications:**

- ✓ Project Financial Management
- ✓ Project Execution Management

❖ **Project Financial Management Offering includes:**

- Project Control
- Project Costing
- Project Billing
- Project Contracts
- Project Performance Reporting

❖ **Project Execution Management Offering includes:**

- Project Management
  - Task Management
  - Project Resource Management
- 

❖ **Enterprise PPM Applications that Work as One**

|                                     |                                                                                                                      |
|-------------------------------------|----------------------------------------------------------------------------------------------------------------------|
| <b>Project Management:</b>          | Intuitive, collaborative project planning and scheduling.                                                            |
| <b>Project Resource Management:</b> | Powerful search aligns the right resources to the right projects. Modern and integrated project resource management. |
| <b>Grants Management:</b>           | Proactively manage awards from funding to closeout. Control costs and prevent overspending.                          |
| <b>Billing and Revenue:</b>         | Bill for both Capital and Contract project costs.                                                                    |

|                               |                                                                                                                          |
|-------------------------------|--------------------------------------------------------------------------------------------------------------------------|
| <b>Cost Control:</b>          | Simplified streamlined project costing. Control resources and costs to facilitate early corrective action.               |
| <b>Task Management:</b>       | Manage your work socially. Control project and non-project tasks in one place. Extend project management to team members |
| <b>Analytics and Insight:</b> | Project performance reporting. Alerts to exception.                                                                      |
| <b>Budgets and Forecasts:</b> | Simplify project planning, budgeting, and forecasting                                                                    |

#### ❖ Roles to User:

- IT Security Manager
- Application Implementation Consultant
- Application Implementation Manager
- Project Manager
- Project accountant
- Project administrator
- Project application administrator
- Project billing specialist
- Project creator
- Project team member
- Project executive
- Project integration specialist
- Enterprise contract administrator
- Enterprise contract manager

**Note:** Run LDAP Job in Scheduled Processes

#### ❖ Offerings:

- Project Financial Management
- Project Execution Management

#### ➤ Prerequisite project portfolio management:

- Setup General Ledger module in Financials
- Assign BU & Ledger to General Ledger module roles

## Manage Data Access for Users

The screenshot shows the 'Create Data Access for Users' dialog box. At the top, there are fields for 'User Name' (HShorbagy) and 'Role' (empty). Below these is a table with the following columns: 'User Name', 'Role', 'Security Context', and 'Security Context Value'. The table contains three rows, all with 'HShorbagy' as the user name and 'Business unit' as the security context. The roles are 'Project Accountant', 'Project Administrator', and 'Project Manager'. The security context values are 'Hshorbagy\_BU', 'Hshorbagy\_BU', and 'Hshorbagy\_BU' respectively. At the bottom right of the dialog are 'Save and Close' and 'Cancel' buttons.

| * User Name | * Role                | * Security Context | * Security Context Value |
|-------------|-----------------------|--------------------|--------------------------|
| HShorbagy   | Project Accountant    | Business unit      | Hshorbagy_BU             |
| HShorbagy   | Project Administrator | Business unit      | Hshorbagy_BU             |
| HShorbagy   | Project Manager       | Business unit      | Hshorbagy_BU             |

## Create Project Unit :-

The screenshot shows the 'Setup: Financials' menu in SAP. The 'Financials' menu is expanded, showing various options. 'Project Financial Management' is highlighted with a red box. Other options include 'Manufacturing and Supply Chain Materials Management', 'Order Management', 'Procurement', 'Product Management', 'Project Execution Management', and 'Supply Chain Planning'.

## From Project Organization > Manage Project Unit Organizations

**Project unit:** Is an operational subset of your enterprise, such as a line of business, which conducts its business operations using projects, and must enforce consistent project planning, management, analysis, and reporting.

The screenshot shows the 'Setup: Project Financial Management' screen in SAP. The 'Functional Areas' list on the left has 'Project Organizations' highlighted with a red box. The main area shows the 'Project Organizations' task list, with 'Manage Project Unit Organizations' highlighted with a red box. Other tasks include 'Manage Project Unit Options', 'Manage Project Unit Set Assignments', 'Manage Organization Hierarchies and Classifications', 'Manage Project Organization Classifications', 'Configure Project Accounting Business Function', 'Submit Process to Maintain Project Organizations', and 'Manage Project Organization Classifications Data Access for Users'.

- EEI - Fabrication BU
- Elsewedy Electric for Infrastructure BU
- Obsolete Due to Restructuring - Elsewedy Electric for Infrastructure BU

Selected Business Units

Note :-

How can I associate a business unit with a project unit?

You can associate a business unit with a project unit during the Related Business Units step of the Manage Project Units setup task if the business unit is already configured using the Configure Project Accounting Business Function setup task.

If the business unit is not configured, then you can associate a project unit with the business unit from the navigation

From Project Organization --> Configure Project Accounting Business Function

You can run the Manage All Trees Operations Centrally scheduled process to do these tasks.

- Copy tree version – Duplicate from an existing tree version.
- Audit and activate tree version – Audit the tree version, and mark the tree version as active, if audited successfully.
- Flatten tree version – Incrementally flatten both rows and columns, and force flatten the tree version.

From Action, choose → Audit
