```

3.0 Receiving against the Purchase Order

- **Change the receiving Organization before you create a receipt** to which org you supposed to ship the goods.
- If it is a ordered Receipt then enter the Purchase Order Number against which you have to receive

 The screenshot shows the 'Find Expected Receipts (M1)' form. The title bar reads 'Oracle Applications - 11.5.10.2 TRG Instance on Janus (Refreshed on 09-APR-2007)'. The menu bar includes 'File', 'Edit', 'View', 'Folder', 'Tools', 'Actions', 'Window', and 'Help'. The main area has tabs for 'Supplier and Internal' and 'Customer'. Under 'Supplier and Internal', there are fields for 'Source Type' (set to 'Supplier'), 'Purchase Order' (set to '4500'), 'Line', 'Requisition', 'Supplier' (set to 'Allied Manufactu...'), 'Supplier Site', 'Receiving Location', 'Release', 'Shipment', and 'Shipment'. There is a checkbox for 'Include Closed POs' which is checked. Below this is a section with tabs for 'Item', 'Date Ranges', 'Shipments', and 'Destination'. Under 'Item', there are fields for 'Item, Rev', 'Category', 'Description', and 'Supplier Item'. At the bottom are buttons for 'Unordered', 'Clear', and 'Find'.

Inventory Interface- SRS updates inventory with the ship confirmation information. Inventory balances are decremented and reservations relieved. This program always spawns the *Order Management Interface - SRS* program. It is very important in the process flow that the Inventory Interface complete before the Order Management Interface to ensure the integrity of the reservation information.

Inventory Interface picks records from MTI (MTL_TRANSACTIONS_INTERFACE) and inserts them into MMTT (MTL_MATERIAL_TRANSACTIONS_TEMP). The Inventory Manager then processes rows and inserts them in to MTL_MATERIAL_TRANSACTIONS.

Order Management Interface runs to update Order Management with the ship confirmation information. Order line shipped quantities will be updated.

At the end of ship confirm, invoice lines are created in Ra_interface_lines_all table.

Tables Impacted:

Ra_interface_lines_all

Queries:

```
SELECT * FROM ra_interface_lines_all where interface_line_attribute1 = <order_number>
```
