

BPM Invoice Approval Configuration and Process

A company receiving an invoice from a vendor for goods delivered. The invoice is entered into the system, and before any payment is made, it must go through the approval process.

This process helps maintain control, accuracy, and compliance in financial transactions.

Setups:

1. Enable Invoice Approval in Invoice Options
2. Create Approval Group
3. Create Approval Rule

Process

1. Create Invoice in Accounts Payable

➤ **MANAGE INVOICE OPTIONS**

Go to Approval Section then enable the check box “ Enable Invoice Approval”

Click on Save and close

➤ **MANAGE APPROVAL GROUPS**

Select Approval Groups

Click on Create

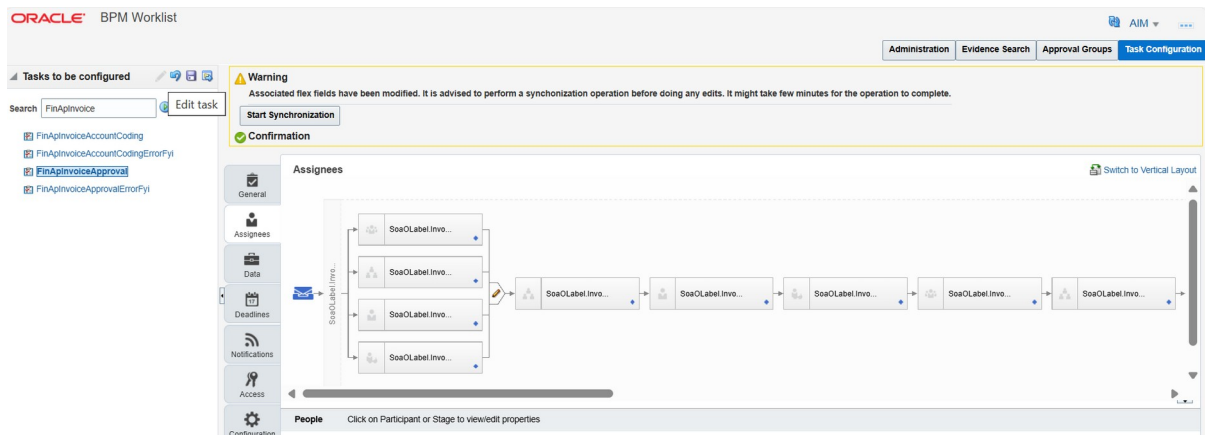

Provide the Approval Group name then Click on Save

Click on Task Configuration tab

Search with **FinApInvoiceApproval** Task

Click on Pencil icon to edit the workflow

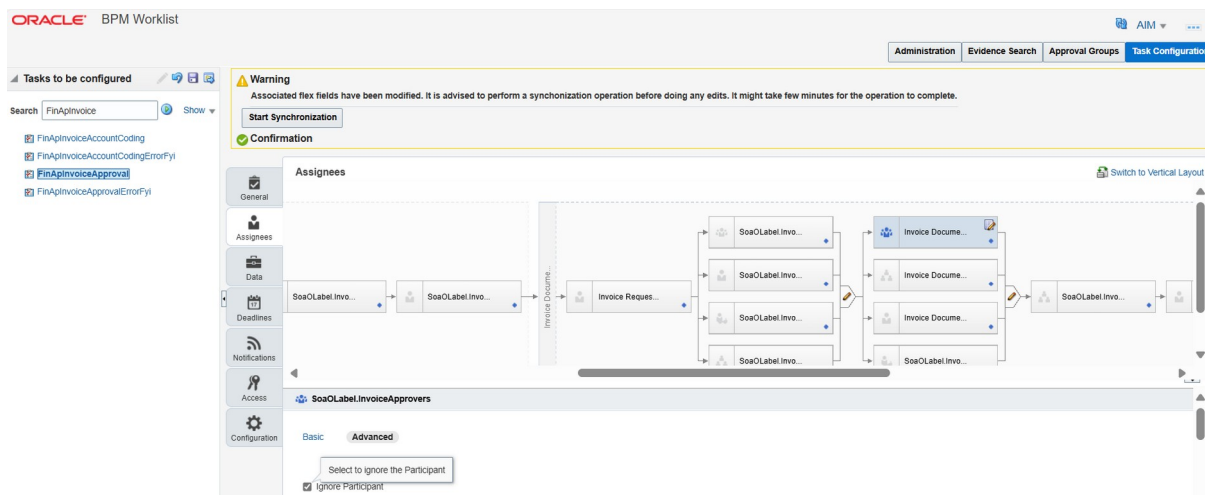

Go to Assignees

Disable the active nodes

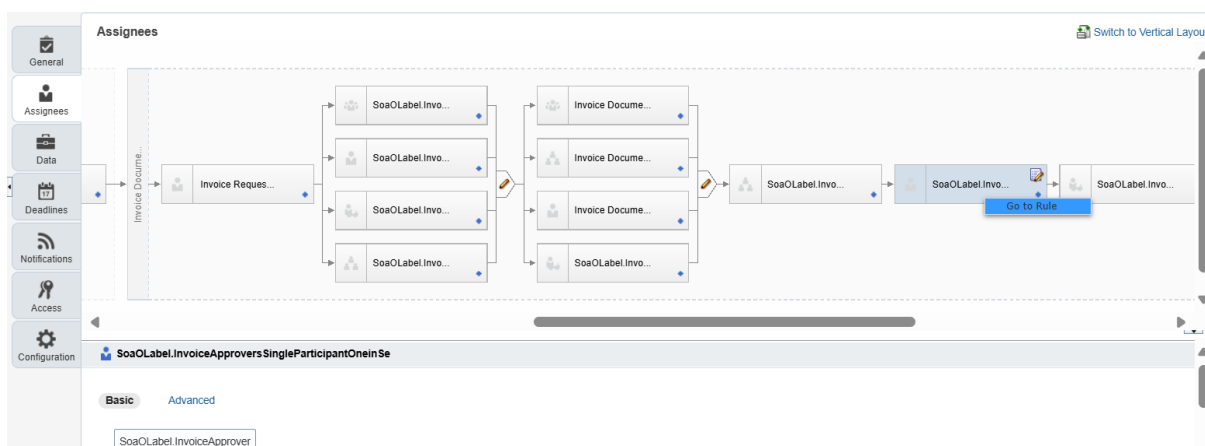

Select the node and go to Advanced the enable the check box “Ignore Participant”

Then click on Save and Click Commit

Again click on the Pencil Icon to edit

Select the Node and Click on diamond symbol then click on Go to Rule

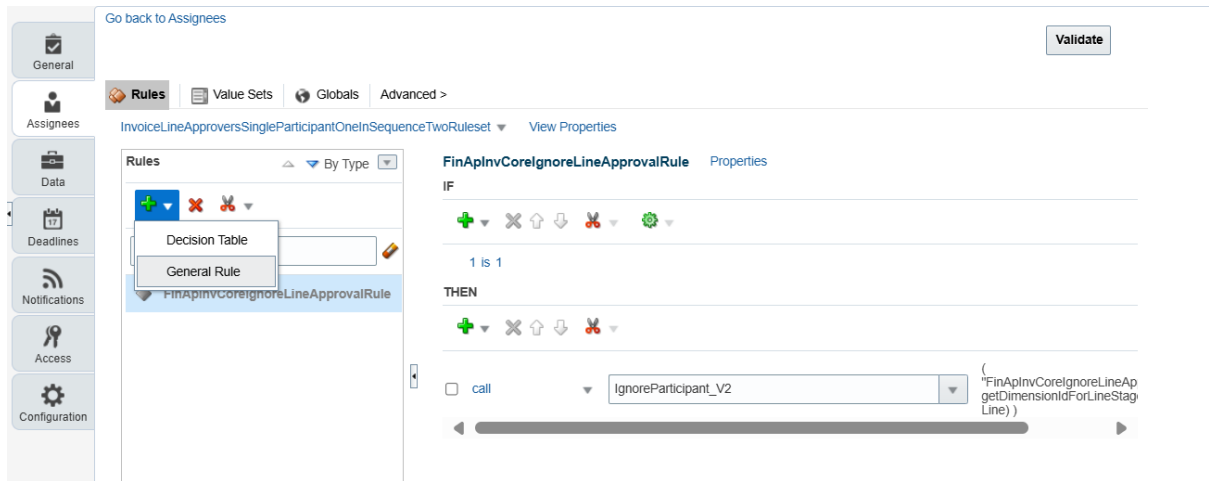

This is the default rule you can inactive

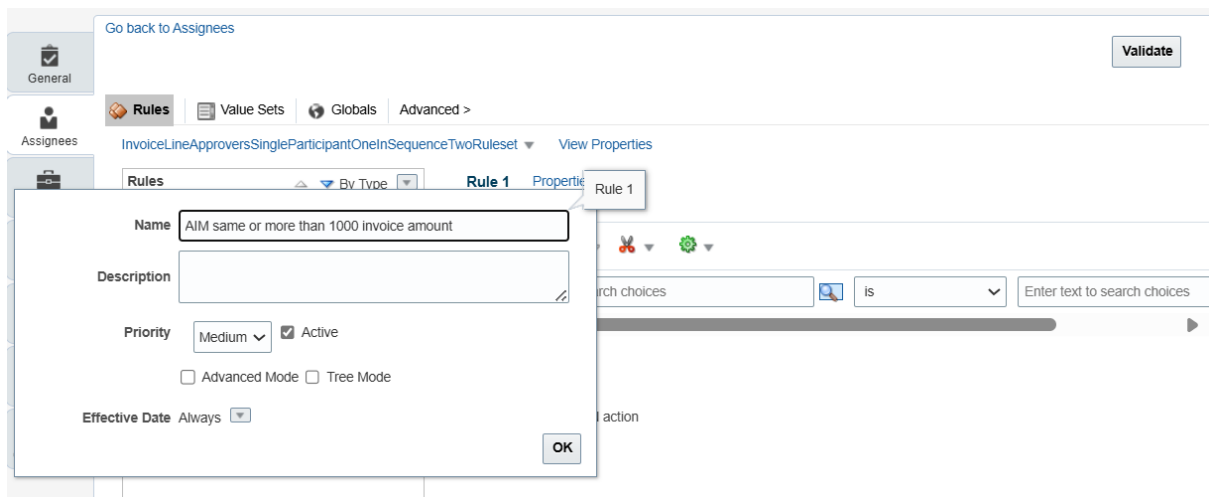

Select the rule => Properties => Disable “Active”

Then click on OK

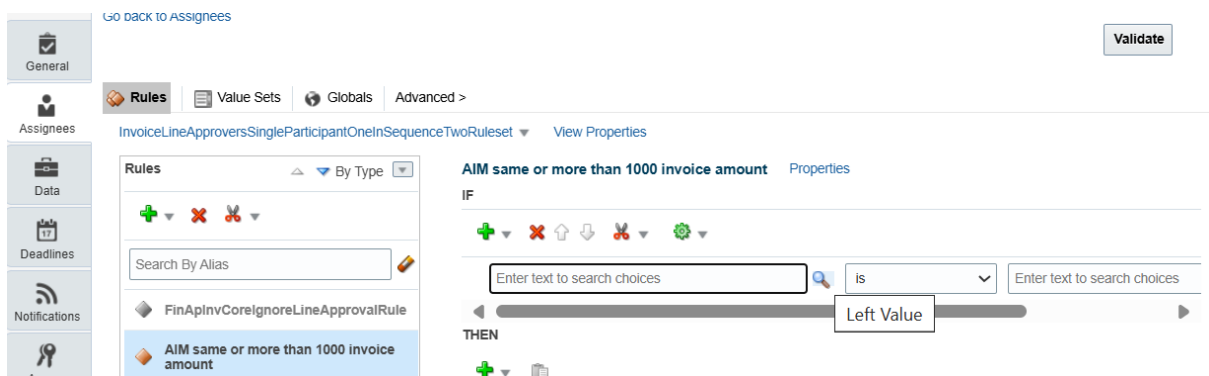

Go to Rules => Click on Plus Icon => Click on General Rule

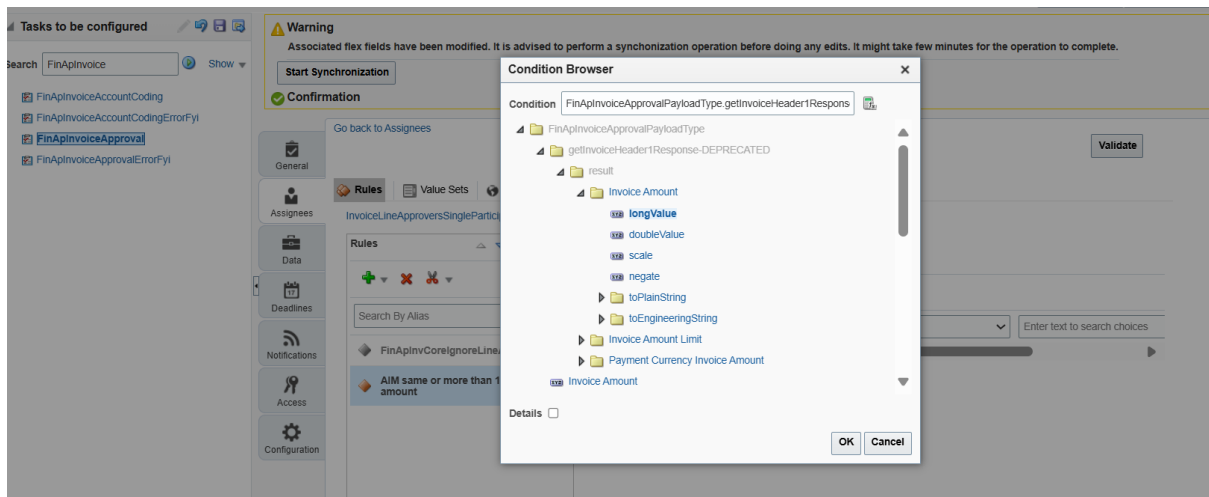

Click on Properties

Click on Search icon from first condition

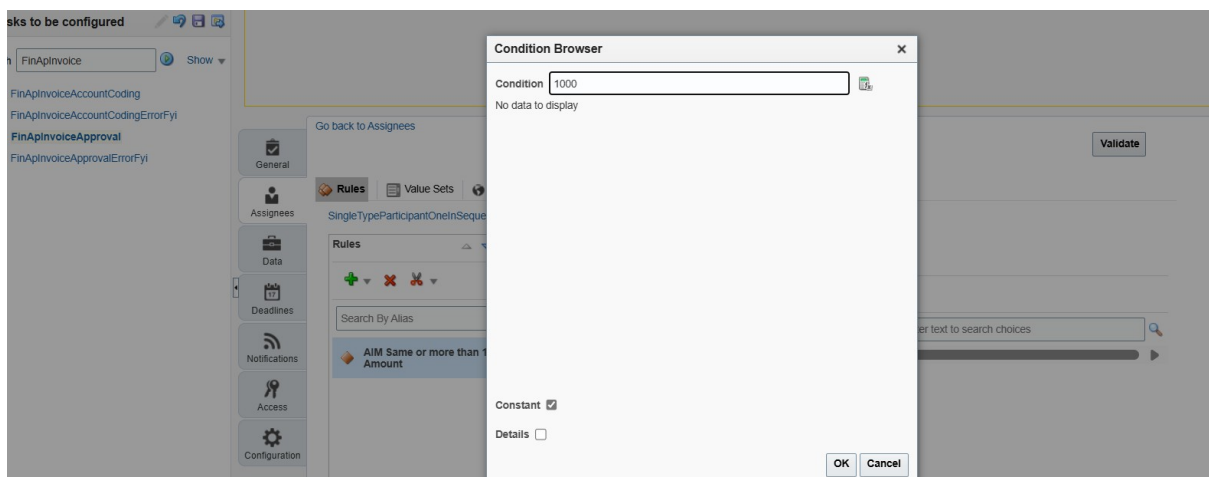

Search with Invoice Amount then select Long value then click on OK

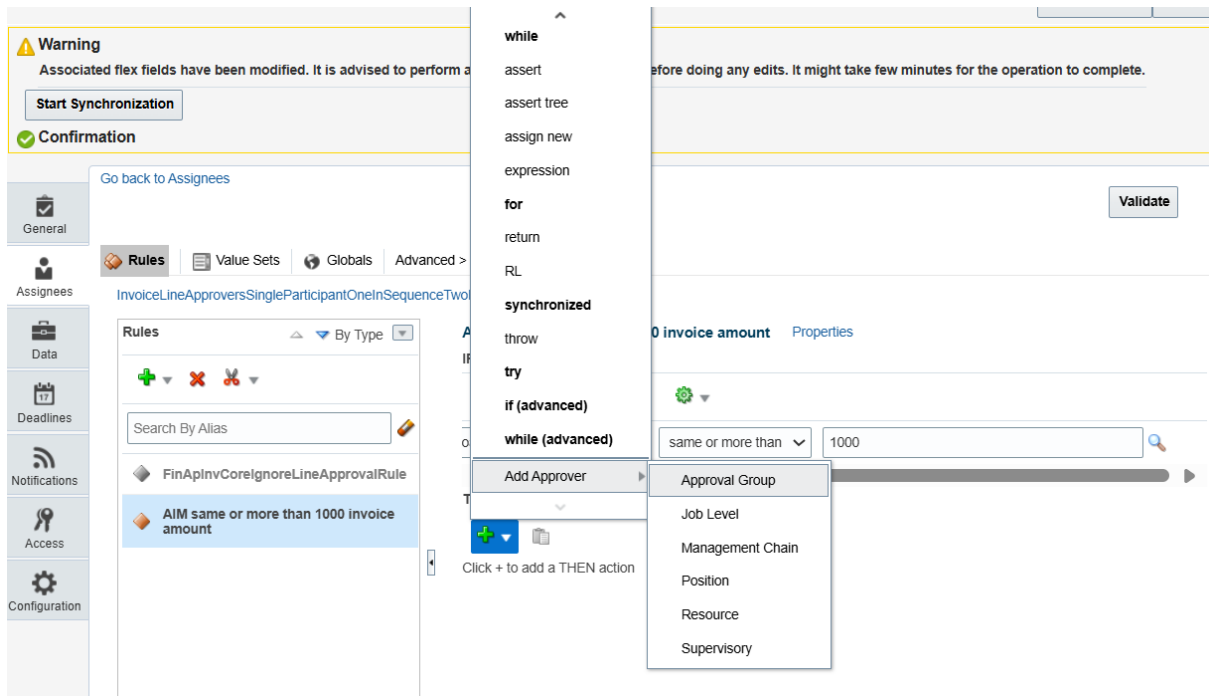

Select the expression as same or more than

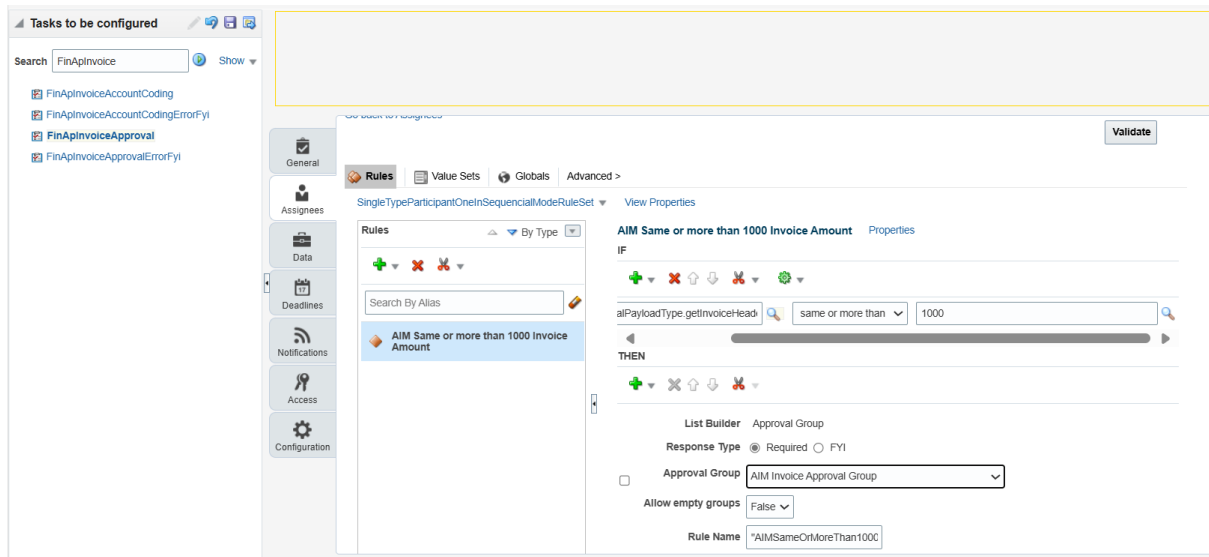

Click on Second search icon then enable constant and provide amount 1000

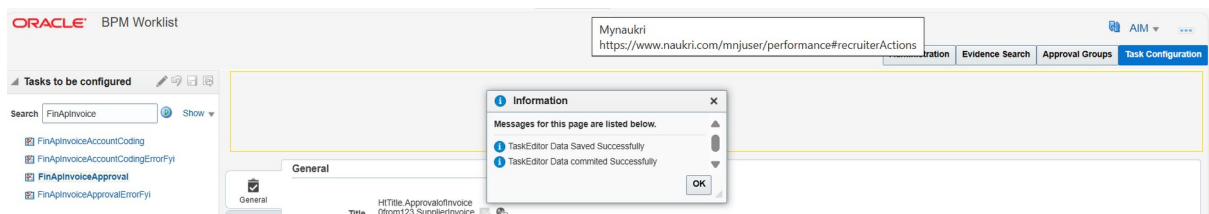

Go to THEN Click on Plus Icon drag down select Add Approver => Approval Group

Select the Approval Group as **AIM Invoice Approval Group** then click on **Validate**

Click on Save and Commit

Go to Invoice Workbench => Task Panel => Create Invoice
