Supplier Qualification Management Overview

Oracle Supplier Qualification Management (SQM) يساعد الشركات إنها تقلل المخاطر وتدير الموردين بشكل منظم. إزاي؟ أول حاجة، المورد عشان يدخل أي تعامل لازم يلتزم بمعايير اقتصادية وبيئية واجتماعية، زي إنه يكون عنده وضع مالي مستقر أو شهادات جودة أو يلتزم بقوانين البيئة، وده بيمنع أي مشاكل أو توقف في سلسلة التوريد. النظام كمان بيجمع كل بيانات التأهيل في مكان واحد بحيث أي مدير يقدر ياخذ قرار شراء أو اختيار مورد بسهولة وبمعلومة موثوقة من مصدر واحد. وكمان بيخدم برامج الشركة زي استخدام موردين متنوعين أو محليين، ويساعد في قرارات التوريد بحيث العقود ما تروحش غير لموردين مؤهلين، وبالتالي المناقصات بتدي نتائج أفضل.

جوه صفحة المورد في Oracle هتلاقي تاب اسمه Qualifications، والتاب ده بيعرض كل التأهيلات والتقييمات اللي اتعملت للمورد، واللي بتبقى جزء من السجل الأساسي بتاعه، يعني زي ما تشوف عنوانه وتليفونه تلاقي كمان وضعه المالي أو البيئي. التقييمات (Assessments) بتتولد من موديلات اسمها Qualification Models، والموديل بيبقى متكوّن من مجموعة Qualification Areas، وكل Area دي متجمّع فيها أسئلة متخصصة في جانب معين زي المالية أو الجودة. النتائج ممكن تتجمّع كلها في تقييم شامل يوضح المورد ده واقف فين بالنسبة لمتطلبات الشركة ككل. كمان ممكن تخلي التقييم يتحدث تلقائي (Automatic Reassessment)، يعني مثلاً لو المورد جدد شهادة ISO النظام يرفع تقييمه أوتوماتيك من غير تدخل بشري.

علشان تطبق SQM لازم الأول تحدد إيه المتطلبات اللي عايز تسأل الموردين عليها: زي بيانات الشركة، العملاء، الوضع المالي، شهادات الجودة، أو رخص التشغيل، وبعد كده المتطلبات دي بتتسجل كسؤال في **مكتبة الأسئلة Question Library** الأسئلة دي ممكن تتجمع في **Qualification Areas** متخصصة، زي Area لل Financial Viability فيها أسئلة عن الإيرادات والتقارير المالية، أو Area لل Environmental Compliance فيها أسئلة عن سياسات البيئة.

بعد كده بتبني **Qualification Model** اللي بيجمع أكثر من Area علشان تدي تقييم شامل للمورد. الموديل ممكن يبقى عالمي (Global) يعني ينفع يتطبق على كل وحدات الشركة، أو يبقى خاص بوحدة معينة لو ليها متطلبات محلية. في الآخر لما تبعت الأسئلة للموردين وتستلم الردود، النظام يحوّل النتائج لنتيجة "Qualified" أو "Not Qualified" على حسب المعايير اللي اتحطت. مثال عملي: مورد اسمه Acme Corporation جاوب على أسئلة خاصة بالوضع المالي واتقيّم إنه Qualified في الجانب المالي، وبالتالي الشركة ضمّته للقائمة المختصرة للمناقصات الكبيرة

عندنا حاجة اسمها **Initiative**، ودي ببساطة هي العملية الكاملة اللي بتجمع كل خطوات تقييم المورد في مكان واحد علشان تبقى سهلة للإدارة والمتابعة. ال Initiative ممكن تكون نوعين:
يا إما **Qualification Initiative** اللي فيها بتضيف "Qualification Areas" متعددة لمورد أو أكثر،
يا إما **Assessment Initiative** اللي بتبقى مبنية على "Qualification Model" واحد وال Model نفسه جواه كذا Qualification Area الفكرة هنا إنك تقدر تجمع تقييمات مختلفة لموردين مختلفين في عملية واحدة بدل ما تبقى كل حاجة منفصلة.

كمان ممكن تستخدم ال Initiative كأنها **Survey داخلي**، يعني بدل ما تعتمد بس على الأرقام أو ال KPIs الخاصة بالمورد، ممكن تبعت استبيان لزمالك أو مستخدمين داخليين عشان يقيموا المورد في حاجات نوعية زي سرعة الرد، سهولة التعامل، أو مستوى الاحترافية. والنتائج دي بتبقى قيمة جداً في إدارة المخاطر واتخاذ قرارات التعاقد و Sourcing

Create Questions

إزاي الأسئلة (Questions) بتستخدم؟

الأسئلة هي الأساس (Building Blocks) لكل حاجة في Supplier Qualification يعني أي تقييم أو تأهيل للموردين لازم يكون قائم على مجموعة من الأسئلة اللي إحنا محددينها. فين بتتخزن الأسئلة؟ في Question Library دي مكتبة الأسئلة اللي فيها كل الأسئلة اللي تم إنشاؤها قبل كده. **ميزة مكتبة الأسئلة:**

- الأسئلة اللي فيها **Reusable** تقدر تستخدمها مرة ومرة.
 - أي Supplier Qualification Manager ثاني يقدر يستخدم نفس الأسئلة من المكتبة.
 - Category Managers في Oracle Sourcing يقدرُوا يفتحوا الأسئلة دي ويستخدموها ك Requirements في أي Negotiations.
- النتيجة:** بدل ما تعيد تكتب نفس السؤال كل مرة، بتختار من الأسئلة الجاهزة وتبني ال Initiative بتاعتك بسرعة.

وأنت بتعمل سؤال جديد، لازم تحدد 3 حاجات أساسية:

Question Text: نص السؤال اللي هيظهر للمورد. مثال: "هل تمتلك الشركة شهادة ISO 9001؟"
How the Question is Used: هل هو سؤال أساسي في التأهيل ولا اختياري؟ ممكن تحدد لو هيتربط بسيناريو معين أو Qualification Area معينة.

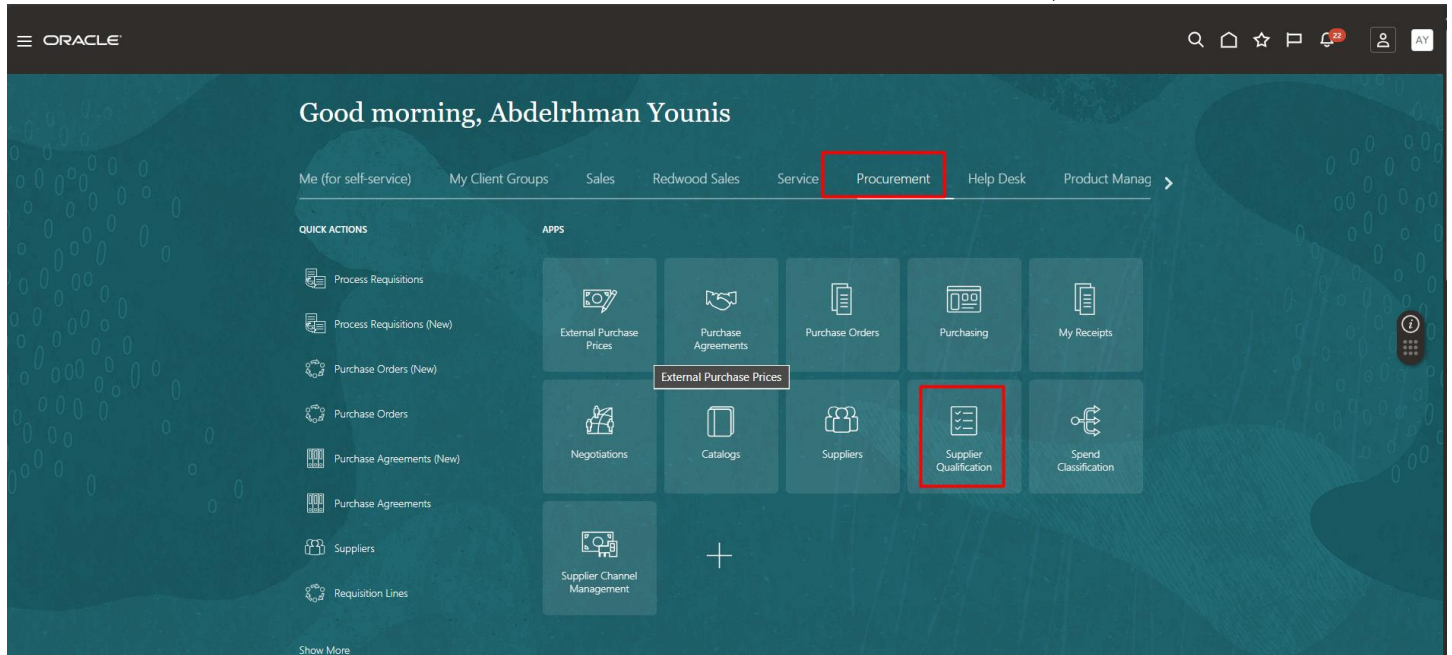

Response Type: ممكن تكون الإجابة (Date – Number – Yes/No – Multiple Choice – Text)

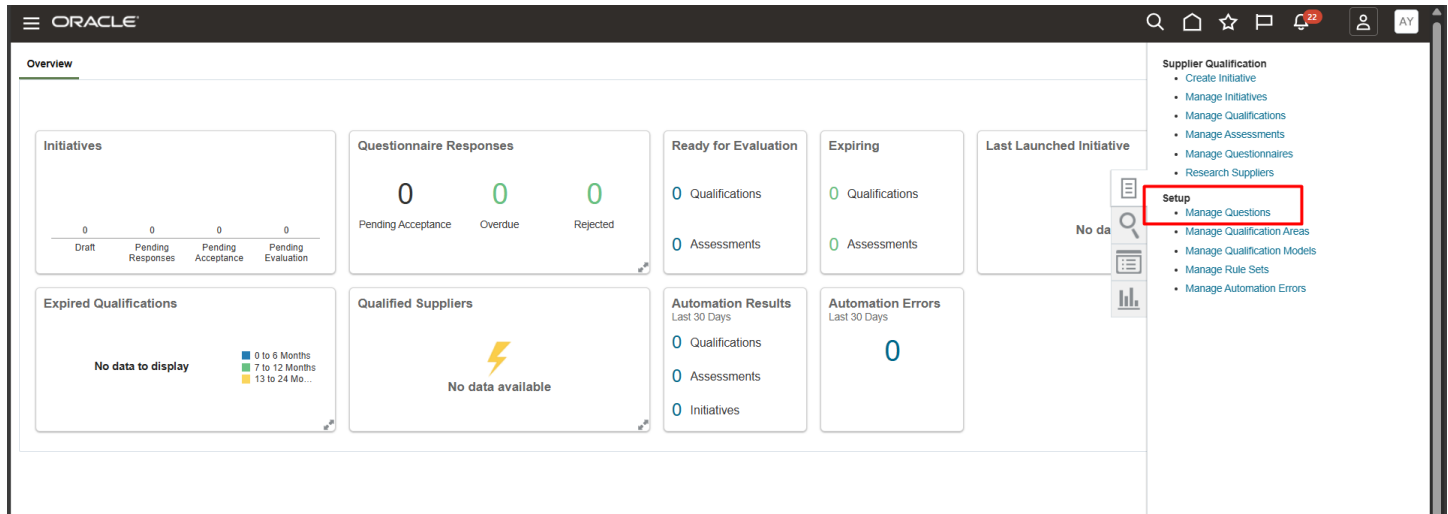

مثال عملي: لو عايز تعمل **Qualification Initiative** لموردين مواد خام، ممكن تجهز أسئلة زي:

"ما هو تاريخ انتهاء شهادة الجودة الخاصة بك؟ (Response: Date)"

"هل لديك شهادات بيئية معتمدة؟ (Response: Yes/No)"

"اذكر أكبر 3 عملاء تعاملت معهم خلال آخر 3 سنوات (Response: Text)".

Question: ده الاسم الي بتستخدمه لما تيجي تدور على السؤال في **Question Library** عشان تصنيفه لأي **Initiative**. **Status:** فيه 4 حالات أساسية

- **Draft:** السؤال لسه تحت التطوير ومش متاح يتضاف لأي Initiative لحد ما يتحول لـ **Active**.
- **Active:** السؤال جاهز للاستخدام في أي Initiative أو **Qualification Model**.
- **Inactive:** السؤال خلاص ماينفعش يتستخدم.
- **Archived:** يعني فيه نسخة أحدث من السؤال، فالأقدم اتحفظ للأرشيف بس مش هتستخدمه.
- **Revision:** هو رقم النسخة الخاصة بالسؤال (Version) السيستم بيعمل ده أوتوماتيك كل مرة تعدل السؤال. مثال: لو عدلت على السؤال مرتين، هيبقى عندك Revision 2.
- **Owner:** الشخص المسؤول عن السؤال أو Point of Contact لو حد محتاج يغيره أو يراجع محتواه. ممكن يكون أنت أو أي حد من فريق Procurement.

Critical Question: لو فعلت الخيار ده (Checked) ، يبقى السؤال مهم جدًا، يعني لازم يتجاوب عليه لأنه بيأثر بشكل مباشر على تقييم المورد.

مثال: "هل الشركة عليها أي قضايا قانونية حالية؟" – ده سؤال Critical لأنه ممكن يخلي المورد غير مؤهل.

Responder Type:

- **Supplier**: السؤال بيتبع للمورد في الـ Questionnaire مثال: "هل لديك شهادة ISO 9001؟"
- **Internal Employee**: السؤال بيتبع لموظف من شركتك (Internal Responder) عشان يدي Feedback عن المورد مثال: "قيم سرعة استجابة المورد في آخر تعامل".
- **Automatic**: لو اخترت Automatic، الإجابة بتسحب أوتوماتيك من Supplier Profile ومش بتظهر في Questionnaire. مثال عملي: لو المورد مسجل أصلاً البلد (Country = Egypt)، والسؤال "ما هي الدولة التي تعمل بها الشركة؟" – السيستم هيسحبها من Profile تلقائياً.
- **Internal Survey**: لو فعلت الخيار ده، يبقى السؤال ده جزء من Survey داخلي بيجمع رأي ناس جوه الشركة عن المورد مثال: سؤال داخلي للموظفين: "ما رأيك في التزام المورد بالمواعيد؟"
- **Response Required**: لو فعلت ده، يبقى المورد لازم يجاوب على السؤال ولو سابه فاضي، مش هيعرف يكمل Questionnaire مثال: سؤال عن "تاريخ انتهاء شهادة ISO" لازم يكون له قيمة.
- **Mapped to Supplier Attribute**: لو السؤال الي انت عامله مربوط بمعلومة معينة من بروفایل المورد (Supplier Profile)، يبقى لازم تحدد أي Attribute (خاصية) من البروفايل ده الي مرتبط بالسؤال
- لو Question Level = Supplier Site-level، يبقى الإجابة هتروح على Attributes خاصة بالموقع (Site-level).

يعني إيه Scoring؟

بعد ما المورد يجاوب على الأسئلة اللي بعثتها له (الـ Questionnaire)، تقدر تراجع إجاباته وتدي كل إجابة درجة أو تقييم رقمي (مثلاً 0 لـ 10، أو 0 لـ 100) حسب مدى جودة الإجابة بالنسبة لمتطلبات شركتك والهدف من التقييم ده إنك تقدر تعمل مقارنة بين الموردين وتشوف مين الأفضل بناءً على المعايير الي انت محددها.

أنواع الـ Scoring:

- **None**: الأسئلة هنا مش بيكون ليها تقييم رقمي مثال: لو السؤال استعلامي فقط زي "ما هو عنوانك؟" مش محتاج تقييم.
- **Manual**: انت بنفسك أو الفريق الي بيقم تراجع الإجابات ويحط درجة يدوياً لكل إجابة مثال: لو المورد قال إنه عنده شهادة ISO، تديه 10 من 10. ولو معندوش تديه 0.
- **Automatic**: هنا السيستم بيعمل التقييم أوتوماتيك بناءً على قواعد Scoring Criteria انت عرفتها مسبقاً مثال: لو الإجابة → "Yes" = ياخذ 10. ولو الإجابة → "No" = ياخذ 0.

نقطة مهمة:

تقدر تمزج بين الأسئلة اللي ليها تقييم وأسئلة مالهاش تقييم في نفس الـ Qualification Area لكن لو فعلت الـ Scoring على الـ Qualification Area، لازم يبقى فيه سؤال واحد على الأقل متقييم.

B I U S₂ S² &

How many years of experience do you have in related business?

Hint

Number of years

Attachments

None

Acceptable Response Values: يعني القيم المسموح للمورد إنه يختار منها عند الإجابة على سؤال. الفكرة هنا إنك كـ *Qualification Manager* تقدر تتحكم في الإجابات الي المورد ممكن يختارها بحيث تكون محددة وواضحة.

إزاي ده بيشتغل؟ لما تعمل سؤال في Question Library، ممكن تحدد إن المورد يجاوب من قائمة قيم جاهزة بدل ما يكتب أي حاجة (Acceptable Values) بنفسك وممكن تختار قيمة واحدة منهم وتحدد إنها Preferred Value القيمة المفضلة الي انت عايز المورد يختارها.

لو السؤال مربوط بـ **Supplier Profile Attribute**، القيم الي ظاهرة للمورد بتكون جاية من القيم المعرفة أصلاً في الـ Supplier Profile زي نوع الشركة أو نوع التصنيف ومش هتقدر تغير القيم دي من السؤال نفسه، لأنها مرتبطة بالبروفايل.

Edit Current Revision: ده معناه إنك بتعدل على نفس الإصدار الحالي للسؤال.

تقدر تعدل: (Question Text) أو (Response Text)، وكمان الترجمات بتاعتهم وAttributes زي:

Preferred Response - Hint - Allow Response Comments - Critical Question

تحذير مهم: أي تعديل هنا هياثر فوراً على كل Questionnaires اللي لسه شغالة (In-progress) يعني الموردين الي فاتحين الأسئلة هيشوفوا التحديث الجديد مباشرة وOracle بتوصي إنك تاخد تدريب وتفهم إمتى تعدل نص السؤال والإجابات، عشان ده ممكن يعمل لخبطة لو الموردين بدأوا يجاوبوا.

How You Map Questions to Supplier Descriptive Flexfields

في Oracle Supplier Qualification ، تقدر تربط الأسئلة الي بتسألها للموردين بمعلومات إضافية موجودة في Descriptive Flexfields (DFF) جوه بروفایل المورد. ال DFF عبارة عن خانات زيادة بتخزن معلومات مفيدة عن المورد مش موجودة في الحقول الأساسية.

Manage Supplier Descriptive Flexfields

Name: Supplier Profile
Flexfield Code: POZ_SUPPLIERS
Description: User-defined attributes to supplier profile

Segment Separator: .
Application: Supplier Model
Module: Common Supplier Entities

Global Segments

Segment	Name	Table Column	Value Set	Prompt
15	Office Recycling Percentage	ATTRIBUTE_NUMBER1	GSE_3_Digit_Integer	Office Recycling Percentage
25	Debt Rating	ATTRIBUTE10	PRC_Debt_Rating_Value_Set	Debt Rating

Columns Hidden: 9

Create Question

Question: Mapped to DFF
Revision: 0
Question Level: Supplier
Responder Type: Supplier
Supplier Profile Attribute: Mapped to supplier attribute
Question Type: Multiple choice with single selection
Question Text: [Empty text area]

Search and Select: Supplier Profile Attribute

Search: [Empty search box]
Category: Additional Information
Search: [Search button] Reset: [Reset button]

Supplier Profile Attribute	Category
Debt Rating	Additional Information
Office Recycling Percentage	Additional Information

OK: [OK button] Cancel: [Cancel button]

لما تيجي تبعت Questionnaire للمورد، تقدر تعمل Mapping للسؤال على Attribute معين من ال DFF ، زي مثلاً سؤال اختيار من متعدد بإجابة واحدة. (Multiple Choice - Single Selection) لو السؤال نوعه Automatic Responder، يعني مش مطلوب من المورد يجاوب عليه، هيتسحب الرد تلقائي من البروفايل ومش ه يظهر في ال Questionnaire اللي بيتبعت له. كمان لو المورد جاوب على سؤال مرتبط بـ DFF وغير القيمة، وبعد ما الموافقة تتم، القيمة الجديدة دي بتتسجل تلقائي في البروفايل بتاعه وفي نظام الردود.

How You Include Multiple Languages on Questionnaires

لو بتتعامل مع موردين عالميين أو إقليميين بلغات مختلفة، تقدر تستخدم ترجمات معتمدة للأسئلة والإجابات المقبولة لضمان إن المورد يفهم المطلوب بدقة، وده بيقلل من سوء الفهم. لما تبعت استبيان، ه يظهر النص بلغة المورد المفضلة تلقائياً. كمان، تقدر تبعت استبيانات داخلية بلغات مختلفة حسب لغة كل مستخدم داخلي. الميزة دي بتسمحلك تترجم:

- Question details in question setup
- Section names in qualification area setup
- Questionnaire title, introduction, section name, and instructions in the initiative
- Introduction text in rule set for automatically created initiatives

نصائح مهمة:

- لو المستخدم شغل صفحة فيها ترجمات، هيشوف النص بلغته المفضلة.
- لو غيرت نص بلغة هي نفسها لغة المصدر، التغيير ممكن يتعمم على باقي اللغات اللي بتشارك نفس المصدر.
- لازم تفتح نافذة "Edit Translations" وتعمل حفظ يدوي بعد التعديل.
- يفضل تستخدم خيار "Edit Current Revision" لإضافة ترجمات بدل "Create New Revision"، لأن الترجمة مش بتغير معنى السؤال.
- وأخيرًا، الردود النصية من الموردين مش بتكون مترجمة، وبيقيمها المسؤول كما هي.

How to Use Question Branching

- بتسمحك تسأل أسئلة إضافية بناءً على إجابة المورد على سؤال سابق.
1. بتبدأ بإنشاء الأسئلة الفرعية (Follow-up questions) الأول.
 2. بعد كده، تنشئ السؤال الأساسي. (Primary question)

3. لما تحدد الإجابات المسموحة في السؤال الأساسي، تقدر تربط كل إجابة بسؤال أو أكثر من الأسئلة الفرعية.

مثال: لو سألت "إلى أي منظمات صناعية تنتمي شركتك؟"، ممكن تربط كل منظمة بإجابات فرعية زي:

- هل حصلت على جوائز من المنظمة؟
- كم مدة عضويتك فيها؟
- هل أحد موظفيك كان في مجلس إدارتها؟

ملاحظات:

- الإجابة الواحدة ممكن تربطها بأكثر من سؤال.
- الأسئلة ممكن تُستخدم كسؤال رئيسي في مبادرة، وكفرعي في مبادرة ثانية.

Examples of Question Branching – مختصر مع توضيح:

السيناريو الأول:

- السؤال الأساسي: هل شركتك عامة أم خاصة؟
- الإجابات: عامة / خاصة
- لو المورد اختار "عامة" → "يظهر سؤال فرعي: ما هو تاريخ طرح الشركة في البورصة؟"
- لو المورد اختار "خاصة" → "لا تظهر أي أسئلة إضافية."

الهدف:

عرض أسئلة مخصصة بناءً على اختيار المورد لتجميع معلومات دقيقة وذات صلة فقط.

Qualification Area

Qualification Area: يعني "منطقة تقييم" أو ممكن نقول "تصنيف للتقييم"، وهي عبارة عن صندوق أو حاوية بتحت فيها شوية أسئلة علشان نقيّم المورد في نقطة معينة زي مثلاً: الجودة، الشهادات، خبرة المورد، وهكذا.

1. بتعمل **Qualification Area** مخصوص لنقطة التقييم الي عايز تراجعها.
2. بتحط فيها الأسئلة الي هتسألها للمورد علشان تعرف هو شاطر في النقطة دي ولا لا.
3. بتضيف ال **Qualification Area** دي في مبادرة تقييم (Initiative)
4. بتكوّن استبيان (Questionnaire) من الأسئلة الي فيها.
5. بتبعت الاستبيان للمورد وناس من شركتك (responders) يجاوبوا عليه.
6. لما كل الناس ترد، بتراجع الإجابات أنت وأي حد ثاني بيقم.
7. لو كل الناس وافقت على الإجابات المورد بيتأهل في المجال ده رسميًا.

ملاحظة مهمة:

لو حد عدّل في الأسئلة الي جوه ال **Qualification Area** بعد ما أنشأتها، هتلاقي علامة تحذير جنبها وساعتها تقدر تحدّث النسخة وتأخذ **Uptake Latest Revision** علشان تستخدم النسخة الجديدة من الأسئلة. ولو ما عملتش كده، النظام هيسخدم النسخة القديمة من الأسئلة.

- **Internal Survey**: لو فعلت الخيار ده، معناها إنك بتجمع آراء أكثر من شخص من داخل شركتك عن المورد.
- **Information Only**: لو علمت على الاختيار ده، معناها إن الأسئلة هنا مش هتأثر على قرار التأهيل، يعني للعلم فقط.
- **Expiration Period - "مدة صلاحية التأهيل"**: هو بيحدد إمتي **Qualification** ده هينتهي أو يبقى محتاج يتراجع ويتجدد.

- يعني بتقول إن بعد فترة معينة (مثلاً سنة)، لازم نرجع نقيّم المورد تاني.
- القيمة الي بتحددها هنا بتكون الافتراضية لأي تأهيل بيتعمل باستخدام ال Qualification Area دي.
- ولو صاحب التأهيل ال Owner حب يغير المدة دي بعدين، يقدر يعمل كده.

Default Qualification Owner: المستخدم الي هيتعين كصاحب افتراضي للتأهيل لما Qualification Area دي تتضاف في أي مبادرة تأهيل (Qualification Initiative) يعني لما أي وحدة مشتريات (Procurement BU) تستخدم ال Qualification Area دي، الشخص الي اخترته هنا هيبقى هو المسؤول عن متابعة التأهيل بشكل افتراضي ويمكن تغيره لاحقاً لو حبيت من إعدادات ال Business Unit نفسها.

Global BU Access: بتتحكم في مين يقدر يستخدم Qualification Area دي من وحدات المشتريات.

- لو علمت على Global يبقى كل وحدات المشتريات في النظام تقدر تستخدمها.
- لو ما علمتش يبقى لازم تحدد يدويًا أنهي وحدة مشتريات (Procurement BU) تقدر تستخدم ال Qualification Area دي وكمان تقدر تضيف أكثر من وحدة مشتريات.

مشاركة نتائج التأهيل مع المورد (Share Qualification with Supplier): بمعنى إنك تقدر تختار هل وازاي تحب توّري للمورد المعلومات الخاصة بالتأهيل بتاعه.

- **Summary:** يعني هتوّريه النتيجة النهائية للتأهيل (اتأهل ولا لأ)، وكمان تاريخ البداية والنهاية للتأهيل.
- **Supplier Response:** يعني هتوّريه إجاباته هو على الأسئلة الي كانت في ال Qualification Area.
- **Internal Response:** يعني هتوّريه إجابات الناس الداخليين (المقيمين أو المراجعين) على نفس الأسئلة.
- **Note:** ممكن تكتب ملاحظة أو تعليق إضافي للمورد علشان توضحله أي حاجة تخص التقييم.

Automatically populate responses – تعبئة الردود تلقائياً: لو المورد جاوب على نفس الأسئلة قبل كده في تأهيل سابق، تقدر تختار إن السيستم يملاله الردود القديمة تلقائياً في الاستبيان الجديد بدل ما يجاوب من أول وجديد. ده بيرّيح المورد ومش بيكره لكن لو عايز تحديث جديد كل مرة (زي استبيان رأي)، ممكن تلغي الميزة دي وتخليه يجاوب من الأول.

Automatically populate questionnaire responses from the same responder: نفس الفكرة بس للموظف الداخلي الي بيرد على استبيان داخلي في حالة ال Survey Areas ممكن السيستم يعيد تعبئة نفس الردود الي كتبها الموظف قبل كده تلقائياً أو ممكن تخليه يجاوب من جديد كل مرة لو محتاج ردود محدثة دايمًا.

Automatically accept responses: السيستم هيقبل الردود من الموردين أو المستخدمين الداخليين تلقائياً من غير ما محتاج تراجعهم يدوي ممكن يكون مفيد لما تكون الأسئلة بسيطة ومفيش داعي للتقييم.

Enable scoring: لو عايز تقيّم المورد بناءً على درجات للأسئلة:

- لازم تحط على الأقل سؤال واحد فيه نظام درجات (Scoring)
- لازم كمان توزع أوزان (Weights) للأسئلة، وهي نسبة أهمية كل سؤال مقارنة بالباقي والوزن الإجمالي لازم يكون 100%.

يمكن كمان تحدد:

- **Knockout score**: أقل درجة لازم المورد يحققها علشان يكمل في المعالجة.
- **Outcome ranges**: تحدد النتيجة حسب إجمالي الدرجة (مثلاً من 80 لـ 100 = مؤهل، من 60 لـ 79 = تحت المراجعة... إلخ).

Automatic initiative with single qualification: السيستم هيبداً مبادرة **Qualification** بشكل تلقائي و كل تأهيل بيتعامل لوحده ومش مستني باقي التأهيلات التانية اللي ممكن تكون في نفس المبادرة لو كانوا أكثر من واحد يعني يقدر يراجع الردود ويقبلها فوراً من غير ما يستني باقي التأهيلات والهدف منها إن الخير يراجع الرد بسرعة ومحتاج تخلصه بسرعة من غير ما تتأخر بسبب أجزاء تانية (مفيد في الحالات المعقدة اللي محتاجة سرعة).

Automatically evaluate qualification: لو كنت مفعّل التقييم بنظام الدرجات (scoring) تقدر تخلي السيستم يقيم التأهيل تلقائياً بمجرد استلام الردود وده بيوفر وقت لأن التأهيل بيتحسب تلقائياً حسب الدرجات بدون تدخل يدوي.

Automatic Requalification on Qualification Expiration: وده معناه إن النظام بيعيد تأهيل المورد بشكل تلقائي لو التأهيل الحالي انتهى أو قرب ينتهي ودخل في فترة التذكير. ده بيساعد إن المورد يفضل دايمًا مؤهل من غير انقطاع، وبيكون مفيد جدًا لو انت بتعتمد على بيانات المورد في عمليات حساسة وعازيها دايمًا محدثة وسارية.

Automatic Requalification on New Response: وده بيتفعل لما المورد يقدم رد جديد على نفس الـ Qualification Area، ساعتها النظام بيعمل تأهيل جديد تلقائياً بناءً على المعلومات الجديدة اللي المورد بعثها. الميزة هنا إنك بتضمن إن التأهيل دايمًا بيعكس أحدث البيانات من المورد، وده مهم لو الموردين بيحدثوا معلوماتهم بشكل مستمر.

Qualification Area Outcomes

Actions View Format Freeze Detach Wrap Set as Knockout

* Display Sequence	* Outcome	From Score	To Score	Knockout Outcome	Notify
10	Best	5	5		☐
20	Acceptable	3	4		☐
30	Unacceptable	1	2		☐

AI Assist: دي ميزة ذكية، تضغط عليها فيولدلك النظام أسئلة أوتوماتيك باستخدام الذكاء الاصطناعي بدل ما تكتبهم إنت من الأول.

Weight: كل سؤال ممكن تديله وزن (Weight) يحدد أهميته بالنسبة لباقي الأسئلة. لازم مجموع الأوزان لكل الأسئلة اللي فيها درجات = 100. السؤال اللي وزنه أعلى يبقى أهم في التقييم.

Knockout score: دي أقل درجة لازم المورد يجيبها في سؤال معين عشان يفضل مؤهل. لو المورد مجابش الدرجة دي، النتيجة النهائية بتتسجل **Unacceptable outcome** مرفوض.

Add icon (Qualification Outcomes section): ال Add icon هنا مش للأسئلة، لكن للنتائج. بتستخدمه عشان تضيف نتائج مختلفة ممكن المورد يطلع بيها (زي: ممتاز – مقبول – مرفوض).

Set as Knockout (only if scoring is enabled): لما تعمل Outcomes وتكون مفعّل Scoring، تقدر تحدد واحد من ال Outcomes إنه يكون خاص باللي درجتهم تحت الحد الأدنى (Knockout) ده بيخلي النتيجة تتحدد أوتوماتيك للمورد اللي درجته أقل من المطلوب.

ال **Outcome** هو النتيجة النهائية للمورد بعد تقييم الأسئلة. بتسمي النتائج دي أسماء زي – *Best – Acceptable* : *Unacceptable*. ولو مفيش تقييم يدوي، النظام بيحدد النتيجة أوتوماتيك حسب مجموع الدرجات (From Score – To Score) أو حسب Knockout score.

From Score / To Score (only if scoring is enabled): لو التقييم بالدرجات (Scoring) مفعّل في ال Qualification Area، لازم تحدد لكل Outcome نطاق درجات (من – إلى). النظام بيجمع درجات كل الأسئلة اللي المورد جاوب عليها، ولو المجموع وقع في النطاق ده يتم تعيين ال Outcome المناسب. مثلاً: من 80 إلى 100 *Best*، من 50 إلى 79 *Acceptable*، أقل من 50 *Unacceptable*.

Notify (Only if automatic evaluation is enabled): لو مفعّل خاصية التقييم التلقائي (Automatic Evaluation)، تقدر تختار إن النظام يبعث إشعار لصاحب ال Qualification Area كل مرة المورد يتقيم تلقائياً ويتعين له Outcome معين. الهدف إن المسؤول يفضل متابع النتائج أول بأول من غير ما يراجع يدوي.

Create Qualification Questions with Generative AI

لما الشركات بتحب توسّع أو تبدأ برنامج تأهيل موردين (Supplier Qualification) جديد في مجال معين، يكون الموضوع بياخد وقت طويل (بحث – إعداد أسئلة – تحديد متطلبات الاستبيان). هنا بييجي دور ال Generative AI اللي بيساعد بشكل كبير في تسريع إنشاء Qualification Area جديدة واقتراح الأسئلة بشكل أوتوماتيك.

خطوات استخدام: AI Assist

1. تدخل اسم ووصف للـ Qualification Area.

2. في Questions and Outcomes تضغط على زر AI Assist.

3. ال AI بيولّد لحد 10 أسئلة مقترحة عن موضوع ال Qualification Area مثلاً: استشارات للبنس
4. تراجع نصوص الأسئلة وتشوف الأنسب، وتمسح الي مش محتاجه.
5. تعدّل تفاصيل أي سؤال (الاسم – النوع – نوع المجيب – نمط التقييم).
6. ممكن تغيّر الوصف وتضغط AI Assist ثاني علشان يعيد توليد أسئلة جديدة.
7. بعد الاختيار، الأسئلة بتضاف في حالة Draft داخل ال Qualification Area ، وتقدر تعدلها قبل التفعيل.

AI Assist

Does your organization have a dedicated team or department focused on sustainability and environmental practices?

What specific initiatives or programs has your organization implemented to reduce its environmental impact?

Which methods do you use to ensure compliance with environmental regulations and standards?

Have you set clear targets for improving sustainability and reducing environmental impact?

Do you provide training programs to educate employees about environmental stewardship?

إيه اللي بيعمله ال AI غير نص السؤال؟

- يقترح اسم السؤال.
- يحدد Responder Type مين اللي هيجاب: مورد / داخلي.
- يحدد Question Type اختيار – نص – رقم... إلخ
- يقترح Scoring Model ويحدد إجابات مقبولة ويعيّن لكل واحدة درجة مناسبة لو فيه تقييم.

Limitations: - الأسئلة المولدة دائماً بالإنجليزية (لسه مفيش دعم للغات ثانية).

- الخاصية شغالة فقط لو ال Qualification Area في حالة Draft.
- مش مدعومة لل Survey Qualification Areas.
- الأسئلة ممكن يكون فيها أخطاء، فلانم تتراجع وتتأكد قبل التفعيل.

Qualification Model

ال Qualification Model هو زي وعاء (Container) بيجمع جواه مجموعة من ال Qualification Areas الهدف منه إنك تعمل تقييم شامل (Assessment) للمورد لما تيجي تعمل Assessment Initiative ، لازم تختار Qualification Model واحد يحتوي على منطقة أو أكثر من ال Qualification Areas

الأسئلة اللي جوه ال Qualification Areas هي اللي بيتبني منها الاستبيان (Questionnaire) اللي بيتبعث للموردين والمجيبين الداخليين (Internal Responders) بمجرد إطلاق ال Initiative ، النظام بيعمل Draft Qualifications و Draft Assessments تلقائياً.

لو حاولت تستخدم Qualification Model لكن فيه (Qualification Areas) اتعدلت أو اتحدثت، النظام بيظهرلك Alert Icon لازم تعمل Uptake Latest Revision علشان تحدث ال Model وتأخذ أحدث نسخة لو ما عملتش التحديث، ال Model هيسخدم النسخة القديمة من ال Qualification Area.

إزاي بيتم ال Responses & Evaluation

1. جمع الردود:

- الموردين وال Internal Responders يجابوا على الاستبيان.
- تقدر تراجع الردود وتقبلها أو تبعثها ثاني علشان يتعدلوا.

بعد ما المورد يعدل ويرجع يرسل، وتقبل الردود، كل ال Qualifications تبقى في حالة **Ready for Evaluation** التقييم (Evaluation):

- المراجعين (Reviewers) المعيّنين يراجعوا ردود المورد ويحددوا Outcome لكل Qualification.
- ال Outcomes دي أنت بتكون محددها وقت ما أنشأت ال Qualification Model مثلاً **Acceptable** أو **Unacceptable**

تفعيل Assessment: لما كل ال Qualifications تتقيّم ويتحدد لها Outcomes نهائية، ال Assessment نفسه بيتفعل (Active).

The screenshot displays the 'VISION' system interface for creating a qualification model. The top navigation bar includes the 'VISION' logo and a search bar. The sidebar on the right lists various menu items under 'Supplier Qualification' and 'Setup'. The main content area is titled 'Create Qualification Model: Overview' and contains several sections:

- Initiatives:** A table showing the status of initiatives (Draft, Pending Responses, Pending Acceptance, Pending Evaluation) with counts for each.
- Questionnaire Responses:** A section showing counts for Pending Acceptance, Overdue, and Rejected responses.
- Ready for Evaluation:** A section showing counts for Qualifications and Assessments.
- Expiring:** A section showing counts for Qualifications and Assessments.
- Last Launched Initiative:** A section showing 'No data available'.
- Expired Qualifications:** A section showing 'No data to display'.
- Qualified Suppliers:** A bar chart showing compliance rates for Compliance (0.97%) and Hub Zone (0.97%).
- Automation Errors:** A section showing 'Last 30 Days' with a count of 0.

The 'Create Qualification Model: Overview' form includes the following fields and options:

- Qualification Model:** YO Qualification Model
- Revision:** 0
- Description:** YO Qualification Model
- Owner:** Younis, Abdelrhman
- Supplier Eligibility:** ☒ Sourcing, ☐ Share eligibility
- Business Units:** ☒ Owing Procurement BU: YO Nokia, ☐ Global BU access
- Business Unit Access:** ☒ Business Unit Access
- Assessment Owner:** YO Nokia, Younis, Abdelrhman
- Scoring and Automation:** ☒ Enable scoring, ☒ Automatically evaluate assessment
- Automatic Reassessment:** ☒ On new qualification
- Classification:** Subject: [dropdown], Standards Organization: [dropdown]

Share Assessment with Supplier: تقدر تشارك نتائج التقييم مع الموردين لو اخترت **Summary option** المورد يشوف ملخص بعد ما تنهي التقييم الي ممكن يتشارك:

Summary: النتيجة (Outcome)، تاريخ البداية، تاريخ النهاية.

Qualifications: تفاصيل المؤهلات (المعلومات الي اتقيم بيها المورد).

Note to Supplier: تقدر تضيف ملاحظة، والمورد يشوفها مع التقييم.

ABDELRAHMAN YOUNIS

Qualification Model Level: ده بيحدد مستوى التقييم (Assessment) اللي بيتعمل باستخدام الموديل: **Supplier site level** يعني تقييم خاص بموقع المورد أو **Supplier + Supplier site level** يعني تقييم على المورد ككل + المواقع بتاعته.

Enable Scoring: لو فعلت Scoring للموديل لازم يبقى على أقل Qualification Area فيها Scoring محدد وكمات جواها فيها سؤال واحد على الأقل له Scoring ونتائج الموديل بتتحدد بناءً على إجمالي الدرجات (Total Score) عادةً بتحدد لكل نتيجة (Outcome) مدى درجات: من درجة كذا لدرجة كذا.

Automatically Evaluate Assessment (فقط لو Scoring مفعل): تقدر تخلي التقييم يتقيم أوتوماتيكياً النظام بيستخدم معلومات الدرجات اللي اتعرفت مسبقاً في Outcomes علشان يطلع النتيجة.

Automatic Reassessment on New Qualification: تقدر تخلي النظام يعمل إعادة تقييم أوتوماتيكياً لو المورد اتعمله Requalification جديد الهدف منه تفضل نتيجة التقييم (Assessment Outcome) دايمًا محدثة، من غير ما تحتاج تدخل يدوي.

Supplier Eligibility: ال Model اللي بتبنيه في ال Supplier Qualification Management ممكن تستخدمه علشان تقيم وتحدد إذا المورد مؤهل ولا لأ.

- Sourcing:** تقدر تستخدم الموديل علشان تقيم المورد وتشوف هل هو مؤهل يدخل مفاوضات (Negotiations) في منطقة ال Sourcing ولا لأ. التقييم ده بيكون على مستوى Procurement BU معين يعني ببساطة: قبل ما تسمح لمورد يدخل في مناقصة أو تفاوض، النظام هيشيك على أهليته عن طريق الموديل ده.
- Share Eligibility:** الاختيار ده بيخليك تشارك نتيجة تقييم أهلية المورد اللي طلعت من ال Assessment مع وحدات أعمال مشتريات ثانية Procurement BUs بدل ما كل BU تعيد نفس التقييم من الأول كمان السيستم بيعمل تحديث لأهلية المورد الافتراضية في ال Sourcing، ببساطة: بدل ما المورد يتقيم أكثر من مرة في كل وحدة مشتريات، تقدر تعمل مشاركة للنتيجة وتسهل الموضوع.

Display Sequence	Outcome	From Score	To Score	Knockout Outcome	Notify
10	5 Stars, Preferred	86	100		☐
20	4 Stars	61	85		☐
30	3 Stars	51	60		☐
40	2 Stars	41	50		☐
50	1 Star	21	40		☐
60	Avoid, Do Not Use	0	20		☐

Notify: الخاصية دي بتظهر بس لو اخترت إن التقييم يتعمل أوتوماتيك (Automatically Evaluate Assessment) يعني لو النظام قيم المورد بشكل أوتوماتيك وطلع له Outcome معين، تقدر تختار إن بيعت إشعار (Notification) لـ (Assessment Owner) الغرض منها إن المسئول يعرف على طول إن في تقييم اتعمل ونتيجته وصلت، بدل ما يفضل يراجع يدوي أو يدور عليها.

Initiatives

لما بتبدأ Initiative، بتبعت استبيان سواء للمورد نفسه أو لناس جوه شركتك. بعد كده المورد أو الشخص الداخلي بيرد على الأسئلة، وال Qualification Manager بيراجع الردود دي، ولو لقي نقص في معلومة يقدر يطلب تفاصيل إضافية. بعدين بييجي دور فريق التقييم (Evaluation Team) اللي بيقدم الردود ويحط النتيجة النهائية: المورد مؤهل أو غير مؤهل. أثناء ما ال Initiative شغالة، تقدر تتابع تقدمها، تبعت تذكير بالرد، تغير المسؤول اللي هيرد، أو حتى ترد مكانه لو لازم. في الآخر، لما تجمع ردود كفاية، بتقفل الاستبيان وتبدأ التقييم.

دورة حياة ال Supplier Qualification كلها ماشية بالشكل ده:

1. البدء: ال Qualification Manager يعمل Initiative.
2. جمع المعلومات: المورد أو المستجيب الداخلي يرد على الاستبيان.
3. المراجعة: ال Manager يراجع ويقبل أو يطلب تفاصيل زيادة.
4. التقييم: فريق التقييم يحلل الردود ويحط Outcome للمورد.
5. المتابعة: ال Manager يراقب حالة المؤهلين ويعيد تقييم الموردين لو فيه أي تحديث أو معلومات جديدة.

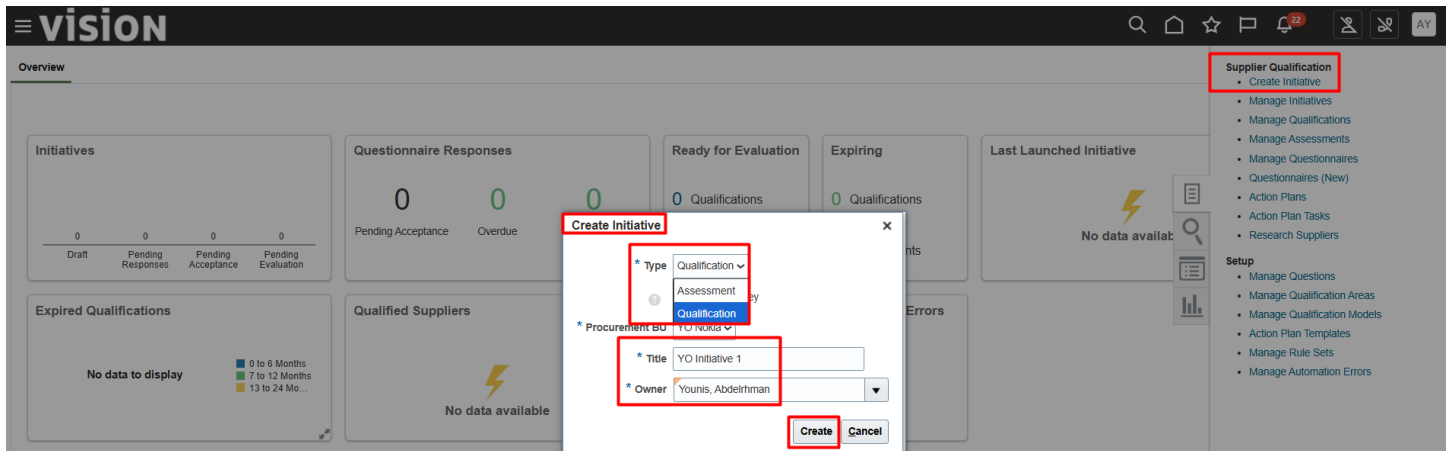

نوعين من ال Initiative:

1. Qualification Initiative

- تختار فيها واحد أو أكثر من Qualification Areas مثلاً Quality, Financial Stability, Compliance وكل Area بتتحول ل Qualification Record بعد ما المورد يجاوب.

2. Assessment Initiative

- تختار فيها واحد Qualification Model وال Model ده جوه أصلاً فيه واحد أو أكثر Qualification Areas النتيجة: يطلعك Qualifications + Overall Assessment.

ABDELRAHMAN YOUNIS

Choose Procurement BU: تحديد ال Procurement BU (Business Unit) اللي هيكون مالك ال Initiative لما تختار BU تقدر تشوف بس ال Qualification Areas وال Models اللي تخص ال BU ده و كمان هتقدر تشوف ال Global Models & Areas يعني اللي متاحة على مستوى BUs كلها.

Initiative مش بس للموردين – كمان فيه **Internal Survey** مش كل مرة هتقيّم الموردين بأرقام Quantitative Metrics زي % of on-time delivery أو Defect Rate ساعات محتاج رأي ال Internal Stakeholders اللي بيتعاملوا مع المورد بشكل يومي هنا بتستخدم Initiative ك **Internal Survey**:

- تبعث أسئلة لا internal responders مثلاً موظفين في Procurement أو Operations
- الأسئلة ممكن تبقى عن Professionalism أو Ease of Doing Business أو Responsiveness
- سرعة الرد ف تقدر تجمع ال Feedback وتطلع Report عن المورد من منظور الناس اللي بيتعاملوا معاه.

في ال Initiatives تقدر تظبط إن ال questionnaires يتبعثها automatic reminders بشكل دوري. الفكرة إن منظمات كثير بتحب تعمل Surveys داخلية أو لموردين علشان تجمع Feedback عن الأداء، بس ساعات ال

ABDELRAHMAN YOUNIS

Responders ما يبردوش في الوقت المناسب. علشان كده تقدر تظبط إن السيستم بيعت reminders أوتوماتيك حسب جدول زمني انت محدده. الموضوع ينفع مع internal responders وكمان مع suppliers علشان تزود ال response rate من غير مجهود إضافي.

لازم الأول تحدد response due date، وبعد كده تقدر تعمل schedule لحد 3 reminders أوتوماتيك لل responders كمان تقدر تحط جدول reminders مختلف للموردين supplier questionnaires وال internal questionnaires جوهر نفس initiative.

Questions

Section Name Management

Instructions Please follow the standard

1. Assess the supplier's ability to manage their own staff members during the project timeline. This will be for service suppliers. Does not include material suppliers.

☐ a. Excellent

☐ b. Very well

☐ c. Adequate

☐ d. Poor

- **Close Date:** اليوم الي فيه ال questionnaires هتقفل أوتوماتيك لكل الموردين.

ABDELRAHMAN YOUNIS

- **Close Threshold**: ده بيحدد نسبة أو عدد معين من الردود، ولما يتحقق بعد الdue date ، السيستم يقفل ال questionnaires أوتوماتيك للمورد حتى لو لسه ال Close Date ما وصلتش مثلاً نسبة معينة زي 80% من الردود، ولما توصلها يقفل questionnaires. الميزة دي متاحة في internal survey initiatives بس.

وأخيراً، في **Scheduled Processes work area**، لازم تعمل schedule لل ESS automated task اللي اسمه **Perform Automated Tasks for Supplier Qualifications**، وتشغله كل يوم. ده اللي بيتكفل بيعت التذكيرات (reminders) وال notifications أوتوماتيك حسب الباراميترز اللي انت حاطتها في initiative.

في نفس صفحة Questionnaire بيبقى عبارة عن واحد أو أكثر من ال sections، وكل section في الأول بيكون تابع ل Qualification Area من الصفحة دي تقدر تغير عناوين ال sections وتكتب تعليمات لل responders، ولو ال Initiative فيها qualification areas فيها automatic evaluation enabled، تقدر تختار إن ردود ال Questionnaire دي تتقبل أوتوماتيك. في الحالة دي، السيستم هiestخدم ال scoring information وردود المورد علشان يحدد ال qualification outcome بشكل تلقائي.

وكمكان ممكن تنقل ال sections من مكان لمكان، أو تنقل الأسئلة جوه نفس ال section أو بين ال sections المختلفة. تقدر كمان تضيف section جديدة وتنقل ليها الأسئلة الموجودة، أو تحذف سؤال لو مش Required بالإضافة لكده،

The screenshot displays the 'Internal Questionnaire' interface. On the left, there's a form for 'YO Internal Survey 1' with fields for 'Due Date', 'First Reminder', 'Second Reminder', and 'Past Due Reminder'. Below this is the 'Questions' section with a 'Section Name' of 'Management' and 'Instructions' that say 'Please follow the standard'. Two questions are listed, both asking to assess the supplier's ability to collaborate with the company. A 'Move Question' dialog box is open in the center, showing a list of questions and sections. The 'Position' is set to 'Before selected location'. The 'Location' is set to 'Section: Management'. The 'Add Section' button is highlighted in red. The 'OK' button is also highlighted in red. On the right, there's a 'Preview' button and a 'Percent responses received' section.

How Qualifications / Assessments Are Evaluated

بعد ما المورد يرد على الأسئلة اللي اتبعتله، وإنك كـ Qualification Manager تقبل الردود (يعني تتأكد إنها مكتملة وصحيحة)، تيجي المرحلة الثانية وهي التقييم. هنا بتبدأ تشوف إذا المورد استوفى المتطلبات ولا لا. أول خطوة إنك تقدر تبعت إشعار لفريق التقييم كله إن في Qualification بقت جاهزة للتقييم. ده مهم جدًا لأن مش لازم تستنى شخص واحد يبتدي، أي حد من الفريق عنده وقت ممكن يدخل ويقيم على طول. النتيجة إن الوقت الكلي للتقييم بيقبل، والمورد ما يستناش كثير عشان يعرف وضعه.

الـ Evaluators (المقيمين) بيظهرلهم إشعارات في الـ Watchlist أو في الـ Ready for Evaluation Infolet أول ما يضغطوا على اللينك، بيتحولوا لصفحة Manage Qualifications أو Manage Assessments.

- صفحة Manage Qualifications بتعرضلك كل الـ Qualifications اللي جاهزة للتقييم.
- صفحة Manage Assessments بتعرضلك الـ Assessments الجاهزة ودي بتبقى تجميع لعدة Qualifications Area.

نقطة مهمة: لو في الـ Assessment Initiative يعني مجموعة Qualifications + Assessment واحد شامل، لازم الأول تقيم كل الـ Qualifications الخاصة بالمورد وبعدين تروح تقيم الـ Assessment الكبير. وبعدين عشان تبدأ فعليًا، بتحدد الـ Qualification اللي عايز تقيمها وتضغط على زر الـ Evaluate Qualification، وهتبتدي عملية التقييم.

مثال بزئس: خرينا نقول شركة بتأهل مورد جديد لتوريد معدات IT المورد جاوب على الأسئلة الخاصة بـ: (Financial Viability) و شهادات الجودة (Quality Certifications) و خطة الاستدامة (Sustainability Plan). بعد ما المورد بعت الردود، المسؤول قبلها ودلوقي فريق التقييم اتبعتلهم إشعارات. أحمد في الفريق عنده وقت، دخل يقيم الملاءة المالية، وسارة قيمت شهادات الجودة، وبعدين التقييمات اتجمعت. لما كله خلص، الفريق قدر ينتقل يعمل الـ Assessment نهائي للمورد. النتيجة طلعت إنه مؤهل للتعامل. العملية دي بتنظم الشغل، بتسرّع التقييم، وبتدي صورة أوضح عن المورد من أكثر من زاوية.

Automatically Evaluating a Response Having Scored Questions

أول ما تقبل ردود المورد، حالة ال **Assessments / Qualification** بتتغير ل **Ready for Evaluation** هنا النظام بيشتغل كده:

- لو في أسئلة معمول لها **Auto Scoring**، السيستم بيحسب درجاتها أوتوماتيك حسب ال Scoring Model
 - لو في أسئلة محتاجة **Manual Scoring**، إنت تقدر تدخل الدرجات بنفسك.
 - السيستم على طول بيجمع الدرجات دي كلها ويطلعك **Overall Score** للـ Qualification.
 - بناءً على ال Overall Score ده، النظام بيحدد ال **Outcome** .:
- Knockout Criteria**: لو في سؤال أو أكثر ليه Knockout Criteria (يعني لازم المورد يحقق شرط معين أساسي) ، والرد بتاعه مش مطابق، السيستم بيغير النتيجة كلها ل **Knockout Outcome**، ويخلي الدرجة أقل درجة مرتبطة بالنتيجة دي في حالة ال **Assessments / Qualification**
- Override**: إنت كـ Qualification Owner تقدر تعدل النتيجة أو الدرجة يدويًا حتى لو Knockout اتطبق. وفي الحالة دي السيستم بيسجل مين الي عمل التعديل، امتي، وليه.
- ملحوظة**: بعد ما ال **Assessments / Qualification** يتعمله **Finalize** (يعني خلص واتقفل)، النتيجة والدرجة بتبقى **Fixed** ومينفعش تتغير تاني.

How You Automatically Requalify Qualifications

بعد ما المورد بيتم تقييمه (Evaluation) والتأهيل (Qualification) بيتقفل أو يخلص، وقتها تقدر تعمل معاملات مع المورد بشكل طبيعي (تشتري منه أو توقع عقود). لكن لو التأهيل ده قرب ينتهي أو خلص فعلاً، أو في رد جديد اتسجل من المورد، لازم تبدأ عملية إعادة التأهيل (**Requalification**) علشان تفضل قادر تكمل التعامل معاه.

هنا بييجي دور **Automatic Requalification**

لما تيجي تفعل إعادة التأهيل التلقائية (**Automatic Requalification**) في Oracle ، إنت بتتحكم إيه المؤهلات أو ال qualification areas اللي عايز السيستم يعيد تأهيلها أوتوماتيك — وده بيتطلب على مستوى ال qualification area أو ال qualification نفسه. النظام بيرقب ثلاث حالات علشان يقرر يعمل إعادة تأهيل:

- (1) لو التأهيل داخل فترة التذكير بالانتهاء (قرب يخلص)، أو لو التأهيل انتهى فعلاً
- (2) لو في رد جديد وصل من المورد على أسئلة معينة.

الحاجات اللي تخص نفس ال supplier ونفس ال supplier site ونفس ال — contact بتتجمع مع بعض وتتبع في **Requalification Initiative** واحد بدل ما يبقي منفصل؛ ده بيقلل الارتباك ويخلي المتابعة أسهل

السيستم بينشئ ويشغل ال **initiative** أوتوماتيك ويرسل questionnaires لكل ال responders حتى لو هم قبل كده كان عندهم إجابات محفوظة — الهدف إنك دايماً تجيب معلومات محدثة وما تسبش فجوة ممكن توقف التعامل مع المورد. ال responders بياخدوا إشعار إن في requalification جارية ومطلوب منهم يردوا.

أما لو السبب هو إن فيه رد جديد اتسجل (يعني المورد بعث إجابة جديدة تكفي للتقييم)، فالنظام ممكن ما يعملش initiative ولا بيعت — questionnaire بالعكس هستخدم الرد الجديد على طول ويعمل **qualification** جديد مباشرة لو الرد مكتمل، من غير لفة على مبادرات ولا استبيانات، عشان نسرّع التحديث لما المعلومات متوفرة بالفعل.

ABDELRAHMAN YOUNIS

تقدر تعمل جدولاً لبرامج تشغيل إعادة التأهيل (Requalification Batch Programs) بحيث تشتغل إما مرة واحدة (one-time) أو بشكل دوري (periodic) لو عملتها بشكل دوري، كده بتكون عملت أتمتة كاملة لعملية إعادة التأهيل، والنظام هيشغل البرامج تلقائي ويعيد تقييم المؤهلات بدون تدخل يدوي.

Name	Description
Perform Automated Tasks for Supplier Qualifications	Performs automated tasks for supplier qualifications, such as sending response reminders or close questionnaires.
Requalify Supplier Qualifications	Performs requalification of suppliers.

OK Cancel

أثناء التشغيل ممكن تحصل أخطاء سواء عند إطلاق مبادرة إعادة التأهيل أو عند إنشاء ال qualification نفسه، والجميل إنك تقدر تتابع وتصحيح الأخطاء دي من صفحة **Manage Automation Errors**

Event-Based Initiative and Qualification Creation

بدل ما إنت كمشتري أو Qualification Manager تروح بنفسك كل مرة وتفتح Initiative جديدة عشان تقيّم مورد، ولما الموردين يردوا على ال questionnaires، تعمل Accept responses بنفسه بعد كده تعمل Evaluation وتقرر النتيجة النهائية finalize qualification or assessment في الآخر، لو محتاج، بيعمل Qualifications بناءً على النتائج دي. السيستم يقدر يعمل ده أوتوماتيك بمجرد حصول Event حدث معين زي:

1. Self-service supplier registration request

يعني المورد دخل بنفسه على ال portal وسجل نفسه كمورد جديد في الحالة دي الشركة تبعته questionnaire علشان تقيمه قبل ما توافق على تسجيله.

2. Approved supplier registration request

يعني الطلب بتاع التسجيل (سواء كان المورد هو اللي قدّمه أو حد من جوه الشركة اتوافق عليه هنا الشركة ممكن تبعت questionnaire ثاني علشان تتأكد إن المورد فعلاً جاهز يدخل في التعامل.

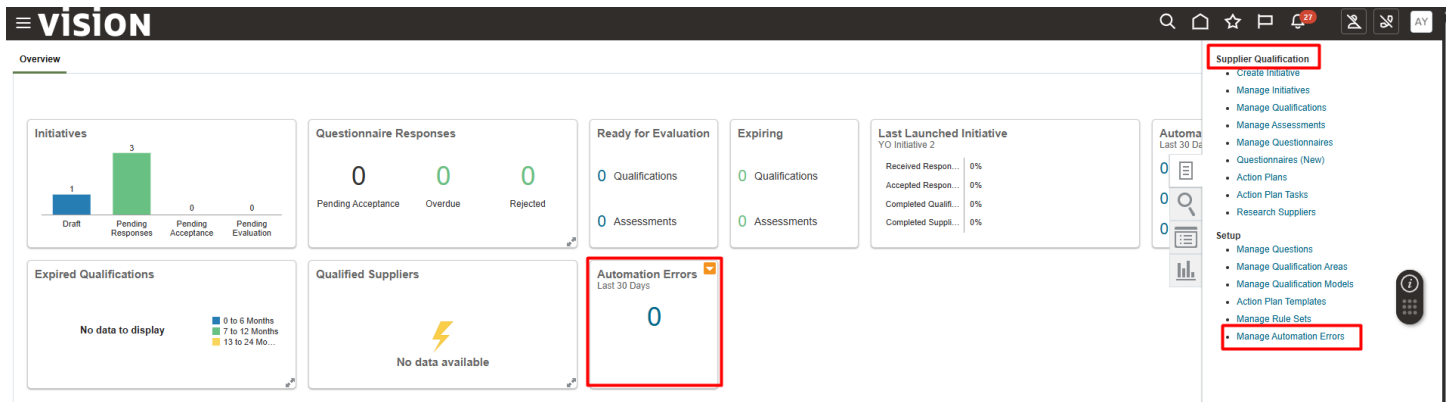

3. Supplier promotion from prospective to spend authorized

يعني المورد اتنقل من مرحلة إنه "مرشح محتمل (prospective)" إلى إنه مورد معتمد فعلياً Spend Authorized هنا لازم الشركة تتأكد إنه فعلاً مؤهل من ناحية الجودة، السلامة، أو الالتزام بمعايير الشركة قبل ما تبدأ تطلب منه أو تدفعه فلوس.

الميزة هنا إن موضوع Qualification اللي عادةً بياخد وقت طويل وممل (إرسال Questionnaire – المورد يجاوب – إنت تراجع – تديله Outcome) كله ممكن يتعمل أوتوماتيك. إزاي؟ إنت بتبني **Rule Set** لل Event ده، وال Rule Set ده بيحدد الأسئلة اللي تتبعت للمورد، إزاي تتقيّم، وإيه النتيجة اللي تطلع. كده أي مورد جديد أو مورد اترقى بيتأهل أو يترفض من غير تدخل يدوي.

لما تربط ده مع Automated Scoring و Automatic Evaluation اللي شرحناهم قبل كده، الموضوع كله بيبقى شبه Touchless Qualification Process (المورد يقدم – السيستم يبعته – المورد يجاوب – السيستم يقيم أوتوماتيك – النتيجة تطلع).

طيب، لو حصل Error أثناء العملية دي؟ زي مثلاً سؤال مش متظبط، أو Rule Set ناقص حاجة، السيستم بيعمل Log للغلط ويعرضه في **Automation Errors Infolet** اللي بتشوفه من Supplier Qualification هناك تلاقي ملخص بكل الأخطاء اللي حصلت. ولو عايز تفاصيل أكثر، فيه صفحة اسمها **Manage Automation Errors** تقدر تدخل عليها وتشوف السبب بالظبط، وكمان السيستم يدريك Recommendations عشان تصلح المشكلة.

Create Rule Sets

إحنا ذكرنا فوق واحنا بنشرح ال **Rule Sets** ده المكان اللي بيحدد إمتى وإزاي السيستم يولد ويبعت Questionnaire للموردين وقت ال registration أو approval أو promotion. جوّه ال Rule Set بتحت Qualification Areas فيها أسئلة والسيستم بيستخدمهم علشان يبني ال Questionnaire.

ايه اللي بيحصل أول ما المورد يعمل registration؟

- النظام يشيك على ال Rule Sets اللي متوصّلة بعملية التسجيل.
- لو فيه Rule Set مربوط بالحدث، التطبيق بيولد questionnaire مكوّن من الأسئلة اللي في ال Qualification Areas المحددة في ال Rule Set.
- المورد (لو تسجيل خارجي) يجاوب على ال Supplier Questionnaire، أما لو تسجيل داخلي فال Internal Questionnaire ييجي للمستخدم الداخلي اللي بدأ الفلو أو للمُقيّم المحدّد والسيستم يقدر يستخدم الردود دي علشان يقيم المورد ويحدث بياناته تلقائيًا في Supplier Profile.
- لو نفس Qualification Area موجودة في أكثر من registration Rule ، approval ، promotion النظام مش هيكسر الاستبيانات؛ هيبعت استبيان واحد لو مطلوب، وهينتج Qualification واحد مبني على الردود.

شروط مهمة لما تعمل Qualification Areas لل Rule Set

- الأسئلة تكون على Supplier Level مش Site Level.
- تكون الأسئلة Active مش disabled.
- لو بتستخدم Areas موجودة، اتأكد إنها مُحدّثة وأنها مناسبة لل BU اللي اخترته أو معموله Global.

Business Relationship Registration Source Question Branching

Procurement BU: اختر ال Business Unit الي rule set دي هتطبق عليها.

Allow Branching: لو محتاج أسئلة فيها منطق تفرّع (conditional questions) فعلها.

Automatically create qualifications: السيستم هيوّلد الاستبيانات تلقائياً أول ما المورد يعمل تسجيل جديد، بناءً على ال Qualification Areas الي موجودة في ال Rule Set. ولما المورد يجاوب على الأسئلة دي، السيستم هيقول ال Qualifications بشكل أوتوماتيك ويربط (map) إجابات المورد مع كل Qualification علشان تبقى جاهزة للتقييم من غير تدخل يدوي. بمعنى ثاني، السيستم بيقيم بكل الخطوات لوحده: يوّلد ال Questionnaire، بيعتله للمورد، وبعد ما المورد يرد، يحوّل الردود دي تلقائياً إلى Qualifications جاهزة للمراجعة.

Sourcing Qualification Model: بتقدر تحدد إيه المؤهلات أو الأسئلة (Qualification Areas) الي لازم المورد يجاوب عليها أو يحققها قبل ما يسمحوله يشارك في أي **Sourcing Cycle**.

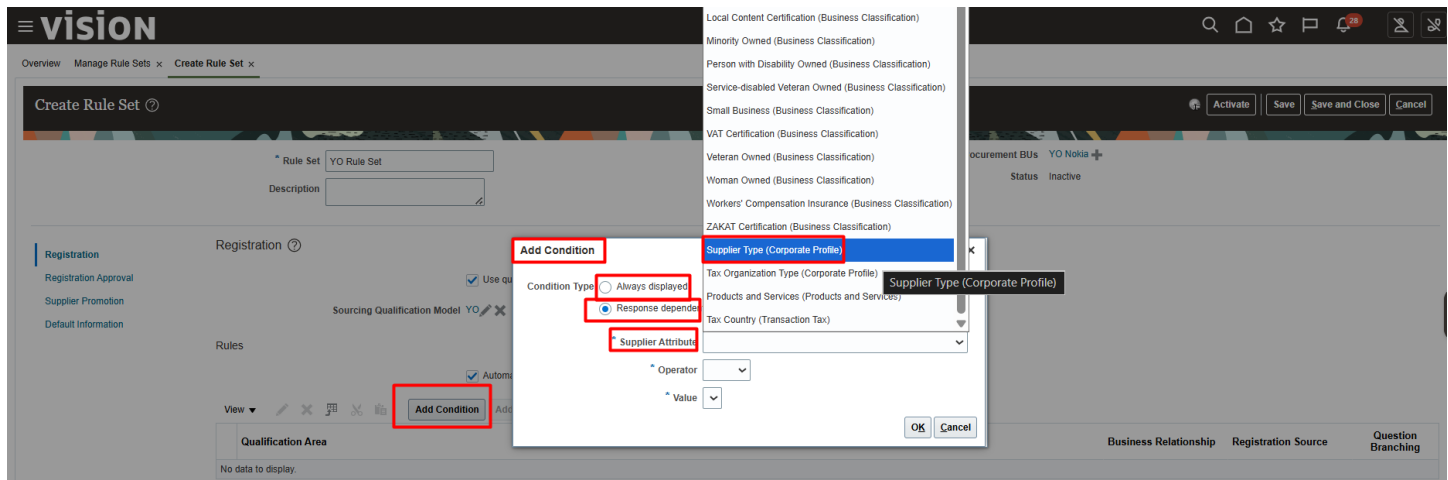

Registration Source: وده معناه إنك تقدر تحدد الشرط اللي في Rule Set يشتغل بناءً على مصدر تسجيل المورد —

— **External Registration تسجيل خارجي:** ده بيحصل لما المورد هو بنفسه يدخل على لينك التسجيل العامة اللي الشركة حاطاها، ويقدم بياناته بنفسه Self-Registration.

— **Internal Registration تسجيل داخلي:** ده بيحصل لما التسجيل بيدأ من داخل الشركة نفسها، مش من المورد، وده ليه 3 سيناريوهات رئيسية:

- **Category Manager:** ممكن وهو بيجهز Sourcing Negotiation (زي مناقصة أو طلب عرض أسعار) يكتشف مورد جديد ويفتحه تسجيل داخلي علشان يدخله في العملية.
- **Requester:** ممكن من خلال Oracle Self Service Procurement يعمل طلب تسجيل لمورد علشان يشتري منه حاجة.
- **Buyer:** ممكن يقدم طلب تسجيل داخلي للمورد الجديد اللي الشركة ناوية تتعامل معاه.

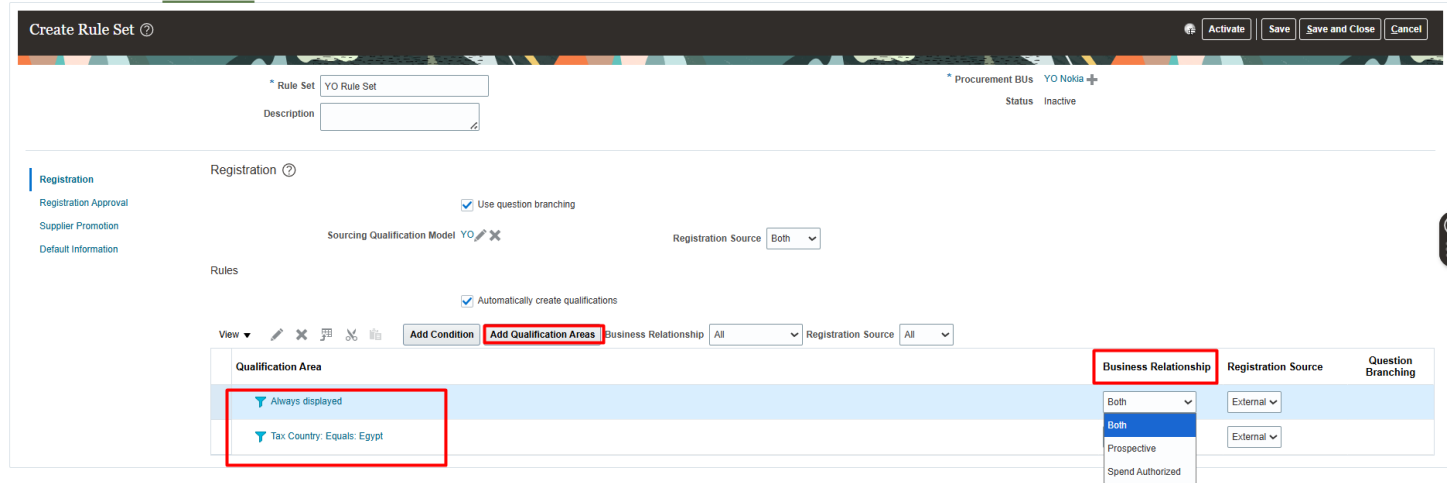

مثال: لو عايز تبعت Questionnaire خاص بتقييم الأمان المالي بس للموردين اللي سجلوا أنفسهم (External)، يبقى تضيف شرط في Rule Set يقول إن Registration Source = External أما الموردين اللي الشركة نفسها سجلتهم (Internal)، ممكن تبعتلهم Questionnaire مختلف خاص بالتأهيل الفني مثلاً.

Always Displayed: يعني الأسئلة دي هتكون موجودة دائماً في الاستبيان لأي مورد.

Response Dependent: يعني الأسئلة دي مش هتظهر غير لو المورد جابوب إجابة معينة تطابق الشرط اللي إنت محدده لو اخترت Response Dependent، يبقى تحدد الشرط اللي لازم الإجابة توافيه.

Supplier Profile Attribute: هنا بتختار خاصية من خصائص المورد (زي مثلاً بلد المورد، نوع الشركة، الفئة، إلخ). باستخدام الخاصية دي، ومعها الثانية Operator و Value، بتقدر تبني شرط يعتمد على بيانات المورد.

Business Relationship: هنا بتحدد العلاقة التجارية اللي ينطبق عليها الشرط — يعني عايز تستخدم الـ

Qualification Area دي مع الموردين اللي حالتهم: **Prospective** لسه مورد محتمل ولا **Spend Authorized** مورد معتمد ممكن تعمل معاه معاملات مالية كده تقدر تتحكم في إن الشرط ده يشتغل بس على الموردين اللي في مرحلة معينة من دورة حياتهم.

بعد ما تخلص من إنشاء الشرط (زي ما شرحنا فوق)، بتضغط على **Add Qualification Areas**. ودي الخطوة اللي بتقول للسياستم: لو الشرط ده اتحقق، استخدم الـ Qualification Areas دي في الاستبيان اللي هيتبع للمورد.

- ممكن تعمل بحث باستخدام اسم الـ **Procurement BU** وهو الـ **Business Unit** اللي بيملك الـ **Qualification Areas**، فالنظام هيعرضلك كل الـ **Qualification Areas** اللي تابعة للوحدة دي.
- أو ممكن تبحث باسم **Qualification Area** نفسها حتى لو مش تابع لنفس الـ **BU** ولو كتبت جزء من الاسم، النظام ممكن يرجعلك أكثر من نتيجة.

ممكن كمان تختار أكثر من **Qualification Area** لو عايز، يعني مش لازم واحدة بس، لو لقيت جنب واحدة من الـ **Qualification Areas** أيقونة صغيرة في عمود اسمه **Question Branching**، ده معناه إن المجال ده فيه سؤال أو أكثر فيه **Branching** تشعب أو شرط بغير الأسئلة اللي تظهر بعد كده حسب إجابة المورد.

لو دوست على الأيقونة دي، هتنتقل لصفحة اسمها **Question Branching Page**، وهناك تقدر توسّع السؤال وتشوف التفاصيل بتاعة التشعب — يعني مثلاً لو المورد جاوب "Yes" على سؤال معين، النظام هيطهرله سؤال تاني مثلاً

Create Default Information Rule Set

الـ Default Information Rule Set هو نوع خاص من الـ Rule Sets الغرض منه إنك تحدد معلومات وتعليمات افتراضية (Default Info) يستخدمها النظام تلقائي لما يولد questionnaires أو توماتيك في أي registration أو approval أو relationship upgrade أو requalification.

من خلال الـ Default Information Rule Set، بتقدر تحدد الـ Owner الافتراضي اللي هيمسك الـ qualifications أو initiatives اللي النظام هيوّلدها تلقائي، وكماتقدر تعين Internal Responder يرد على الأسئلة الداخلية لو فيه internal questionnaires.

الـ Rule Set ده بيرتبط بواحد أو أكثر من Procurement BU ، ويتحدد فيه لأي Event بيتطبق (زي تسجيل المورد، الموافقة على التسجيل، أو ترقية المورد).

كماتقدر تضيف Introduction Text يظهر في بداية الـ questionnaire يشرح للمورد أو المستخدم الداخلي المفروض يعمل إيه، ومعاها كماتقدر ترفق Attachments زي ملفات PDF فيها سياسة الشركة أو تعليمات عامة. باختصار، الـ Default Information Rule Set هو أداة بتوفر وقت ومجهود، لأنها بتخلي النظام يضيف تلقائي كل النصوص والتعليمات والمرفقات الافتراضية في كل استبيان بيتم إنشاؤه أثناء دورة تسجيل أو تقييم المورد، وبتضمن كمات إن كل الـ questionnaires اللي بتطلع من النظام تكون بنفس التنسيق والمحتوى المطلوب.

Business Case – Supplier Qualification Management

Objective:

To design and execute a complete Supplier Qualification Management process in Oracle Fusion to evaluate supplier performance, compliance, and reliability across multiple qualification areas using rule-based assessments and automation.

Business Scope:

The case simulates a real supplier lifecycle evaluation process for four suppliers covering Three key qualification areas: **Quality, Financial, and Compliance**. Each area included specific questions, rules, and scoring logic to ensure objective evaluation and continuous monitoring through initiative qualifications and assessments.

Sample Qualification Questions

1. Quality Area

- *Does the supplier hold a valid ISO9001 certification? (Y/N – Critical)*
- *What is the supplier's on-time delivery performance (%) in the last 12 months? (Numeric, ≥ 95% = Pass)*
-

Field	Quality Q1 – ISO 9001 Certification	Quality Q2 – On-Time Delivery %
Question	ISO9001_Cert	OnTimeDelivery_Percent
Question Level	Supplier	Supplier
Responder Type	Supplier	Supplier
Question Type	Multiple choice (Yes/No)	Number
Question Text	Does your organization hold a valid ISO9001 Certification?	What is your on-time delivery performance (%) in the last 12 months?
Hint	Upload certificate if available	Enter value between 0–100
Acceptable Responses	Yes / No	Numeric input
Critical Question	☒ Yes	☐ No
Response Required	☒ Yes	☒ Yes
Scoring	Auto-Fail if “No”	Pass if ≥95%, Conditional if 80–94%, Fail if <80%

2. Financial Area

- Provide the most recent audited financial statement (upload document).
- What is the supplier's current credit rating or liquidity ratio? (Dropdown: High/Medium/Low Risk)

Field	Financial Q1 – Audited Statement	Financial Q2 – Credit Rating
Question	Audited_Financial_Statement	Credit_Rating
Question Level	Supplier	Supplier
Responder Type	Supplier	Supplier
Question Type	File Upload	Multiple choice (High/Med/Low)
Question Text	Please upload your latest audited financial statement	What is your current credit rating/liquidity category?
Hint	PDF preferred	Choose from list
Acceptable Responses	File	High / Medium / Low
Critical Question	☒ Yes	☐ No
Response Required	☒ Yes	☒ Yes
Allow Comments	Optional	Optional
Scoring	Fail if missing	High=Pass, Med=Conditional, Low=Fail

3. Compliance Area

- Does the supplier maintain valid insurance coverage for liability and operations? (Upload Certificate, Expiry Date Check)
- Is the supplier currently listed on any international sanctions or restricted-party lists? (Y/N – Critical)

Supplier Qualification

The screenshot displays the 'Create Initiative' dialog box in the Qualifications Management system. The dialog is open over a background showing various qualification status cards. The 'Create Initiative' dialog has the following fields and options:

- Title:** YO Initiative
- Type:** Qualification (selected from a dropdown)
- Internal survey:** ☐ (unchecked)
- Procurement BU:** YO Nokia (selected from a dropdown)
- Owner:** Younis, Abdelhman (selected from a dropdown)
- Buttons:** Create (highlighted with a red box), Cancel

The background shows several qualification status cards, including 'Draft', 'Pending Responses', 'Pending Acceptance', 'Pending Evaluation', 'Expired Qualifications', 'Qualified Suppliers', and 'Qualifications'. The 'Qualifications' card shows a status of '0' and 'No data available'.

Business Case: Automated Supplier Qualification using Rule Sets

The objective of this business case is to simulate a complete supplier qualification lifecycle — from registration to approval and promotion — using automatic evaluation and scoring through Rule Sets in Oracle Supplier Qualification Management.

To keep the scenario simple, focused, and testable. This setup aims to validate the concept, test automation behavior, and ensure a clear understanding of how the Rule Sets trigger and evaluate supplier responses across all lifecycle stages.

Qualification Areas Setup

Qualification Area	Purpose	Event Trigger	Evaluation Type
QA1: YO Registration Submission	Validate supplier basic compliance (legal name, registration, tax)	Registration Submission Based on Tax Country	Automatic Evaluation with Scoring
QA2: YO Registration Approval	Assess supplier financial stability	Registration Approval	
QA3: YO Registration Promotion	Assess supplier readiness for spend authorization	Promotion to Spend Authorized	

Automatic Evaluation Configuration

For each Qualification Area:

- **Enable Scoring:** Yes
- **Enable Automatic Evaluation:** Yes
- **Enable Automatic Requalification on New Response:** Yes
- **Accept Responses Automatically:** Yes

Scoring model example:

- **Acceptable Response = 5 points**
- **Partially Acceptable = 3 points**
- **Not Acceptable = 0 points**

Each Rule Set configured as:

- **Allow Branching:** No (for simplicity in concept test)
- **Automatically Create Questionnaires:** Yes
- **Reuse Active Qualification:** Enabled
