4. Following Schedule Process jobs to be run:

Navigation: Tools > Scheduled Processes and then click on Schedule New Process

- Process name: **Transform Data Post Upgrade**
- Parameter
 - Feature Name: **POPULATE_ELASTIC_INTERMEDIATE_TABLE**

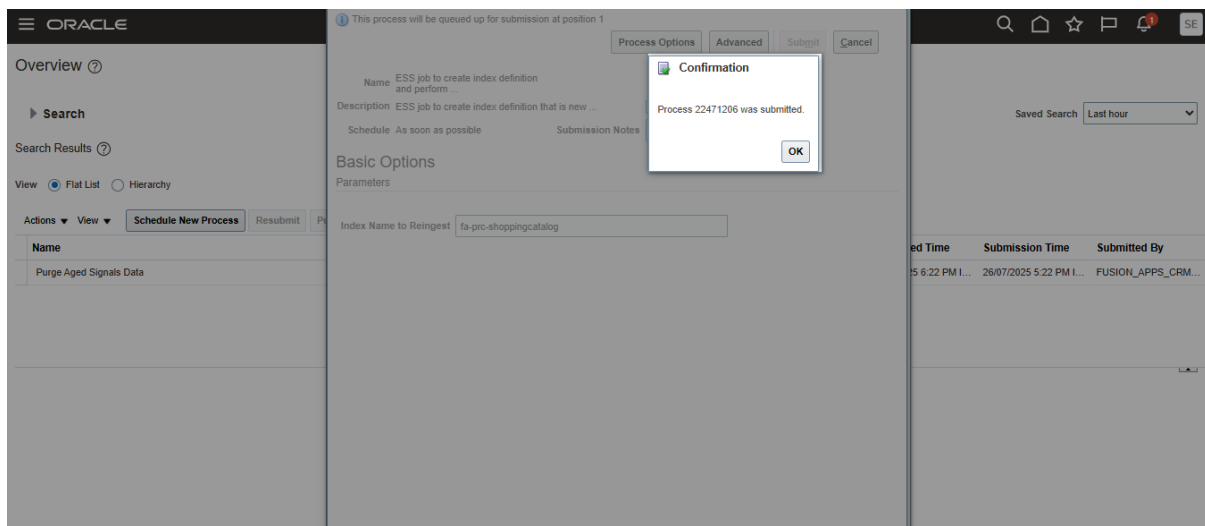

****Monitor the Transform Data Post Upgrade process.**

Wait for **at least 2 hours** to ensure that updated database statistics are available for the next process to run efficiently.

Note: This is a onetime process that you need to run when enabling Responsive Self Service Procurement.

Navigation: Tools > Scheduled Processes and then click Schedule New Process

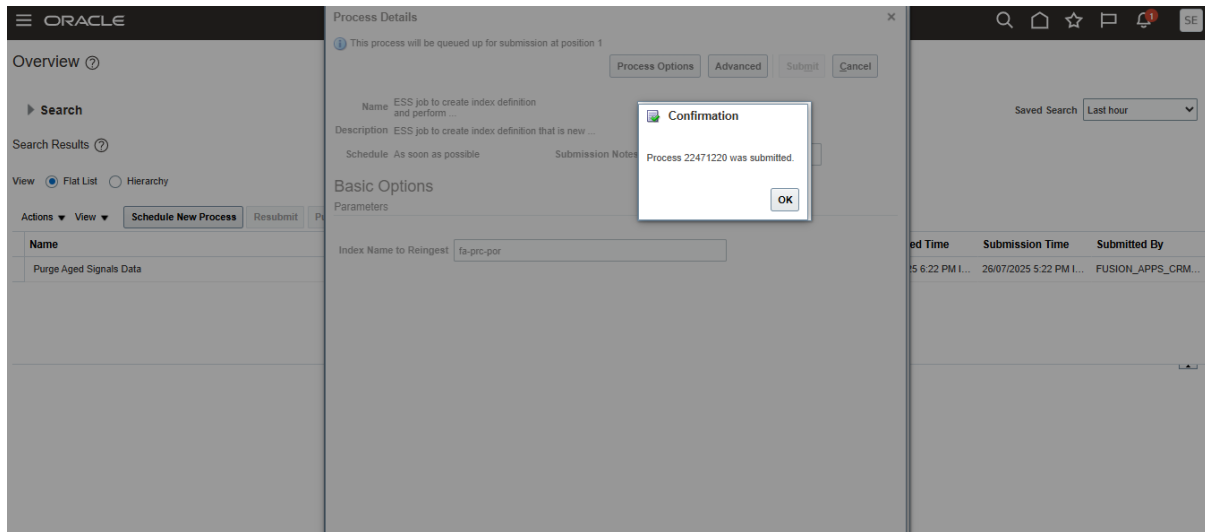

- Process name: **ESS job to create index definition and perform Initial Ingest to OSCS**
- Parameter
 - Feature Name: **fa-prc-shoppingcatalog**

Note: This is a onetime process that you need to run when enabling Responsive Self Service Procurement.

Navigate to Tools > Scheduled Processes and then click Schedule New Process

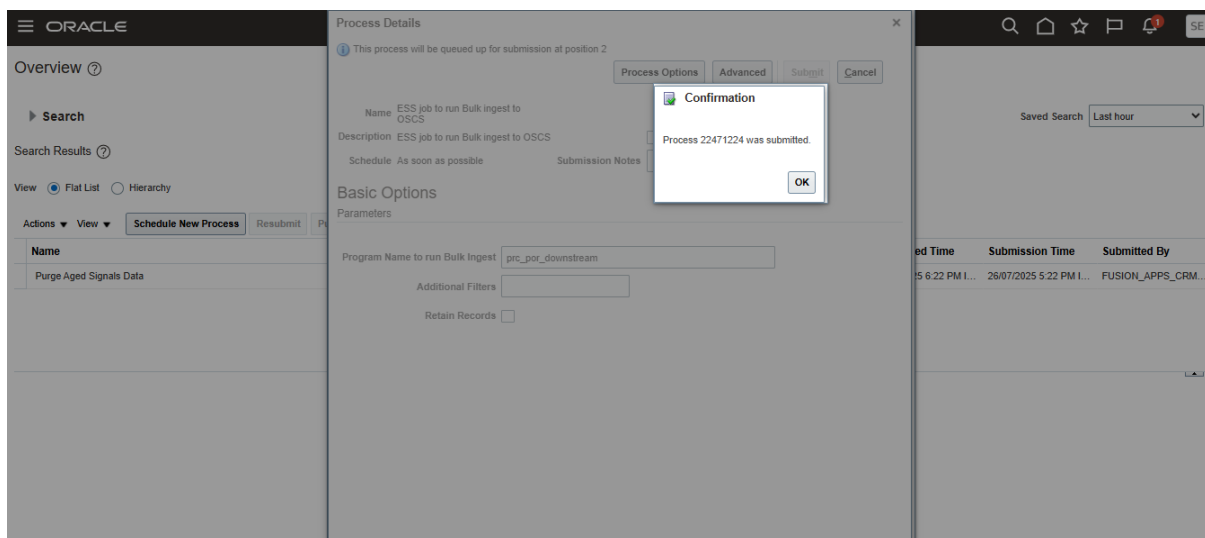

- Process name: **ESS job to create index definition and perform Initial Ingest to OSCS**
- Parameter
 - Feature Name: **fa-prc-por**

To ensure that all the requisition lines display accurate status based on downstream events post approvals, you must schedule this process to run periodically (Scheduled daily once)

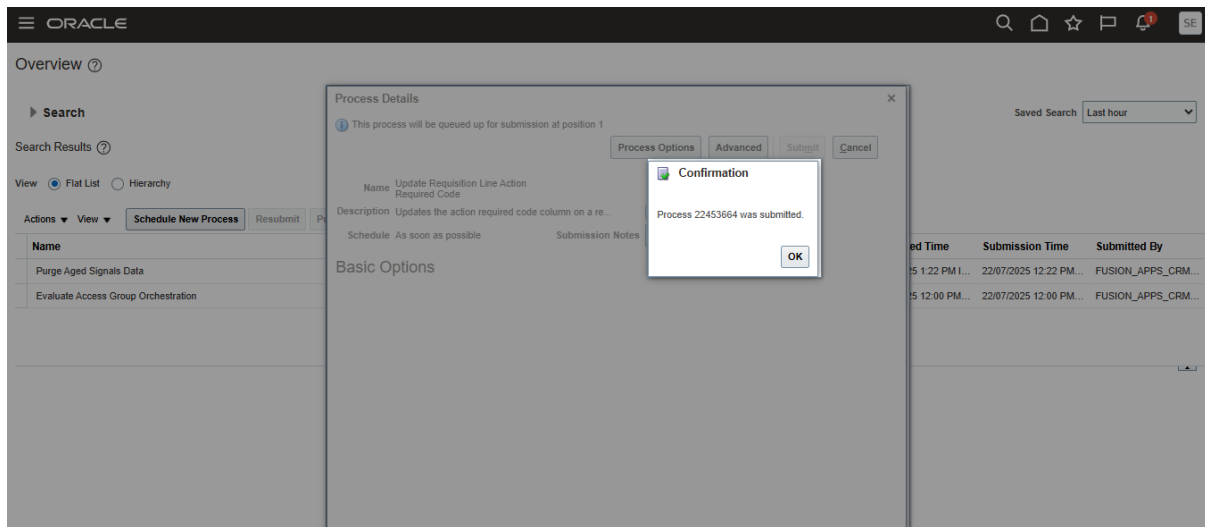

Navigate to Tools > Scheduled Processes and then click Schedule New Process

- Process name: **ESS job to run Bulk ingest to OSCS**
- Parameter
 - Feature Name: **prc_por_downstream**

Navigate to Tools > Scheduled Processes and then click Schedule New Process

- Process name "**Update Requisition Line Action Required Code ESS job at least daily**
