Introduction

There are four methods of reporting in Oracle Fusion:

1. Oracle Transactional Business Intelligence – OTBI
2. BI Publisher
3. SmartView
4. Financial Reporting Studio – FRS

In this document, we are discussing the OTBI. We are covering several topics including the creation of both **Analysis** and **Report**.

OTBI Usage:

OTBI is used to is used for simple cases like answering a business question or analysis. Multiple analysis can be used to create a dashboard. Also, used to create an Info let.

What is the scope of OTBI?

OTBI IS Not recommended for **HIGH VOLUME REPORTING**. BI Publisher is used for high volume reporting.

What are the main differences between **Report and **Analysis**?**

Analysis: created using a **BI Composer**. It is mainly used for sorting, prompting, Highlighting and Section By. Mainly used for creating a simple analysis.

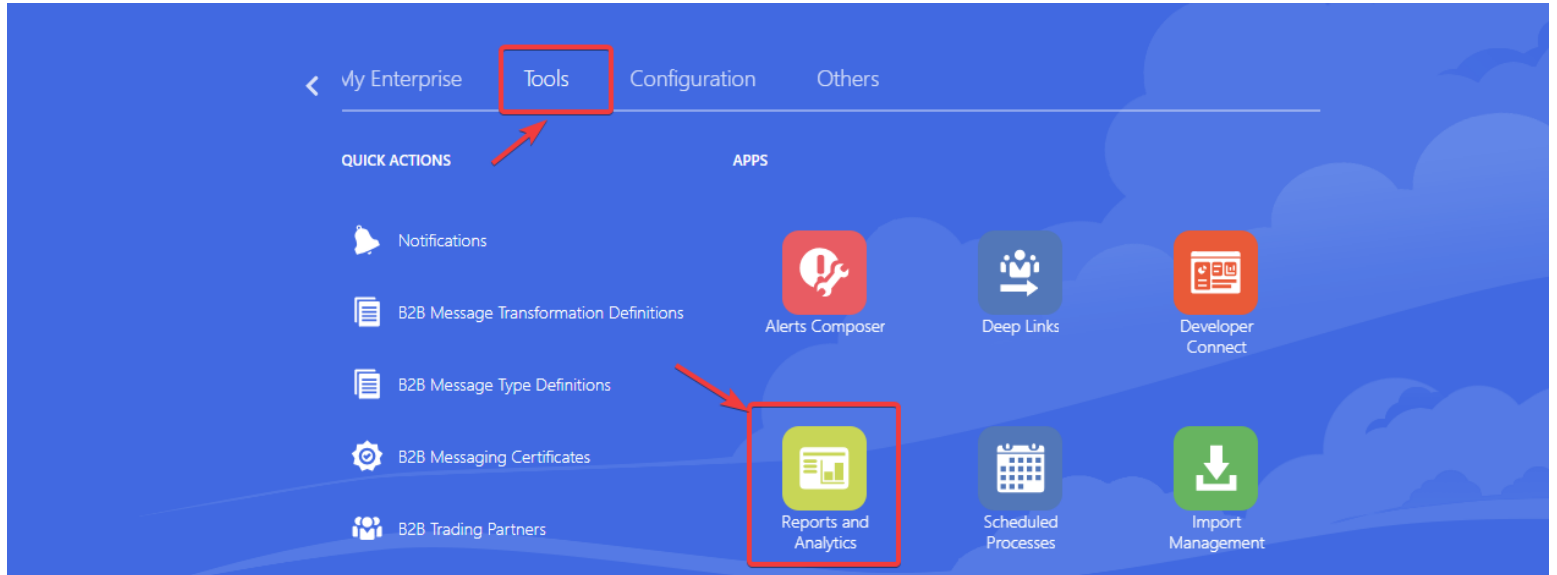

Report: created using a **BI Analytics Editor**. It is mainly used for Complex Analysis, Formulas, Drill Down and Drill Through.

What is Drill Down? to navigate from summary analysis to detailed analysis

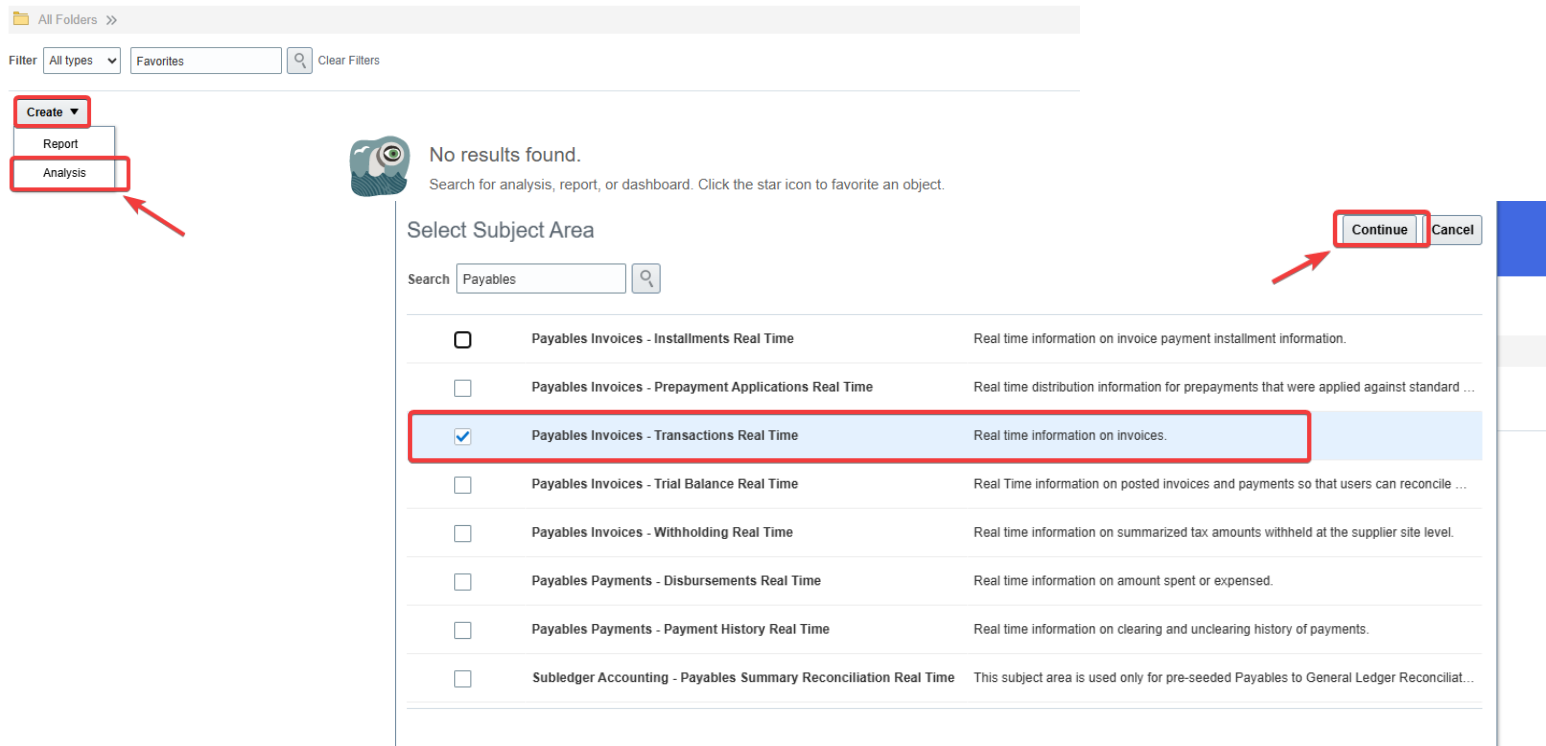

What is Drill Through? to navigate from the analysis to the application page itself.

Steps to create an Analysis

- Navigate to **Reports and Analytics**
- Create an **Analysis**
- Select the **Subject Area**

Reports and Analytics ②

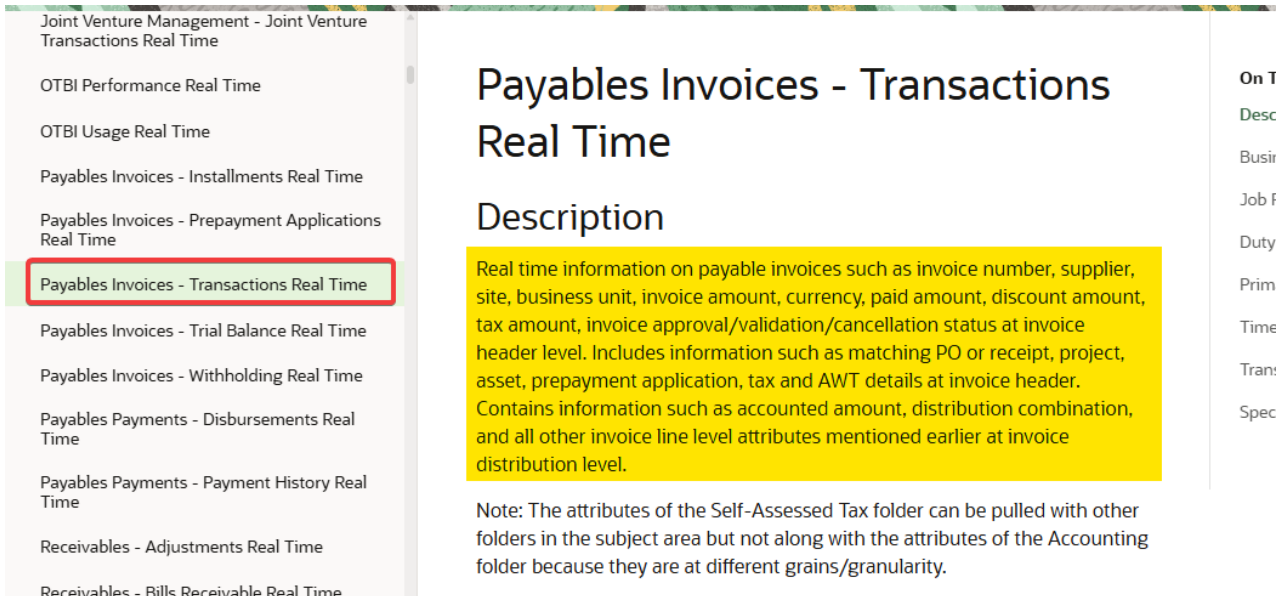

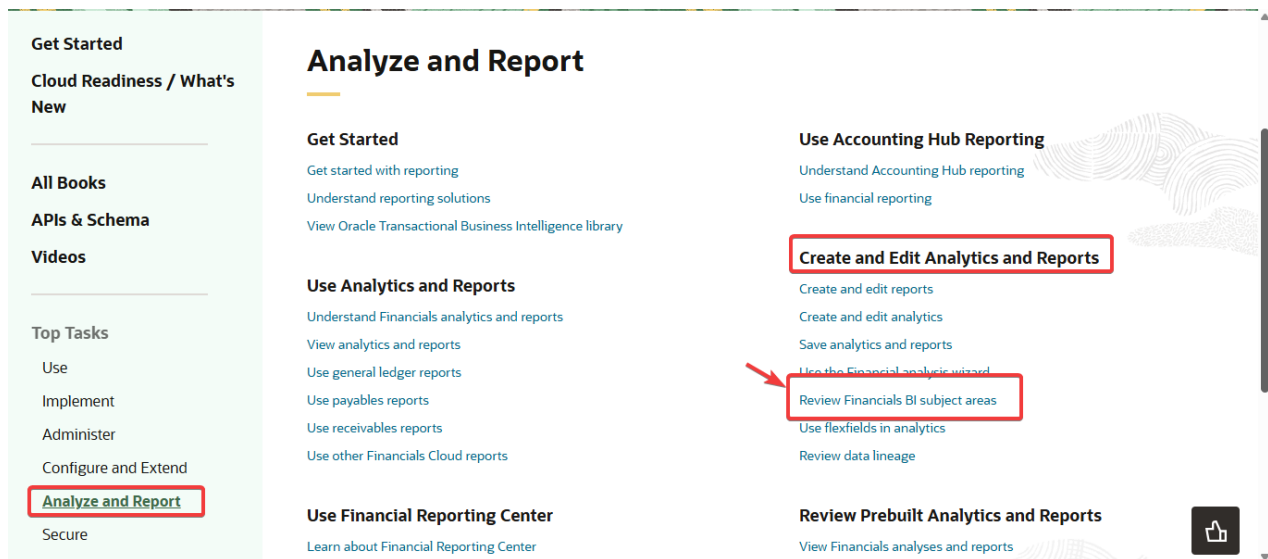

Determine the Subject Area

1st step: Determine the columns to be displayed in the analysis.

2nd Step: Navigate to Oracle docs to view the Subject Area containing the determined columns. From the description, you can determine the Data Element within a Subject Area.

For example: in this document, we are displaying the Invoice Payables information like Invoice Number, Supplier Name, Invoice Date, Amount, Paid Amount & Invoice Type.

Build an Analysis

1st Step: Select the columns to be displayed in the **Analysis**.

7th Step: Save

Choose an analysis name and path.

The screenshot shows the 'Create Analysis: Save' step in a software interface. At the top, a progress bar indicates the current step is 7, 'Save', which is highlighted with a red box. The steps are: Select Columns, Select Views, Edit Table, Edit Graph, Sort and Filter, Highlight, and Save. Below the progress bar, the title 'Create Analysis: Save' is followed by the instruction 'Enter analysis name and location to save it.' Two input fields are present: 'Analysis Name' and 'Description', both containing the text 'Analysis_1 Invoice Details' and highlighted with red boxes. To the right of these fields are four buttons: 'Back', 'Next', 'Submit', and 'Cancel'. The 'Submit' button is highlighted with a red box and a red arrow points to it. Below the input fields is a 'Save In' section showing a file explorer view. The 'Shared Folders' folder is expanded and highlighted with a red box. Under 'Shared Folders', the 'Custom' folder is highlighted with a red box. Under 'Custom', the 'Analysis_DEMO_1' folder is highlighted with a red box and a red arrow points to it. The file explorer shows a hierarchy of folders and files, including 'My Folders', 'Shared Folders', 'AICA MAINT Reports', 'Common Content', 'Custom', 'Dashboards', 'Absence2025', 'AICA_UUID_PENDING_DM.xdm', 'AICA_UUID_PENDING_REPORT.xdo', and 'Analysis_DEMO_1'.

At this step: you have completed the analysis creation. Navigate to the analysis location and preview the result.

Invoice Amount	Default	☐
Invoice Amount Paid	Default	☐
Supplier	Default	☐
Invoice Type Name	Default	☐

Calculate the Days between the Invoice Date and Current Date

Insert a Data Element: Invoice Date. Then, we got the Invoice Date twice.

Select Columns Select Views Edit Table

Edit Analysis Analysis_1 Invoice Details : Select Columns

Select columns to include in the analysis.

Subject Areas

- Invoice Canceled Date
- Invoice Canceled by User N
- Invoice Created By
- Invoice Created By Usernam
- Invoice Creation Date
- Invoice Date**
- Invoice Description
- Invoice Extract Process ID
- Invoice Extract Status
- Invoice Group
- Invoice ID
- Invoice Last Updated By

Selected Columns

Name
Invoice Number
Invoice Date
Description
Invoice Amount
Invoice Amount Paid
Supplier

Then change the second Data Element name from Invoice Date into Days.

And change the formula from the data element directory to TIMESTAMPDIFF function.

Columns views filter

Invoice Details : Select Columns

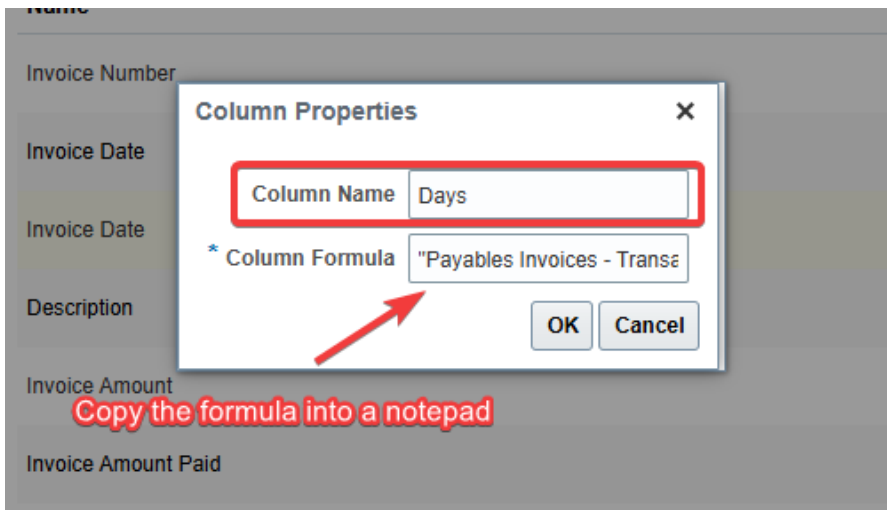

Back Next Submit Cancel

Change the name and the formula

Selected Columns

Name	Interaction	Hidden
Invoice Number	Default	☐
Invoice Date	Default	☐
Invoice Date	Default	☐
Description	Default	☐
Invoice Amount	Default	☐
Invoice Amount Paid	Default	☐
Supplier	Default	☐

Interaction Type

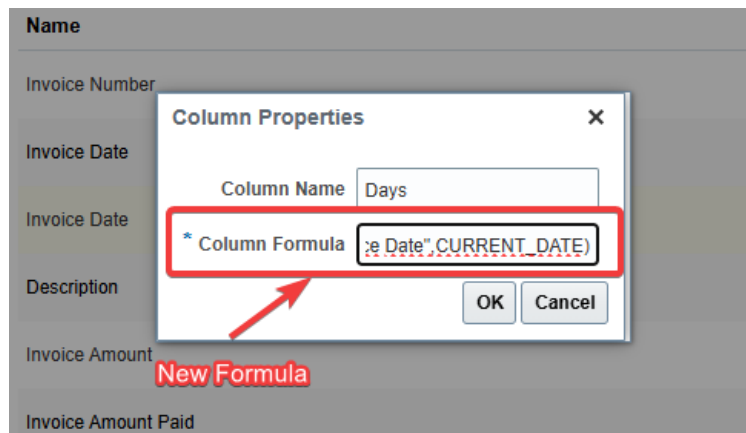

```

FORMULA :
"Payables Invoices - Transactions Real Time".- General Information"."Invoice Date"
--> Subject Area --> Folder --> Data Element
TIMESTAMPDIFF(SQL_TSI_DAY,Field1,Field2)
TIMESTAMPDIFF(SQL_TSI_DAY,"Payables Invoices - Transactions Real Time".- General Information"."Invoice Date",CURRENT_DATE)

```

TIMESATMPDIFF function calculates the difference between the second and the third parameter. So, allocate the Invoice Date formula into the second parameter and CURRENT_DATE into the third parameter.

Allocate the new formula into the formula column.

Find the result from Select Views.
